Miami FL • az.shog.dev@gmail.com • (773) 592-7376 • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Versatile software engineer with experience in full-stack development and automation testing, proficient in JavaScript, TypeScript, Python and Selenium. Committed to delivering scalable solutions and continuously advancing skills to stay aligned with industry trends. Seeking opportunities to apply expertise in growth-oriented environments.

PROFESSIONAL EXPERIENCE

QA Automation Engineer

Jun 2024–Present

SuperSQA.com

- Automated over **100 frontend** and **100 backend test cases** using **Selenium Webdriver**, **Python** and **Pytest**.
- Designed and maintained test suites, integrating them into **Jenkins** and **GitLab CI pipelines**
- Configured **JUnit** and **Allure** reports for test results and enhanced visibility.
- Created **smoke** and **regression test pipelines** for deployment processes, including non-destructive prod tests.
- Developed **API scripts** using **WooCommerce API** to automate data cleanup in the dev environment.
- Validated tests with **SQL (MySQL)** for backend verification.
- Dockerized the test framework and deployed locally for test development.
- Managed projects in Jira and documented test cases in Qase.io
- Deployed and maintained a **Jenkins server** on **DigitalOcean VPS** for scheduled test execution and cron-based maintenance jobs
- Migrated automation code from **GitHub** to **GitLab**, implementing pipelines to continuous integration.
- Developed a frontend application in **Next.js** for visualizing test reports

Permit agent - Software Developer

Feb 2019–Dec 2023

Imc Permits Inc

- Implemented a responsive full-stack website for the company and key clients, driving increased interest from additional companies and expanding our business network.
- Developed full-stack solutions for user authentication, email verification, and role-based routing, boosting client engagement and satisfaction by 50%.
- Ensured client satisfaction through exceptional and personalized service, enhancing client retention and growth.

EDUCATION

SuperSQA Automation Bootcamp

Jun 2023

Focused on Automation Testing with Python, Selenium Webdriver, Pytest, SQL, Jenkins, Docker and GitLab

Nucamp Bootcamp

Sep 2021

Specialized in Backend Development with Python, PostgreSQL, Docker and DevOps

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java
- **Frameworks & Libraries:** React, Redux, Next.js, Node.js, Express, HTML, CSS, Bootstrap
- **Databases:** MongoDB, SQL, PostgreSQL
- **Testing & Automation:** Selenium, Pytest, Jenkins, Docker, Jira, Qase.io, CI/CD

- **Tools:** GitHub, GitLab, Postman, Allure, JUnit, PyTest-html

PROJECTS

- **Automation Reports Dashboard** Developed a test reporting dashboard using **Next.js**, **Flask**, **Pytest**, and **Selenium** to track and visualize automated test results for an e-commerce **WordPress** site, improving testing efficiency and transparency.
- **Card Game** Developed a console-based card game in **Python**, implementing game logic, rules, and scoring systems.

CERTIFICATES

QA Automation Engineer Certification

Data Structures and Algorithms with Python

Foundational C# with Microsoft
