Profile

Senior System Engineer with 8+ years of experience optimizing IT infrastructures. Proven expertise in architecture, implementing, and managing complex IT solutions leveraging VMware VxRail HCI, vSAN, vCenter, SDDC, Hyper-V, Windows & Linux Server, and Azure. Skilled in driving operational efficiency, ensuring high availability, and delivering innovative solutions.

Employment History

Senior System Engineer, Liberty Mutual Insurance

Jul 2022 – Jan 2023

Designed, implemented, and managed VMware vSphere infrastructure, including 30+ ESXi hosts, 10 vCenter servers, VxRail HCI, vRealize Suite, and vSAN, supporting over 2,000 virtual machines in a software-defined data center (SDDC).

Successfully led the migration of 10 vCenter servers to vSphere 7 and 8, achieving a 40% reduction in downtime and a 25% improvement in system performance.

Led the migration of over 300+ servers from on-premises to Azure, resulting in a 35% reduction in IT cost and a 20% performance improvement.

Streamlined lifecycle operations for 30+ ESXi hosts using Update Manager & Lifecycle Manager, encompassing upgrades, patching of over 2,000 VMs, & VM Tools installations.

Implemented VMware Fault Tolerance, High Availability, and Windows Server failover clusters to ensure business continuity and minimize downtime for 300 critical VMs.

Optimized resource utilization by implementing DRS across all infrastructure servers, Resource Pools, & vApps, leveraging affinity, anti-affinity, and VM override rules to manage over 200 VMs.

Implemented and managed VMware vSAN clusters for 3,000+ virtual machines, enhancing performance by 25% through optimized configuration, capacity planning, fault domain management, and witness host setup.

Provided backup and recovery services for over 600 VMs in Rubrik, encompassing scheduling, restoration, and regular testing, achieving a 98% recovery success rate.

Improved operational efficiency by 30% by leveraging Dynatrace's AI-powered observability across VMware, Azure, AWS, and physical servers, monitoring applications, microservices, infrastructure, and end-user experience (RUM & Synthetic Monitoring)

Supported NSX/NSX-T networks, troubleshooted issues, & managed NAS and SAN storage.

Experience with Nutanix hyper-converged infrastructure, including installation, configuration, and troubleshooting.

Collaborated effectively with cross-functional teams (network, storage, security) to troubleshoot & resolve technical issues, enhancing system stability and overall performance.

Applied Agile principles and ITIL framework to streamline incident management processes, achieving a 95% incident resolution rate and a 90% change success rate.

Analytical skills

Team Collaboration

System Engineer, Liberty Mutual Insurance

May 2021 – Jul 2022

Deployed & managed Azure Subscriptions and Azure resources (VMs, networks, storage, AD) for 300 applications, optimizing costs by 20% through resource allocation & rightsizing.

Automated Active Directory provisioning and management tasks using PowerShell and Python scripts, reducing deployment time by 40%

Administered an AD for 500+ users and 1000 computers, ensuring 99% up time.

Implemented effective patch management strategies using WSUS, SCCM, and Azure Update Manager, reducing vulnerabilities by 30%.

Deployed and managed 500 Windows servers (2012-2022) and Linux servers across CentOS, Ubuntu, and RHEL distributions, including LVM management.

Utilized SCOM, Splunk & New Relic to monitor 2000 plus servers, proactively resolving 80% of incidents.

Managed Office 365 suite for 500 users, optimizing license utilization and ensuring antivirus protection.

Troubleshoot and resolved 300 server issues (Dell EMC, HPE, IBM, Cisco UCS, Citrix XenServer), improving system performance by 25%.

Created comprehensive VMware documentation, reducing troubleshooting time by 50% and improving knowledge transfer.

Senior System Administrator, Cloud4C Services

Jul 2015 – Apr 2021

Expertly configured RAID on 500+ servers (Dell EMC, HPE, IBM, Cisco UCS, Citrix XenServer), deployed and managed 50+ ESXi hosts, and administered 2PB+ of SAN/NAS storage.

Managed over 1000 virtual machines (Windows Server, SQL Server, Linux) across VMware vSphere, Hyper-V, and Azure, achieving 95% server utilization.

Administered Active Directory for 2000+ users/computers, implementing over 20 Group Policies to enhance security.

Optimized storage efficiency by executing 200 Storage vMotion migrations and managing 500+ clones, templates, and snapshots.

Implemented over 50 network configurations (VLANs, VDS, NIC teaming), managed DNS, DHCP, and routing for a network of 200+ devices.

Streamlined license management for 1000+ Windows/Linux hosting servers, resolving billing complexities for WHM, cPanel, Plesk, and SSL platforms, resulting in a 40% profit.

Convert physical servers P2V, P2P, V2V to VMware virtual infrastructure using VMware converter.

Implemented a backup and recovery strategy using Commvault and Veeam Backup for 200+ systems, achieving a mean time to recovery (MTTR) of under 2 hours, while utilizing Zabbix and Nagios for server monitoring and alert generation.

Collaborated with the SOC team to conduct regular vulnerability scans and penetration tests, addressed 30 vulnerabilities, and enhanced the organization's security posture.

Developed 30 Standard Operating Procedures (SOPs), and provided support to 1000+ users, resolving 80% of issues within first contact.

Certifications

Microsoft Certified Azure Administration AZ-104

Microsoft Certified Azure Fundamentals AZ-900

Microsoft Technology Associate: Windows Operating System Fundamentals (MTA)

Microsoft Technology Associate: Networking Fundamentals (MTA)

Courses

Dynatrace, Udemy

VMware vSAN 6.7 (Virtual SAN), Udemy

Microsoft Windows Server 2016, Udemy

Active Directory & Group Policy, Udemy

vSphere 8 Professional - VMware VCP DCV, Udemy

Education

JNIT, Bachelor of Technology in Electronics and Communication Engineering

Aug 2011 – May 2015
