EXPERIENCE

Principal Consultant

Aether Intelligence

12/2023 - 09/2024 New York, NY, USA

- Oversaw and delivered high-impact consulting services, focusing on cybersecurity, machine learning, data analysis, cloud computing, and blockchain technologies
- Led the design and implementation of data intelligence solutions tailored to client needs across multiple industries
- Conducted cybersecurity risk assessments to mitigate potential threats, ensuring compliance with industry regulation
- Architected cloud migration strategies, improving operational efficiency for enterprise clients by 30%
- Collaborated with cross-functional teams to develop predictive machine learning models that enhance decision-making processes
- Provided enterprise architecture consulting, streamlining IT infrastructures and reducing operational costs
- Skills: Cybersecurity, Machine Learning, Data Analysis, Cloud Computing, Blockchain Technologies, Predictive Analytics, Enterprise Architecture, IT Infrastructure, Python, AWS, Docker

Principal Blockchain Software Engineer

Stibits, inc

01/2020 - 12/2022 New York, NY, USA

- Built a technical team
- Led the development of software that allowed the company to take off the company
- Directly and centrally contributed to most major technical systems, both server and client
- Spent much time architecting and coding high-value and high-technical-risk systems
- Provided operational value to the business and informed executive decisions with deep technical knowledge

Project Lead Developer

Zaytech Marketing & Software

04/2018 - 04/2021 Sacramento, CA, USA

- Provided technical and strategic insight gathering and analyzing industry data relevant to future business opportunities
- Managed the development team in delivering client specific applications
- Handled complex development cycles from ideation to deployment.

Chief Technology Officer

Help.com

03/2020 - 10/2020 Austin, TX, USA

- I was responsible for guiding the technical direction of the company during a pivotal time of growth
- Led a small engineering team and was instrumental in the successful deployment of a new customer service platform
- Leading a team of developers to deliver a scalable SaaS platform within tight deadlines
- Collaborating with product management to translate business requirements into robust, scalable solutions
- Skills: SaaS, Team Leadership, Agile, Python, JavaScript, AWS, Microservices

Senior Blockchain Software Engineer

TZERO Group

07/2019 - 09/2019 Salt Lake City, UT, USA

- Integrating Ravencoin into SPV (Simple Payment Verification), iOS, and Android wallets
- Developing scalable wallet solutions and contributing to the core functionality and user experience across mobile platforms
- Skills: Blockchain, Wallet Development, iOS, Android, Kotlin, Java, Swift, Cryptography

Senior Blockchain Engineer

Medici Ventures

08/2018 - 09/2019 Ravencoin

- Design and develop mobile iOS and Android wallet apps for sending, receiving and buying Crypto
- Published iOS and Android apps that allow consumers to purchase and activate mobile tickets for use on mass transit such as trains and buses
- Created software libraries quickly and publish new apps upon client request
- Delivered ad hoc ticket scanning solutions for transit fare inspectors to reliably scan mobile tickets
- Skills: Java, Swift, Android SDK, Kotlin, NDK, GCP, Webpack, JSON Web Token(JWT), KYC Verification, Docker, Jira, Spring Framework, PostgreSQL, SQLite, Bitcoin Scripting, Objective C, C, C++, JNI

EXPERIENCE

Mobile Software Engineer

Merchantech inc

01/2014 - 04/2018 Sacramento, CA, USA

- As a hands-on lead engineer (Kotlin/Java and Swift), I've helped clients like First Data, Clover and world famous art institutions build and ship visually rich & distinctive Android and iOS apps, from initial prototypes to app launch and maintenance
- Developed multiple projects in an embedded C development environment
- Lead a project team of 10 engineers in a transition to a new facility
- Gained experience with the software development life cycle in various areas of software: testing, application development, and embedded development
- Skills: Node.js, Express.js, Redux, Ktor, JetBrains Exposed, React Webpack, Vite, Kubernetes, JSON Web Token (JWT) KYC Verification Stripe (Software), Docker, Jira, Spring Framework, PostgreSQL, JavaScript

Junior Dev Engineer

Scalian Alyotech

02/2013 - 05/2014 Remote

- Worked on a project as a team player for a prominent aerospace client
- Developed a software system capable of simulating and analyzing flight data to enhance the client's aircraft design process
- Improved skills in C++ and Python programming languages through developing, testing, and debugging
- Gained experience in SQL Management, Version Control and CI/CD

IOS Developer

Mobiblanc

12/2011 - 02/2013 Casablanca, Morocco

- MAP Mobile, IAM(Fidelio, MTinfos, MTpro, LaGold), RMA, Lydec, GDF SUEZ, AutoHal
- Skills: ios, cocoa, SalLite, xml, json ,MapKit, ASI, HTTPRequest, Flury, interface builder, Git

EDUCATION

Master's, Computer Science

University of Utah

- Theoretical Computer Science, Scientific Computing, Artificial Intelligence, Databases, Operating
- Programming Languages; Graphics, Computer Networks, Software Architecture, Digital Design
