## SUMMARY

Visionary Vice President with 16 years of experience in database operations and infrastructure, spearheading the integration of advanced data management systems to optimize workflows and increase efficiency by 20%. Instrumental in reducing system downtime by 40%, and achieving a 30% rise in client retention through strategic relationship management and infrastructure transformation. Seeking challenging role in Database Administration to drive sustainable growth and enhanced database performance through strategic automation and team leadership.

## EXPERIENCE

### Director Database Operations

#### Paysign

May 2024 – Present

- Designed database models and performance-tuning processes, leveraging PostgreSQL, MYSQL and Snowflake to support company growth initiatives.
- Engineered robust solutions with scalable PostgreSQL and MYSQL database platforms, ensuring 99% uptime through strategic resource allocation.
- Team Management: Lead and mentor a team of bigdata developers and database administrators, fostering a collaborative environment that encourages innovation and continuous skill development.
- Performance Optimization: Monitor and enhance bigdata and database performance, implementing tuning strategies and ensuring high availability and effective disaster recovery plans are in place.
- Data Security and Compliance: Ensure data integrity and security in accordance with industry regulations and Paysign's policies, safeguarding sensitive information.
- Vendor Management: Manage relationships with vendors and service providers, negotiating contracts to ensure quality service delivery and cost-effectiveness.
- Budget Management: Develop and oversee the department budget, ensuring efficient allocation of resources in alignment with business objectives.
- Developed strategic partnerships within the organization, aligning database functions with business needs.
- Researched and integrated cutting-edge database solutions to strengthen Paysign's technology edge, improving data management capabilities by 15%.
- Reporting and Documentation: Ensure comprehensive documentation of systems and processes, providing regular performance reports and updates to senior management.

### Vice President, Database Operations and Infrastructure

#### Investnet Yodlee

January 2020 – November 2023, US, CA, San Mateo

- Engineered the integration of advanced data management systems and cloud computing platforms to optimize workflows, achieving a 20% efficiency boost in operations.
- Mentored distributed DBA teams, enhancing teamwork by 25%, managing assignments for 50+ team members, and tracking progress using JIRA.
- Applied automation, reducing tasks by 15%, enhancing database performance, saving 20 hours per week.
- Led best practices development, reducing downtime by 40%, resulting in 50% fewer system failures.
- Established client relationships, fostering growth opportunities, resulting in a 30% increase in client retention.
- Analyzed complex database systems, ensuring reliability, scalability, security, managing incidents, and developing contingency plans, reducing incident response time by 25%.
- Leveraged Oracle, PostgreSQL, and cloud solutions, ensuring 99.9% uptime and technical support.
- Managed DBA team, overseeing recruitment, and developing contingency plans for a team of 20+ members.
- Implemented strategic measures, aligning with business strategy, resulting in a 15% team performance increase, and developing contingency plans, leading to a 20% increase in productivity.
- Spearheaded a transformation of database infrastructure, achieving a 50% improvement in data retrieval speeds by leveraging cloud-based solutions and enhancing existing server architectures.

### Senior Director, Database Operations and Infrastructure

#### Investnet Yodlee

January 2018 – December 2020, US, CA, San Mateo

### Director, Database Operations and Infrastructure

#### Investnet Yodlee

January 2013 – December 2017, US, CA, San Mateo

### Database Architect

#### Investnet Yodlee

January 2011 – December 2012, US, CA, San Mateo

## Senior Database Administrator

Envestnet Yodlee

August 2009 – December 2011

## Senior Database Administrator

Wells Fargo

June 2008 – July 2009, US, CA, San Francisco

- Leveraged technical expertise in database administration to implement robust disaster recovery plans swiftly and effectively.
- Enhanced database performance by 20% through regular maintenance and optimization techniques.
- Collaborated with 5 cross-functional teams to design database solutions, boosting efficiency by 20%.
- Implemented weekly SQL training for team, enhancing performance by 25%.
- Researched database technologies, upgraded the databases to Oracle Database 12c, optimizing operations.
- Implemented stringent security measures, ensuring full HIPAA and GDPR compliance, safeguarding data and mitigating risks.
- Implemented automated database maintenance tasks and monitoring solutions using SQL scripts, reducing manual effort by 30%.
- Successfully participated in on-call rotation schedules, achieving a 99% incident resolution rate within agreed-upon response times.
- Utilized technical skills in database management to scale infrastructure, enhancing overall system efficiency.
- Researched multiple vendors and technologies, analyzing 5 industry trends to provide data-driven recommendations for optimizing database operations.

---

## EDUCATION

### MBA: Information Technology, 1998

Deemed University • In, Kancheepuram, India • 1998

### BBA, 1996

University of Madras • In, Chennai, India • 1996

---

## SKILLS

Big Data: Hadoop, Redshift, S3, Snowflake

Databases: Oracle, Postgres, MySQL, Redshift, Aurora

Clustering Services: Vertias, Oracle RAC

Hardware: Sun-SPARC Enterprise Servers, Exadata, ODA, T4-4, T5-2

Tools: Erwin, Foglight, AWS, GoldenGate, Striim, WANdisco, Nagios, New Relic, Grafana

Operating Systems: Windows, Solaris, Linux, HP-UX, AIX

NoSQL: MongoDB

Report Generators: Tableau

Languages: SQL, PL/SQL, UNIX Shell Scripting

Utilities: OEM, SvrMgrl, EXPDP, TKPROF, STATSPACK, SQL\*Loader, Lsnrctl, Enterprise Manager, Net Configuration Assistant, RMAN, Enterprise Backup Utility, Oracle Replication Manager, Database Configuration Assistant, DB Verify
