System Administrator

Tech-savvy professional with extensive experience in overseeing and enhancing IT operations across diverse technological landscapes.

Demonstrated expertise in systems and network administration, cloud solutions, and end-user support within high-stakes environments. Proven success in optimizing system performance, ensuring security and compliance, and driving significant improvements in IT infrastructure. Skilled in leading system upgrades and migrations to improve data center and cloud operations. Track record of reducing costs and improving system efficiency through strategic vendor negotiations and proactive management of IT resources. Committed to leveraging technical acumen and leadership skills to deliver reliable, user-centric solutions and training that boost productivity and operational excellence.

Areas of Expertise

- ◆ Systems & Network Administration
- ◆ Security & Compliance Protocols
- ◆ Cloud Solutions Implementation
- ◆ IT Infrastructure Optimization
- ◆ System Diagnostics & Network Analysis
- ◆ Vendor Management & Negotiations
- ◆ SSO & MFA
- ◆ Strategic IT Planning
- ◆ Automation & Orchestration
- ◆ Data Center Management
- ◆ Technical Problem Resolution
- ◆ Hardware & Software Integration

Technical Skills

Systems & Network Administration: Windows Server, Microsoft SQL Server, MS IIS, MS Active Directory, Group Policy, Cluster services, SolarWinds, SQL Sentry, Power Shell, DHCP, DNS, LAN/WAN, Network Architecture, VPN, Firewall (NGFW), SonicWall, WatchGuard, FortiGate, Cisco, Meraki, HPE, Dell, NetApp, Hitachi, IBM

Cloud & Virtualization: Microsoft Azure, AWS, Google Cloud Platform, SaaS/PaaS/IaaS, Hyper-V, VMware vSphere, Citrix, Oracle VM VirtualBox, Cloud Storage & Administration, Site Replication

End-User & Application Support: Azure Entra ID, Microsoft Windows, Microsoft Office 365 (M365), MS Exchange (Hybrid), SharePoint, Microsoft Teams, Google Workspace, SCCM, WSUS, Patch Management, Intune, AirWatch, BUEM, JamF, MDM, macOS, iOS, EDR, XDR

Career Experience

Minera Panama, First Quantum Minerals, LTD
Senior System Administrator

2022 – Present

Maintain robust IT operations, conducting regular system diagnostics and network analysis to ensure reliability and efficiency. Develop strategic solutions for system optimization while collaborating with vendors for essential updates and equipment upgrades. Conduct regular reviews of IT security protocols in line with industry regulations. Facilitate user training sessions to enhance software utilization and productivity. Ensure timely resolution of IT queries and maintain high user satisfaction through proactive service management.

Key Achievements/Contributions:

- Enhanced data center storage performance by 90% and secondary site by 70%, implementing VMware replication, site recovery, optimizing resource distribution, and implementing effective storage tiering.
- Achieved optimal data center equipment efficiency by overseeing physical and virtualized IT infrastructure to ensure performance of systems and applications.
- Ensured secure user operations by maintaining Active Directory and Exchange, managing access controls, and user account settings.
- Secured favorable terms and reduced expenses through leadership in procurement, negotiating vendor contracts, and managing IT equipment purchases.

Lynx Shield Technologies, Panama, Panama / Remote New York / Remote New Jersey
Systems Architect & Engineering Manager

2020 – 2022

Headed the installation and configuration of IT hardware for seamless integration into existing systems. Steered problem-solving initiatives, providing expert escalation support to resolve complex technical issues. Collaborated with departmental leaders to develop and enforce IT policies that support operational excellence and compliance. Assessed system architecture to recommend upgrades and

enhancements that align with business goals. Facilitated hardware procurement to ensure optimal compatibility with Azure cloud solutions. Developed and maintained cloud user accounts, integrating with Active Directory to maintain stringent security protocols. Conducted network security assessments to identify vulnerabilities and implemented strategic mitigation strategies.

Key Achievements/Contributions:

- Generated a 60% increase in MSP revenue by executing a new service model that enhanced service delivery and client satisfaction.
- Successfully sized, designed, and collaborated on implementing a government bid-winning, DLP, and Linux-based NAC solution for the national judicial organ.
- Led a team of engineers in sizing, designing, and implementing cloud infrastructure and security for a REST API platform for a government agency.
- Achieved cost savings and improved efficiency in IT procurement by establishing strategic hardware acquisition strategies.

INTCOMEX, Panama, Panama Azure Architect / Broker

2019 – 2020

Reduced Azure deployment costs by accurately sizing and estimating workloads, enabling optimized resource allocation and budgeting. Provided technical leadership in cloud architecture, promoting best practices in cloud management and operations. Accelerated cloud adoption by guiding customers through Azure migration and hybrid integration strategies, leveraging infrastructure and system design expertise to improve operational scalability.

Key Achievements/Contributions:

- Enabled a 75% migration of a banking organization's computing platform to Azure to enhance cloud integration.
- Boosted subscription sales by 15% within the first four months through effective sales strategy and customer engagement.
- Optimized network security and scalability by deploying and managing robust cloud infrastructure on Microsoft Azure.
- Streamlined enterprise application performance through software deployment, including installation, configuration, and troubleshooting.

Multitek Internacional, S.A., Panama, Panama Presales Consultant & Project Manager

1996 – 2019

Managed IT service requests to ensure rapid resolution and maintained system performance at optimal levels. Provided expert guidance on system setups, including new hardware installations and software configurations, to meet organizational needs. Collaborated with vendors and stakeholders to define IT requirements and prepare accurate budget estimates. Ensure favorable terms and reduced cost through leadership in vendor contracts negotiation, procurement, and managing equipment and supply purchases.

Key Achievements/Contributions:

- Advanced through multiple roles over 20 years, culminating in a dual role as Presales Consultant and Key Account Manager.
- Led IT infrastructure projects from procurement through deployment to ensure efficient hardware and software management.
- Sized solution and led integration project of multi-million technological infrastructure, comprised of multi-site VMware clusters, to support a multi-agency government nationwide international money laundering investigations.
- Played a key role in designing and deploying a regional communications carrier call center infrastructure that spanned over three countries.

Education

Associate of Science – Computer Programming, Panama Canal College

Licenses & Certifications

Scrum Fundamentals Certified (SFC), SCRUMstudy - Accreditation Body for Scrum and Agile (2024)

Fortinet Certified Associate Cybersecurity, Fortinet (2024)

aiXDR, aiMSSP and aiSIEM Professional, SECEON (2021)

CompTIA Server+ Certification, CompTIA (2021)

Microsoft 365 Certified: Fundamentals, Microsoft (2021)

Microsoft Certified: Azure Fundamentals, Microsoft (2021)
