

Ashwini Kulkarni

SAP Techno-functional Consultant

Phone: +1 (470) 502-4735

Email: akulkarni9396@gmail.com

Address: Atlanta, Georgia

SAP Techno-Functional Consultant with overall 7 years of IT experience in designing and developing SAP applications on ECC and S/4 HANA. Hands-on experience on multiple implementation and support projects. Parallelly worked on an SAP Cloud for customer implementation project as a techno-functional resource.

Professional Experience

SAP Techno-Functional consultant ► Yamaha Motor Corp May 2024 - Present

- Technical experience in Implementation and Support projects and hands-on experience in SAP ECC 6.0 versions, S/4HANA 1709/1809/1909 versions.
- Experience in full-lifecycle SAP implementation projects.
- Technical proficiency encompassing all the major areas of ABAP developments including Forms, Enhancements, Interfaces, Reports, Conversions, SAP Business Workflow, and Dialog programming (Module Pool).
- Integrated and maintained multiple non-SAP systems(Vertex, Salesforce) with SAP systems for the data transfer using RFC, File, IDOC, OData.
- Developed utility tools for the master data load.
- Developed complex interfaces using AIF and IDOCs.
- Determined the appropriate methodology for migrating data using the standard download mechanism, custom tools, and Data migration cockpit.
- To analyze the data extracts from legacy systems, define a cleansing approach, identify cleansing opportunities and report back to business teams. To write cleansing, conversion and transformation routines in MS Access to cleanse the data.
- Developed, tested, and supported customer-facing documents during FUT, Cutover, Mock cycles and Post go live hyper-care phases.
- Day to day monitoring of ST22, WE02, SM13, SM21, AL11, SOST.
- Managed multiple defects across various project phases, maintaining zero downtime and ensuring uninterrupted system functionality. Major role in stabilizing the system post go-live.
- Proficiency in standard program debugging and troubleshooting.
- Ability to provide quick and efficient solutions for issues in the production systems considering the ongoing business requirements.
- Tackled complex requirements involving OOALV Reports, BADI Enhancements, Screen Exits, and Module Pool Developments, ensuring seamless implementation with minimal discrepancies.
- Proficiency in the usage of SAP data migration cockpit(LTMC, LSMWs and conversion programs) for the master data loads across all SAP modules.
- Built new custom SAP Fiori Apps and enhanced standard SAP Fiori Apps according to the UI strategy. Configured Gateway and Fiori apps, and set up roles and profiles.
- Transport manager of all the development-related transports on the project using the ChaRM tool. Fixed errors and moved transports in the correct sequence across the landscape.

SAP Techno-Functional consultant ► MHIRJ October 2022 - May 2024

Responsibilities:

- Designed and developed forms from scratch for various modules using Adobe LiveCycle designer.
- Experience in Adobe, smart forms and scripts.
- Developed and encoded the form in various printer compatible scripts.
- Developed EDI interfaces and set up the EDI partner profiles and configurations.
- Developed extensive reports using BDC and BAPIs.
- Proficiency in all the RICEFW components.
- Responsible for code review and movement of code to higher systems to ensure optimum performance.
- Implemented custom IDOCs, extension of IDOCs in ECC environment. Monitoring and resolution of failed IDOCs/proxies and RFC calls.
- Implemented multiple enhancements in the ECC environment to cater to the business requirements. For example: user exits on sales order for item level validations, Routines for pricing procedures.
- Logging, consolidating and reporting the data load errors to the business team for data correction and creation of delta load files.
- Monitoring the data loads and data validation/correction post load.
- Created intricate reports that display the inventory balances in the MM, OTC and EWM modules.
- Developed Interfaces/Enhancements for the SAP EWM module.
- Built new custom SAP Fiori Apps and enhanced standard SAP Fiori Apps according to the UI strategy. Configured Gateway and Fiori apps, and set up roles and profiles.
- Transport manager of all the development-related transports on the project using the ChaRM tool. Fixed errors and moved transports in the correct sequence across the landscape.

- Sound cross- functional knowledge of sales and distribution, Order to cash process, Procure to Pay, Materials management, Master Data and ABAP.
- Proficiency in Fiori and the configurations.
- Provide hyper-care support for SAP deployment.
- Implemented customizations and SAP EWM. Define warehouse process types and determination of the WPT.
- Configured Picking Strategies, Put away and Outbound Delivery etc.
- Able to perform testing, change management, training, and implementation of SAP EWM.
- Worked on enhancements, interfaces, Reports and exits in SAP EWM.

Technical Skills:

SAP Data Migration: LSMWs, Data Quality, Data Consolidation, LTMC.

ERP Tools: ECC 6.0, SAP S/4 HANA, ABAP Workbench,

SAP Modules: SAP MM, EWM,SD, ABAP, Data

Supporting Tools: ServiceNow, Solution Manager, ChArm

Application Development Senior Analyst ► Accenture

Apr 2021 - Sep 2022

SAP ABAP on HANA Experience:

- Experience in developing forms and setting up the output types.
- Proficiency in developing Adobe and smart forms.
- Experience in developing forms for e-invoicing.
- Created intricate reports that display the inventory balances in the MM, OTC and EWM modules.
- Developed Interfaces/Enhancements for the SAP EWM module.
- Built new custom SAP Fiori Apps and enhanced standard SAP Fiori Apps according to the UI strategy. Configured Gateway and Fiori apps, and set up roles and profiles.
- Transport manager of all the development-related transports on the project using the ChaRM tool. Fixed errors and moved transports in the correct sequence across the landscape.
- Worked on S/4HANA 1909 to implement EWM software.
- Configured EWM system (embedded) to set up inbound and outbound processes for deliveries.
- Developed organization structure creating storage type, storage bins, maintained product master data, and warehouse product master data.
- Set up a Quality system for inbound processes. Created batches for inbound and outbound processes.
- Have predominant experience in the pharma industry.
- Set up a physical inventory system to count the warehouse stock and adjust if needed.
- Designing of warehouse structure storage type, storage section and storage bin, Stock placement and Stock removal strategies, Activity areas, Supply chain unit etc.
- Worked on production issues related to Inbound, Outbound, and Inventory management.
- Monitoring Inbound, Outbound queues and processing the failure queues.
- Worked on /SCWM/RFUI for picking, packing and Replenishment process
- Identified and resolved transactional issues caused due to improper product master data.
- Involved in end-user training and identification of potential issues requiring Emergency changes.
- Extensively worked on project scoping, conducting business process requirements gathering workshops, preparing business process documents, identifying process gaps, defining and documenting Functional specifications to support RICEF requirements and custom development objects, including integration mapping and building interfaces, testing, and training.

SAP Data Migration Experience:

- Performed the GAP analysis of the requirement and confirmed the technical feasibility.
- Led the Data migration and Cutover team executing Data Conversions in Record to Report, Procure to Pay, EWM and Order to Cash modules.
- Determined the appropriate methodology for migrating data using the standard download mechanism, custom tools, and Data migration cockpit.
- To analyze the data extracts from legacy systems, define a cleansing approach, identify cleansing opportunities and report back to business teams. To write cleansing, conversion and transformation routines in MS Access to cleanse the data.
- Developed, tested, and supported customer-facing documents during FUT, Cutover, Mock cycles and Post go live hyper-care phases.
- Special competence on Data migration, RICEF and OData concepts in PP, PM, QM, APO, WM, MM, SD, FI, PS, GTS and IS-Retail modules with cross domain experience in, Manufacturing, Electronics, Defense, Mining and Oil, Energy sectors.
- Experience in MDG BP and MM streams.
- Keep track of deliverables, defects, change requests while leading the team for solutioning.
- Review code and documentation for the deliverables designed and developed by the team.
- Created detailed Data Cutover plan with pre-requisites, post load activities covering all Data Migration objects.
- Lead the Team to complete all Data Migration within stipulated timelines while following up with Business and Functional Teams.
- Cutover Lead for Data Migration.

Technical Skills:

- ERP Tools: EWM 9.5, EWM 9.0, ECC 6.0, SAP S/4 HANA, ABAP Workbench, Eclipse IDE
- SAP Modules: SAP MM, IBP, EWM, SD, ABAP
- Supporting Tools: ServiceNow, Solution Manager, ChaRM

- SAP Data Migration: LSMWs, Data Quality, Data Consolidation, LTMC.

SAP Technical Consultant ► Deloitte

Dec 2017 - Mar 2021

SAP EWM and ABAP on HANA Experience:

- Industry experience within Consumer Goods and Energy and Resources Industries.
- Specialized in S/4 HANA implementation and worked with multiple clients on custom code movement and optimization techniques.
- Study the As-Is state of validation in the SAP project and change process (business as usual) and identify the GAPS.
- Responsible for reviewing and getting sign-off on all the functional specifications, Business Configuration documents, RICEF objects.
- Design and configuration of Physical inventory process including Cycle counting, annual inventory, and continuous inventory process.
- Experience in developing forms and setting up the output types.
- Proficiency in developing Adobe and smart forms.
- Experience in developing forms for e-invoicing.
- Very good Experience in working with set up and printing of labels and forms.
- Involved in EWM – Production interface process of issuing the stock from Warehouse to Production.
- Identified EWM Exception Codes for Handling Pick, Putaway, Cycle counting, and Replenishment exceptions performed with RF devices.
- Coordinated with the data conversion team and completed the Mock and cutover activities.
- Helped the client identify the transactional data cutover tasks and their dependencies.
- Hands-on experience on different RICEF objects using OOPS ABAP.
- Integrations between S/4 HANA system with SAP C4C CRM solution.
- Design & Developed RFUI screens for Management
- Designed and developed complex interfaces for SD and FI modules.
- Performed the GAP analysis of the requirement and confirmed the technical feasibility. Understand the requirements from functional designs and transform these requirements into technical designs.
- Complex ABAP programming, testing and debugging functions related to the implementation of SAP modules.
- Technical proficiency encompassing all the major areas of ABAP developments.
- Led the Data migration and cutover team executing the data conversions for all SAP modules.
- Developed complex reports using the Top-Down approach of CDS and AMDP classes.
- Developed, tested and supported customer-facing documents throughout the project lifecycle.
- Proficiency in the functional modules of SAP Sales and Distribution and Extended Warehouse Management modules.

SAP Data Migration Experience:

- Performed the GAP analysis of the requirement and confirmed the technical feasibility.
- Led the Data migration and Cutover team executing Data Conversions in Record to Report, Procure to Pay, EWM and Order to Cash modules.
- Determined the appropriate methodology for migrating data using the standard download mechanism, custom tools, and Data migration cockpit.
- To analyze the data extracts from legacy systems, define a cleansing approach, identify cleansing opportunities and report back to business teams. To write cleansing, conversion and transformation routines in MS Access to cleanse the data.
- Special competence on Data migration, RICEF and OData concepts in PP, PM, QM, APO, WM, MM, SD, FI, PS, GTS and IS-Retail modules with cross domain experience in, Manufacturing, Electronics, Defense, Mining and Oil, Energy sectors.
- Developed, tested, and supported customer-facing documents during FUT, Cutover, Mock cycles and Post go live hyper-care phases.
- Tracking of deliverables, defects, change requests while leading the team for solutioning.
- Code review and documentation for the deliverables.
- Created detailed Data Cutover plan with pre-requisites, post load activities covering all Data Migration objects.
- Post load data validation and correction measures.
- Setting up the systems for data load. Enhancing the system performance through data loads.
- Led the Team to complete all Data Migration within stipulated timelines while following up with Business and Functional Teams.
- Cutover Lead for Data Migration.

SAP Cloud for Customer Experience:

- SAP Cloud for Customer Techno-functional consultant.
- Configured and designed the SAP Cloud for Customer Sales System (Cloud-based CRM System).
- Led SAP C4C for Sales implementation project as a primary point of contact
- As a Techno-functional resource for Cloud for Customer, introduced clients to the expanded functionalities of Sales Campaign and library functionalities which helped them ease day-to-day business activities.
- Enhancing the standard solution using ABSL, designing screens using UI designer in Cloud Applications Studio (SDK).
- Web Service Calls with Communication Arrangement and Communication Scenarios to display real time data.
- Reporting with custom Reports and Data Sources

Technical Skills:

- ERP Tools: EWM 9.5, EWM 9.0, ECC 6.0, SAP S/4 HANA, ABAP Workbench, Eclipse IDE, SAP Cloud Applications Studio
 - SAP Modules: SAP MM, IBP, EWM, SD, ABAP
 - Supporting Tools: ServiceNow, Solution Manager, ChaRM
 - SAP Data Migration: LSMWs, Data Quality, Data Consolidation, LTMC.
-

Analyst ► Apple Pvt Ltd

Jun 2016 - Dec 2017

- The project consists of a web application written in Javascript and React framework integrating with a RESTful Web Service written in Java and Play framework and SQL database.
- Designed and developed responsive and adaptive websites using HTML5 and CSS3.
- Maintained graphic standards and branding throughout the app's interfaces.
- Successfully completed project work in Apple Maps on "MAP SURVEY TOOL".
- Responsible for the design and implementation of user interfaces (UIs) and UI components for web and mobile applications using Javascript and React frameworks.
- Code optimization and troubleshooting to enable maximum performance.
- Tested REST endpoints using POSTMAN.
- Checked for proper rendering on various platforms using the Litmus tool.
- Converted mockups into HTML, Javascript and JSON.
- Debugged the application using Chrome Development tools.
- Training in efficient communication, teamwork and presentation techniques was conducted and practiced throughout the project.

Technical skills:

- HTML5, CSS3, JavaScript, React framework, Play Framework.
-

Education:

Bachelor's of Technology ► G.Narayanamma Institute of Technology and Science

Skills:

Strong Communication | SAP ABAP | SAP ABAP on HANA | UI Designing | SAP Cloud for Customer
