EDUCATION

Bachelor of Engineering (B.Tech.) in Electronics & Telecommunication (Jul'99-Jun'03) from BPUT, Odisha, India

WORK EXPERIENCE

Collector of Revenue, City of St. Louis, Missouri

Oct'22-Jan'25

Business Analyst, Sr. Associate, Integrated Tax System

Responsibilities:

- Lead requirement/discovery sessions with the tax agents/administrators and documented the requirements through epics and stories in JIRA with clear acceptance criteria.
- Worked on implementing the SaaS based low code/no code revX product to replace the client's Mainframe system.
- Collaborated with the product development team/configuration team to configure the product as per the client's requirements. This included configuration of different workflows, entity/revenue accounting, payment channels, tax return processing, collection case management, correspondences, online taxpayer services capabilities, taxpayer registration, billing across multiple business and individual tax types.
- Developed and conducted comprehensive test plans and test cases using Zephyr, executed manual and automation testing using tools like Katalon.
- Identified critical bugs and reported the defects using JIRA.
- Created mockups and conducted design review sessions with St. Louis Tax Administrators to get approval on the designs of the notices and their data elements for accurate data mapping.
- Created clearly defined training material and job aid for revX functionalities and conducted hands-on working sessions with the client during UAT and Model office phase.
- Executed SQL queries for data analysis and reporting the system performance to the higher management.
- Followed Agile methodology in accomplishing the tasks.
- Worked with the UX/UI teams to resolve the design related defects in the newly configured revX product.

Abbvie, Chicago, Illinois

Oct'21-Oct'22

SalesForce Business Analyst, Patient Assistance Program

Responsibilities:

- Gathered requirements by conducting meeting, brainstorming and JAD sessions with end users and SME and documented them using JIRA and process flow diagrams.
- Implemented Salesforce Health Cloud including Field Service Lightning, Service Cloud for the Patient Assistance Program.
- Performed Gap Analysis of the existing processes to identify and validate the requirements.

- Assisted in designing and deploying workflows, validation rules, approval process and auto-response rule for automating business logic with health cloud on Salesforce.com.
- Implemented the Patient Relationship Management module consisting of the patient's journey from application intake, application processing, Rx processing to Order scheduling.
- Organized requirements into high level Use Case and low-level Use Case Specifications and modeled them into UC, Activity and Sequence Diagrams using MS Visio.
- Served as a point of contact for the client's stakeholders and provided customer support in addition to team building with onshore and offshore agile teams.
- Conducted review of Development Team design level validation deliverables using pharmaceutical GxP standards.
- Worked on different integrations using APIs like email/text message integration with Twilio, IVR integration with Five9, integration with Complete Pro (Physician's office) and ScriptMed for order scheduling.
- Logged all defects with adequate information and collaborated with the QA team in resolving the defects.

Commercial Tax Department, State of Odisha, India

Mar'17- Jun'21

Business Analyst

Responsibilities:

- Led the business team from Govt. of Odisha/India in gathering the policy requirements for GST implementation, the largest universal taxation framework globally, and engaging with the System Integrator amidst an extremely dynamic policy environment till stabilization.
- Analyzed and documented the requirements for the application development that included the migration from state-level VAT (Value Added Tax) system to a universal GST (Goods & Services Tax) that had to accommodate the revenue distribution between federal and state governments in a complex structure.
- Attended various seminars and workshops with 29 States and the PWC consultants to understand and document the policy changes and the requirements for the GST application.
- Presented data and analysis to internal project teams and translated technical concepts to non-technical audiences.
- Developed and documented test plans and test cases. Executed quality assurance, system integration, functional and end to end testing; coordinated and facilitated user acceptance testing with the end users.
- Conducted workshops and imparted training to the taxpayers and the departmental users.
- Worked on the legacy .Net based VAT Application System (VATIS) and the Taxpayer portal and seamless integration between the two systems in collaboration with various cross-functional teams.

Directorate of Treasuries & Inspection, State of Odisha, India

Oct'10-Mar'17

Program Manager

Responsibilities:

- As a key business user, managed the Integrated Financial Management System (IFMS), the Treasury Information System (an ERP system) across 166 Treasury Offices in the entire state and 1 Cyber Treasury Office at the headquarter.
- Ensured zero unscheduled downtime of the system, implemented highest level of security and authentication, access based data exchange with external systems, user management with access and privileges.
- Liaised with the Reserve Bank of India and other State/National banks for payment related issues, audits and reconciliation.
- Constantly engaged on an everyday basis with the software and hardware vendors for adherence to SLAs (Service Level Agreements), implementation and testing of additional features, upgrades to the existing system based on policy and framework changes.
- Developed status reports, cost estimates, resource plans and ensured all deliverables are met on time.
- Worked on floating RFPs and bidding process for procuring IT equipments for the department and treasury offices throughout the state.
