

PROFESSIONAL SUMMARY

Data Systems Administrator and military veteran with a Secret Security Clearance and four years of proven IT experience in the United States Marine Corps. Adept at leading teams of 10 in fast-paced environments, with expertise in networking, cybersecurity, and system administration. Demonstrated success in managing IT assets exceeding \$1.65M while ensuring operational readiness. Extensive knowledge of communication systems, network security, and virtualization, supporting both domestic and global operations in Australia and the Philippines.

KEY SKILLS & ATTRIBUTES

- | | | |
|-------------------------|----------------------------|-------------------|
| ● Policy implementation | ● Collaboration | ● Strong leader |
| ● Time management | ● Adaptable | ● Communication |
| ● Critical thinking | ● Equipment accountability | ● Troubleshooting |

SECURITY: McAfee EPO/HBSS, ACAS/Tenable, PKI, Palo Alto NGFW

NETWORKING: DNS, MS Exchange, VLANs, LAN, vSAN, VTP

OPERATING SYSTEMS: Windows 7/10/11, Windows Server 2019/2022/2025, Linux (Ubuntu, RHEL 9.3/9.5), VMware ESXi 7.0/8.0

CERTIFICATIONS: CompTIA Security + (Anticipated Mar. 2025)

PROFESSIONAL EXPERIENCE

United State Marine Corps – Camp Pendleton, CA
Data Systems Administrator

2022 – Present

Responsible for managing and maintaining military computer networks, databases, and communication systems. Consisting of installing, configuring, and troubleshooting hardware and software systems, ensuring network security, monitoring system performance, performing routine maintenance, and ensuring that data is properly backed up and protected. Aiding in the implementation of network infrastructure, as well as supporting mission-critical operations by ensuring communication systems are operational at all times.

- **Leadership & Training:** Instructed and supervised over 100 entry-level Data System Administrator Marines, delivering 1,000+ hours of training in virtualization, server builds, and network administration.
- **Network & System Administration:** Managed day-to-day LAN operations, overseeing the installation, configuration, and maintenance of servers, workstations, and peripherals, including Active Directory, DNS, PKI, DHCP, and Unified Communications (CUCM).
- **Cybersecurity & Compliance:** Implemented over 500 DOD Security Technical Implementation Guides (STIGs) to ensure secure computing environments; installed, configured, and maintained cybersecurity services for both client and server systems.
- **Infrastructure & Virtualization:** Designed and deployed virtual networks via VMware VCSA, managing vSAN clusters with 80GB+ pooled storage and data redundancy; created LAN/WAN diagrams and led logistical planning for local and international exercises.
- **Asset & Data Management:** Maintained accountability of classified materials and over 600 network assets valued at \$1.65M; created and updated physical and digital records for compliance and accuracy.
- **Help Desk & Technical Support:** Resolved customer IT issues for hardware and software, ensuring operational readiness while maintaining quality assurance standards and minimizing downtime.
- **Project Management & Operations:** Led network implementations supporting 300+ users during overseas operations, ensuring uninterrupted service; managed user access by creating and submitting 120+ System Authorization Access Requests (SAARs).
- **Training & Technical Expertise:** Completed Marine Corps accredited training for Microsoft Exchange, Cisco Certified Network Associate (CCNA), and CompTIA Security+; extensive experience with Microsoft 365 Suite, including Teams, SharePoint, and Outlook.

NOTABLE AWARDS

NAVY AND MARINE CORPS ACHIEVEMENT MEDAL

Recognized for superior technical and tactical proficiency in IT administration.

CERTIFICATE OF COMMENDATION

Awarded for exceptional technical expertise and initiative, directly contributing to mission success.
