
EDUCATION

- B.Tech, Electronics & Communication

2006-2010

Profile Summary

- Integration Specialist** with over **12 years** of experience in IBM webMethods 7.x/8.x/9.x/10.11 product suite.
- Proven track record in designing, developing, and implementing complex integration solutions
- Hands-on experience with both **on-premises** and **cloud** systems.

SKILLS

- EAI Tools: webMethods (7.x/8.x/9.x/10.11) SAG Installer, Update Manager, Command Central, Designer, Integration Server, MWS, Trading Networks, Broker, Deployer, Adapters (JDBC, SAP), Universal Messaging, Enterprise Manager, webMethods.io Integration
- Cloud Platforms: AWS, Azure
- Data Standards: EDIFACT, Flat File, XML and XML Schema, JSON
- Protocols: SOAP, REST, JMS
- Programming Languages: C/C++, Java, SQL
- Methodologies: Agile, DevOps, SDLC

Certifications

- webMethods 9.9 Certified ESB Developer
- webMethods 10.x Certified Integration Platform Administrator

Persistent Systems (Dec 2022 – Present)

Senior Engineering Lead

Client: Airgas, North America

- Legacy Integration and Enhancement:** Analyzed legacy applications to understand existing integrations. Developed integration solutions, services, and configurations for new functionalities requested by business stakeholders. Managed change requests, ensuring seamless integration across the platform.
- WebMethods Expertise:** Utilized webMethods Designer and Integration Server 10.11 throughout the migration process. Rehosted and tested all webMethods components for smooth operation on AWS. Configured WebMethods.IO API Gateway to facilitate secure and efficient API management.
- Security Management:** Monitored server health and managed certificates to maintain platform security. Defined security configurations, user roles, and access controls for partner profiles and document exchange.
- Monitoring and Alerting:** Implemented a custom monitoring dashboard using softwareAG Monitor, Grafana, and Prometheus for proactive issue identification.
- AWS Migration Expertise:** Participated in the planning, sanity testing, and System Integration Testing (SIT) for the AWS rehosting initiative. Prepared the go-live strategy and cutover plan for a smooth transition to the cloud. Provided ongoing production support to ensure platform stability post-migration.

Software AG USA, Inc. (Jan 2016 – Dec 2022)

Senior Consultant

Client: Waste Management, North America

- Designed, developed, and implemented user mapping interfaces for Active Directory (AD) to webMethods (WM) users, ensuring seamless user integration.
- Utilized Agile methodology to analyze assigned user stories in JIRA, iteratively developing and testing solutions to meet business requirements.
- Fostered collaboration between offshore resources, front-end developers, and back-end database teams for efficient project delivery.
- Leveraged webMethods 10.5 Integration Server with MWS, Broker, and Command Client to build, deploy, and manage user mapping functionalities.

Software AG, Bangalore (Jan 2016 – Apr 2019)

Consultant

Client: Sephora, AIA

- **Integration, Development and Deployment:** Integrated legacy systems to centralize management of retail store transactions, including order creation, fulfillment, release, shipment notification, cancellation, and inventory adjustments.
- **VMMP and AIA SG POS Services:** Developed and maintained integrations for VMMP and AIA SG POS Services, focusing on member enrollment, profile updates, payment processing, and bank settlement file processing.
- **Agile Development:** Collaborate effectively within Agile teams to analyze user stories, prioritize tasks, and deliver high-quality solutions on time.
- **Data Mapping and Transformation:** Design and implement data mappings and transformations to ensure accurate and efficient data flow between systems.
- **API Development and Integration:** Develop and consume RESTful and SOAP APIs to facilitate seamless communication between systems.
- **Production Support:** Provide ongoing production support, including incident resolution, performance tuning, and security updates.
- **Documentation and Knowledge Sharing:** Create and maintain comprehensive technical documentation, including design documents, code comments, and knowledge base articles.
- **Continuous Improvement:** Stay updated on emerging technologies and industry best practices to drive innovation and optimize integration processes.

Cognizant Technology Solutions, Bangalore (Jun 2014 – Dec 2015)

Associate

- **Enhanced Enterprise Service Bus (ESB) Integration:** Improved the Prudential website by leveraging ESB services to access and integrate data from various end systems. Developed robust logging and error handling frameworks to ensure system reliability and facilitate troubleshooting.
- **Multi-system Integration for JLP OCCO:** Designed and implemented integrations between disparate systems, including order management, inventory systems, and supply chain control systems, for JLP OCCO. This streamlined data flow and optimized business processes within the organization.

Tata Consultancy Services, Bangalore (Mar 2011 – May 2014)

Systems Engineer

- **Enterprise Integration Architect:** Designed and implemented complex integrations between Synygy, Depuy, and LA JDE systems, streamlining business processes and improving data consistency.
- **Data Consolidation and Integration:** Led the BOMbay project to integrate external manufacturing sites with SAP MDM and Global BW through webMethods middleware. This initiative consolidated Bill of Materials, Master Data, Inventory Balance, Purchasing Data, and Consumption Data, improving data accuracy and decision-making.
