

Anthony Pafundi

6101 Yucatan drive, Orlando, FL 32807 • (917) 284 9532 • eaglesixty4@gmail.com • [Linkedin](#)

Results-driven Senior Full-Stack Engineer with over five years of experience designing, developing, and deploying scalable web applications for enterprise-level organizations, including The Walt Disney Company. Skilled in both frontend and backend development, with deep expertise in **JavaScript, TypeScript, React, Angular, Svelte** and the **Java/Spring Boot** stack. Proficient in architecting high-performing solutions, modernizing legacy systems, and integrating advanced technologies like **GraphQL, RabbitMQ, serverless computing**, and cloud platforms such as **AWS** and **GCP**.

Proven track record in leading development teams, mentoring junior engineers, and fostering collaborative, high-performing environments. Experienced in implementing secure **APIs**, optimizing database performance, and leveraging modern tools like **Docker, Kubernetes**, and **CI/CD** pipelines for seamless deployments. Adept at working cross-functionally with designers, product managers, and stakeholders to deliver innovative solutions that align with business goals.

Demonstrates strong focus on user experience (**UI/UX**), performance optimization, and accessibility, creating visually appealing and intuitive interfaces. A detail-oriented professional with a passion for clean, maintainable code and delivering impactful solutions for complex challenges.

Skills

HTML5 • Javascript • Typescript • React • Angular • Svelte • Redux • Spring Boot • Hibernate • Dropwizard • MongoDB • Maven • Tomcat • Jetty • RESTful APIs • TestNG • Gradle • SQL • OAuth • JWT • Git • Github • CI/CD • Docker • Github Actions • Figma • Sketch • AWS • AWS Lamda • AWS EC2 • AWS S3 • Cypress • Mocha • UI/UX • Kubernetes

Experience

09/2020 – 03/2025

Senior Full-Stack Engineer | The Walt Disney Company

Burbank, California | Remote

- Led development efforts for large-scale web platforms, driving key initiatives to modernize legacy systems using **React, Svelte**, and cloud-based architectures.
- Architected and implemented full-stack solutions, integrating dynamic frontends with highly available backend services powered by **Spring Boot** and **MySQL, Oracle**.
- Provided technical leadership to frontend and backend teams, establishing best practices for code quality, performance, and scalability.
- Championed the adoption of modern technologies like **RabbitMQ** and serverless computing to streamline development and reduce operational costs.
- Mentored junior engineers, fostering a collaborative and high-performing development environment while ensuring on-time delivery of critical projects.

- Partnered with cross-functional teams, including product managers and stakeholders, to align technical solutions with business goals.

Full-Stack Developer

- Contributed to the full-stack development of Disney's internal tools and consumer-facing platforms, implementing scalable solutions using the **Spring MVC**.
- Designed and developed robust APIs with **Spring Boot** and **Nest.js**, ensuring secure and efficient data communication.
- Improved database performance by optimizing **Oracle** queries and designing schema structures to support high-volume traffic.
- Enhanced web application features by integrating third-party services and **APIs** to improve functionality and provide a richer user experience.
- Worked closely with **DevOps** teams to deploy applications via **AWS**, implementing **CI/CD** pipelines for faster, reliable releases.

Frontend Developer

- Developed visually stunning, user-friendly web interfaces for Disney's digital platforms, focusing on performance, accessibility, and responsiveness.
- Utilized **React** and **Svelte** to create reusable, dynamic components and improve the scalability of applications used by millions of users.
- Collaborated closely with designers to implement pixel-perfect designs aligned with Disney's brand guidelines, ensuring consistent user experiences.
- Optimized frontend performance through lazy loading, efficient state management, and code-splitting techniques to enhance loading speeds across devices.
- Integrated frontend features with backend services via **RESTful APIs** and **GraphQL**, ensuring seamless functionality and data flow.

Techstacks: Javascript, Typescript, React, Svelte, Angular.js, Node.js, Express.js, RESTful APIs, Redux, GraphQL, MERN Stack, API Integration, MongoDB, Schema Design, Query Optimization, AWS, CI/CD Pipelines, Serverless Architecture, Figma, Nest.js, Tomcat, Spring Boot, Spring MVC, Hibernate, MySQL, Oracle

09/2019 – 09/2020

Full Stack Developer | Devsu

Orlando, Florida | Onsite

- Developed dynamic and high-performing user interfaces using **React**, leveraging hooks, Context API, and state management tools like **Redux** and **Zustand** for scalable applications.
- Built reusable components and efficient, modular frontends with **Vue.js**, utilizing **Vuex** for state management and **Vue Router** for seamless navigation.
- Designed and implemented robust backend systems using **Spring Boot** and **Express.js**, creating RESTful and **GraphQL APIs** for secure and efficient data handling.
- Hands-on experience in **Spring Boot** stack development, integrating **React** frontends with **Node.js**, **Express.js**, and **MySQL** for full-stack, end-to-end solutions.
- Proficient in database integration with **Oracle** and **SQL**, optimizing queries and schemas for large-scale applications.

- Implemented authentication and authorization mechanisms, including **OAuth** and **JWT**, to ensure secure access control.
- Debugged and optimized performance issues across the stack to deliver seamless user experiences.
- Deployed applications using **Docker** and automated **CI/CD** pipelines for smooth and efficient production releases.
- Scaled applications leveraging cloud platforms like **GCP**, ensuring reliability and high availability.

Techstacks: Spring Boot, Java, Spring MVC, HTML5, CSS3, Javascript, Typescript, React, Angular.js, Vue.js, Vuex, Tailwind CSS, Node.js, Redux, Zustand, Express.js, MongoDB, SQL, GraphQL, OAuth, JWT, Docker, GCP, Cypress, Jest, Mocha, Figma, Sketch

09/2018 – 09/2019

Frontend Developer - Intern | OneRail

Orlando, Florida | Onsite

- Developed and maintained the front end of client websites ensuring strong functionality and optimization.
- Collaborated with design and project management teams to deliver high-quality, scalable, and responsive web applications.
- Implemented new user interface features using **React.js** and integrated APIs developed by back-end teams
- Conducted rigorous testing and debugging using Chrome DevTools to ensure cross-browser compatibility and mobile responsiveness
- Spearheaded the migration of UI designs from **Figma** to **React**, implementing a streamlined process for converting **Figma** components into reusable **React** components, enhancing development speed and consistency across web applications.
- Utilized **Figma** and **Sketch** to create wireframes, user flows, and high-fidelity prototypes that improved the user experience and interface of client projects.
- Implemented comprehensive front-end testing using **Cypress** for end-to-end behavior and **Jest** for unit tests to ensure robust and bug-free application delivery.

Techstacks: HTML5, CSS3, Javascript, Typescript, React, Tailwind CSS, JQuery, Node.js, Redux, Cypress, Jest, Mocha, Figma, Sketch

Education

05/2015 – 08/2018

- **Bachelor's degree | Computing Technology and Software Development | Valencia College**
