Summary

CompTIA Security+ Certified with extensive hands-on training experience leveraging SIEM, EDR, and E-Mail Security tools for various security detections from an immersive, real world cybersecurity training program. Seeking to leverage skills in a SOC Analyst position.

Relevant Experience

CyberNow Labs

(Remote) Sterling, VA

An Immersive, Real World, SOC-Based Cybersecurity Training Program, featuring a real enterprise grade Security Operations Center with real tools on a real network against real attacks, that trains how to work as a SOC Analyst and gain hands-on training experience.

SOC Analyst Trainee

April 2023-August 2023

- Investigated security detections in various SIEM, EDR/XDR, & E-Mail security tools, including Splunk Enterprise Security, IBM QRadar, CrowdStrike Falcon, SentinelOne, and Proofpoint TAP
- Prioritized thorough documentation, utilizing Jira to assign action items as needed
- Engaged in weekly SOC meets, exceeding ticket output expectations in support of enhanced collaboration
- Leveraged OSINT tools towards malicious artifact identification
- Self-structured routines to begin with security tool health checks as a means to verify environment security during SOC shifts
- Ensured up-to-date comprehension of relevant current events in the cybersecurity domain

Cybersecurity Tools

- | | | |
|------------------------------|----------------------|-------------------|
| ● Splunk Enterprise Security | ● Fortinet FortiGate | ● VirusTotal |
| ● IBM QRadar | ● Revelstoke | ● AbuseIPDB |
| ● CrowdStrike Falcon | ● ThreatMon | ● Joe Sandbox |
| ● SentinelOne | ● Armis | ● AnyRun |
| ● Proofpoint TAP | ● Tenable Nessus | ● Hybrid Analysis |
| ● Proofpoint TRAP | ● Tenable.io | ● URLScan |
| ● Jira Ticketing | ● Acunetix | ● CentralOps |
| | ● Invicti NetSparker | ● MXToolbox |
| | ● OpManager | ● IBM X-Force |

Skills

- Customer service skills
- Communication skills
- Attention to detail
- Team player
- Collaborative
- Strong Work Ethic

Certifications

- CompTIA Security+
- Armis Cyber Defense Core
- Revelstoke Certified Analyst
- Qualys Vulnerability Management Foundation
- Qualys Endpoint Detection and Response (EDR) Foundation
- Fortinet NSE 1 Network Security Associate
- Fortinet NSE 2 Network Security Associate
- Fortinet NSE 3 Network Security Associate
- arcX Cyber Threat Intelligence 101

Education

Associate's Degree in Cisco Networking Technology

May 2017

Chandler Gilbert Community College, Chandler, AZ

Bachelor's Degree in Business (Technology)

December 2020

Arizona State University, Mesa, AZ

ASU Learning Enterprise Cybersecurity Bootcamp

August 2021

(Certificate of Completion Badge)

- Secure, configure, and harden servers and systems.
- Perform common system administration tasks such as package installation, process management, identity and access control, and archiving and logging data
- Automate security tasks using Bash scripts
- Monitor and troubleshoot network traffic
- Perform packet analysis using tools like Wireshark
- Analyze network tracing using maps and graphical displays.
- Develop and implement firewall policies
- Generate traffic logs and alerts with Snort
- Perform network monitoring with Splunk
- Use the IR framework to investigate various alert incidents including a network attack, an application attack, and email attack
- Collect, preserve, analyze, and report forensic evidence.
- Perform penetration tests using tools such as NMap and Metasploit
- Enumerate and scan networks
- Manually identify and exploit vulnerabilities and construct payloads
