

Balaji Taluru

Software Engineer

✉ talurubalaji40@gmail.com ☎ +1 (401) 603-5165 📍 Riverside, RI 02915 🔗 LinkedIn

Summary

Experienced Software Engineer with 5+ years of experience in delivering high-performance, scalable web applications and microservices for industries such as healthcare, fintech, and technology.

- Adept in both frontend and backend technologies, with expertise in **React.js, Next.js, Angular, TypeScript, Node.js,** and **Express.js**. Strong background in cloud platforms, particularly **AWS** (EC2, Lambda, CloudWatch), and proficient in **CI/CD pipelines** using **GitHub Actions, Jenkins,** and **Docker**.
- Proven track record of optimizing performance, improving user engagement, and leading technical recruitment in **Agile environments** alongside being a **Certified AWS Developer**.
- **Key Achievements:**
 - Improved **Google Lighthouse performance scores to 90+** by implementing front-end optimization techniques at CVS Health.
 - Enhanced **deployment efficiency by 30% through CI/CD pipeline** integration using Jenkins and GitHub Actions.
 - Increased **user engagement by 20% via A/B testing** and personalized content delivery using Google Tag Manager.
 - Led a migration from **React 15 to React 18** and **Next.js**, improving application performance through advanced techniques (**code-splitting and lazy loading**).
 - **Spearheaded front-end architecture** for a high-traffic business banking platform, achieving scalable and reusable design components with **Material-UI** and **Styled-components**.

Skillset

Front-end Technologies: React.js, Next.js, Angular.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material-UI, Styled-components, Redux, Redux Toolkit, Context API, Storybook, Responsive Design, Mobile-First Design, Server-Side Rendering (SSR), Tailwind CSS, Webpack (code-splitting, lazy loading, tree-shaking)

Backend Technologies: Node.js, Express.js, NestJS, Loopback, RESTful APIs, PostgreSQL, MongoDB, Python (Django, Flask, FastAPI), Django REST Framework, SQLAlchemy, Celery, Gunicorn, uWSGI, WebSockets, Microservices architecture

Database Technologies: PostgreSQL, MongoDB, MySQL, SQLite

Testing Tools: Jest, Cypress, Mocha, React Testing Library, Pytest, unittest, End-to-End Testing, Unit Testing, Integration Testing

CI/CD & DevOps: GitHub Actions, Jenkins, Docker, Kubernetes, Azure DevOps, CI/CD Pipelines, Automation Strategies, Continuous Deployment, Git, Fabric, Ansible

Cloud Platforms & Infrastructure: AWS (EC2, S3, CloudWatch), Microsoft Azure (App Services, VMs, Blob Storage), Google Cloud Platform (GCP), Heroku, DigitalOcean

Performance Monitoring & Optimization: Google Lighthouse, Grafana, ELK Stack, AWS CloudWatch, SEO Optimization, Web Vitals, A/B Testing, Google Tag Manager, Python Profiling Tools (cProfile, memory_profiler)

Tools & Frameworks: Webpack, Babel, Lerna, Kafka, Zookeeper, Vault, Celery, Redis, Figma, Abstract, Visual Studio Code, PyCharm, BrowserStack, Django ORM, FastAPI, Django Channels (WebSockets)

Collaboration & Leadership: Cross-functional Team Collaboration, Code Reviews, Technical Recruitment, Mentorship, Architectural Guidance, Agile & Scrum, Pair Programming

Professional Experience

Senior Frontend Developer, CVS Health

Dec 2022 – present | Woonsocket, USA

- **Led the front-end architecture** and development of a Business Banking platform, leveraging **Next.js, React.js,** and **Server-Side Rendering (SSR)**, resulting in **reductions in load times** and ensuring scalability for high-traffic environments.
- **Architected reusable component libraries** using **Material-UI, Storybook,** and **Styled-components**, increasing development efficiency across multiple teams by standardizing front-end components.
- **Migrated legacy codebases** from **React 15 to React 18** and **Next.js**, improving app performance through **code-splitting, lazy loading,** and **tree-shaking**, while ensuring **cross-browser compatibility** and **mobile-first design**.
- Achieved **Google Lighthouse scores** of 90+ by optimizing assets with **code minification, lazy loading** of images and resources, and using **AWS CloudWatch** and **Grafana** for ongoing performance monitoring.
- Optimized **SEO** by implementing **SSR** and **server-side caching** strategies, improving search engine rankings and overall site traffic.
- Integrated **A/B testing** and **experimentation frameworks** using **Google Tag Manager**, leading to a **20% improvement in user engagement** through targeted experiments and personalized content delivery.
- Spearheaded **frontend performance monitoring** with **Grafana** and **ELK Stack**, identifying and resolving bottlenecks to reduce page load times and enhance **user experience** on both mobile and desktop platforms.

- **Enhanced CI/CD pipelines** through **GitHub Actions** and **Jenkins** integration, reducing deployment times by 30% and minimizing production issues, while collaborating closely with DevOps on automation strategies.
- Implemented **comprehensive testing strategies** with **Jest**, **Cypress**, and **React Testing Library**, ensuring high code coverage and bug-free releases through automated **unit**, **integration**, and **end-to-end tests**.
- Led technical recruitment efforts for the front-end team, conducting technical interviews, evaluating candidates on modern front-end frameworks, and ensuring team alignment with best practices.

Software Developer, VMware

Jun 2021 – Dec 2022 | Alexandria, USA

- **Led the development of responsive, high-performance UIs** using **Angular (v15+)**, **TypeScript**, and **CSS3**, ensuring that all web applications adhered to WCAG accessibility standards and aligned with the company's brand guidelines.
- **Built and maintained a reusable component library** using **Angular** and **Material-UI**, enabling consistent design patterns across multiple projects and improving developer efficiency through component reusability and shared design systems.
- **Collaborated closely with Solutions Architects** to translate business and functional requirements into technical solutions, driving the successful development of dynamic, **Angular-based web applications** with a focus on seamless back-end integration using **REST APIs** and **GraphQL**.
- **Optimized front-end performance** using techniques such as **lazy loading**, **code-splitting**, and **tree-shaking** in **Webpack**, improving load times and user experience across a range of devices and browsers while adhering to modern web standards.
- **Integrated CI/CD pipelines** using **Jenkins** and **GitHub Actions**, streamlining deployment processes and ensuring continuous integration and delivery for front-end changes, reducing deployment times and improving overall software quality.
- **Implemented cross-browser compatibility and mobile-first design principles** by leveraging **Tailwind CSS** and **Responsive Design** practices, delivering web applications optimized for both desktop and mobile users without compromising on performance or aesthetics.
- **Managed front-end version control** using **Git**, utilizing advanced workflows such as branching, merging, and rebasing to ensure smooth collaboration across distributed teams, while maintaining high code quality and resolving merge conflicts efficiently.
- **Troubleshooted and resolved performance bottlenecks** in Angular applications, using tools (**Google Lighthouse** and **Chrome DevTools**) to identify and optimize rendering times, memory usage, and network requests, resulting in a 25% improvement in page load speed.
- **Collaborated with back-end developers** to ensure seamless API integration, leveraging **WebSockets** and **RESTful services** to provide real-time data updates, and ensure robust communication between the UI and back-end systems.

Software Engineer, MoneyGram

Jan 2019 – May 2021 | Remote, USA

- **Developed and maintained high-performance microservices** using **Node.js** and **Express.js** to power product lifecycle management platform, enabling seamless integration with various internal and external APIs.
- **Led API development** efforts for Costing Solution, leveraging **RESTful API** standards to connect with **DynamoDB** and **AWS services (SQS and Lambda)**, ensuring efficient data flow between systems and providing real-time cost insights.
- **Implemented responsive front-end components** with **React.js** and **Next.js**, enhancing Internal product development tools with dynamic UI/UX, mobile-first design principles, and **Material-UI** for scalable, reusable components.
- **Deployed and managed microservices architecture** on **AWS** using **EC2**, **ECS Fargate**, and **Lambda (Serverless)**, with automated deployment pipelines configured via **Jenkins**, reducing deployment time by 30% through **CI/CD** practices.
- **Optimized data storage solutions** using **DynamoDB** and **MongoDB**, implementing advanced query strategies and optimizing data access patterns for performance, particularly in high-concurrency scenarios within costing platform.
- **Utilized AWS Cloudwatch and Splunk** for performance monitoring and troubleshooting, setting up **Grafana dashboards** and **real-time logging** to ensure system uptime, track microservice health, and proactively address performance bottlenecks.
- **Collaborated with cross-functional teams** to integrate **AWS SQS** for asynchronous processing and task management within product innovation platform, improving system scalability and reducing latency during peak load times.
- **Architected scalable backend services** utilizing **Node.js** and **AWS Lambda** for serverless functions, handling large-scale data processing tasks, with integration of **Aurora MySQL** for reliable relational database support within product development ecosystem.

Education

Bachelor of Engineering in Computer Science, Anna University

2010 – 2014 | Chennai, India

Certificates

AWS Associate Developer
