SUMMARY

Data Engineer with 6+ years of experience in building and optimizing scalable data pipelines and cloud-based solutions. Proficient in AWS, Azure, Hadoop, and Apache Spark, delivering efficient ETL workflows and real-time analytics. Achieved a 40% improvement in query performance and reduced pipeline runtimes by 30% through advanced optimizations. Skilled in Python, SQL, and Databricks, with a proven track record of enabling data-driven decisions through high-impact dashboards and secure, compliant data architectures.

SKILLS

Programming Languages: Python, Java, Scala, PySpark
Data Storage: SQL, NoSQL databases, Amazon Redshift, Google Big Query, Snowflake, Data Lakes
Big Data Technologies: Apache Hadoop, Apache Spark, Databricks, Apache Hive, HDFS
Data Processing Frameworks: Apache Kafka, Apache NiFi
ETL Tools: Apache Airflow, Talend, Informatica (IICS), SSIS
Cloud Platforms: Amazon Web Services, Azure
Containerization and Orchestration: Docker, Kubernetes
Version Control: GitHub
Infrastructure: Terraform, Ansible, Jenkins
Data Visualization: Tableau, Power BI, SSRS
Database Management Systems: MySQL, PostgreSQL, Oracle, MongoDB, Snowflake, RDBMS
Collaboration Tools: Jira, Confluence
Monitoring and Logging: ELK Stack, Prometheus
Scripting and Automation: Shell scripting, PowerShell, Bash, Linux, UNIX, PHP
Continuous Integration/Continuous Deployment: Jenkins, GitLab CI

PROFESSIONAL EXPERIENCE

Data Engineer Sirius XM USA	Feb 2024 - Present
- Engineered and maintained ETL pipelines in Azure Data Factory, Databricks and Python, processing over 1TB of structured and unstructured financial data daily. - Designed real-time ingestion frameworks using Apache Kafka, enabling fraud detection and transaction monitoring with sub-second latency. - Developed and optimized Azure Data Lake Storage solutions to efficiently store and retrieve historical data, reducing retrieval times by 30%. - Built and deployed CI/CD pipelines for data workflows using Jenkins and Azure DevOps, reducing deployment lead times by 25% and enhancing operational efficiency. - Created interactive dashboards in Power BI, visualizing portfolio risk, transaction trends, and revenue analysis, enabling data-driven decision-making. - Implemented advanced encryption and data masking techniques to ensure GDPR compliance and secure sensitive financial data. - Collaborated with business stakeholders to design analytics solutions, driving actionable insights and strategic decision-making.	
Data Engineer Buff India Receptacles Pvt ltd India	Mar 2019- Jun 2022
- Optimized and managed relational database systems (RDBMS), including MySQL and PostgreSQL, to ensure efficient data storage, retrieval, and performance for healthcare applications. - Monitored system performance and workflows with CloudWatch proactively addressing system issues and ensuring high availability - Designed and implemented scalable data pipelines for integrating complex healthcare datasets (EHR, vaccination records, maternal health) using Python, PySpark, and Apache Airflow. - Automated ETL workflows, resolving data inconsistencies, missing values, and duplicates, improving accuracy and reducing processing time by 35%. - Optimized cloud-based data warehouses in Amazon Redshift with partitioning, indexing, and compression, enhancing query performance by 40%. - Developed real-time monitoring systems with automated alerts for overdue vaccinations and critical health deviations, enabling proactive healthcare actions. - Built detailed Tableau dashboards, providing insights into KPIs like immunization rates, growth trends, and risk factors for healthcare providers. - Ensured HIPAA compliance with robust security frameworks, including encryption, Role-Based Access Control (RBAC), and audit logging.	
Big Data Engineer Connectial Infosolutions Pvt Ltd India	Oct 2016- Feb 2019
- Designed ETL pipelines with Apache NiFi, AWS Glue, and Apache Airflow, reducing data integration time by 40%. - Built a Big Data platform using Apache Spark, Hadoop, and NoSQL, improving real-time analytics and dashboard performance by 45%. - Processed and analyzed data with Apache Spark (streaming and batch), MapReduce, and Python (Pandas, Matplotlib, Seaborn), enhancing insights by 35%. - Implemented Hive for querying large datasets and integrated with Apache Kafka and Flink for real-time data processing. - Deployed containerized applications using Docker and monitored workflows with Airflow and CloudWatch, increasing system reliability by 30%. - Created actionable visualizations with Power BI, improving decision-making efficiency by 50%.	

EDUCATION

Saint Louis University Master's in Computer Information Systems	May 2024
JNTUK Bachelor's in Electronics and Communication Engineering	May 2017

CERTIFICATIONS

- Google data analytics
- Introduction for data engineer from IBM
- Python 101 for data science by IBM
- [Data Governance with Databricks](#)
