LinkedIn: www.linkedin.com/in/bhagyasri-ravva-24b91a218

PROFESSIONAL SUMMARY:

- I am a highly skilled SAP Fiori/UI5/BTP/ABAP developer with 6+ years of experience in designing, developing, and deploying custom Fiori applications using SAPUI5, OData services, SAP BTP, SAP BAS, and the Fiori Launchpad with a strong understanding of Agile methodologies.
- A highly skilled SAP BTP Consultant in designing, developing, and deploying end-to-end (E2E) solutions on SAP Business Technology Platform (BTP), leveraging SAP Cloud Application Programming (CAP) Model and SAP S/4HANA integration.
- Experienced SAP Fiori Consultant with expertise in enhancing and customizing SAP applications to meet dynamic business needs.
- Familiar with SAP ABAP and SAP S/4HANA concepts. I am skilled in developing, deploying, and optimizing scalable SAP Fiori applications while delivering seamless user experiences.
- Expertise in SAP CAPM development using Node.js and Java, following best practices.
- Proven ability to deploy SAP Fiori applications from Web IDE to the SAP Fiori Launchpad efficiently and effectively. Successfully managed cross-app navigation to improve workflow continuity.
- Hands-on experience with standard and custom SAP Fiori apps, including activation, configuration, and deployment on the SAP Fiori Launchpad.
- Strong ability to collaborate across cross-functional teams, troubleshoot complex issues, and deliver high-quality solutions. Passionate about leveraging advanced SAP technologies to streamline processes, enhance operational efficiency, and drive business success.
- Extensive experience in SAP Fiori application development, including designing and enhancing applications using SAP Web IDE and Visual Studio Code to meet business-specific requirements.
- Proven ability to work closely with business stakeholders to translate requirements into user-friendly and efficient Fiori applications across various SAP modules.
- Architecture Knowledge on SAPUI5 FRAMEWORK.
- Mapping of frontend UI with Entity/entity set of OData service.
- Collaborated with functional consultants to gather requirements, design application architecture, and ensure alignment with business needs.
- Developed and implemented custom Fiori applications for different modules utilizing MVC frameworks on SAP Web IDE and consumed the data via OData services.
- Expertise in SAPUI5, enabling the development of responsive, intuitive, and scalable user interfaces for enterprise solutions.
- Strong command of SAP Gateway and OData services for backend integration, facilitating robust and efficient communication between SAP systems.
- Used SAP NetWeaver to integrate SAP Fiori applications with backend SAP systems, ensuring seamless connectivity and data exchange between SAP ECC and SAP Fiori.
- Expertise in integrating Gateway OData/JSON services with UI5 apps.
- Developed OData services using CDS views, BOPF, and SEGW for seamless Fiori integration.
- Expertise SAP Fiori Launchpad Configuration and Deployment of apps.
- Configuration of Fiori Launchpad with catalogs, tiles, and groups.
- Strong background in integrating SAP Fiori applications with SAP S/4HANA or SAP ECC backend systems, ensuring seamless data exchange and process automation.
- Experience in development with SAP BTP and SAP BAS using CAP Model and delivered user friendly SAP Fiori applications as per the business requirements.
- Ability to work with SAP HANA Cloud Platform and integrate applications into the cloud environment.
- Proven ability to create role-based, user-friendly applications using Fiori Elements, ensuring quick deployment and consistent user experience.
- Strong understanding of ABAP 7.5x syntax and clean core principles.

- Basic knowledge in managing data integration and workflow automation with SAP MII and SQL, enhancing backend operations for improved performance.
- Adept at performing comprehensive unit testing, and user acceptance testing (UAT) to ensure error-free deployment of applications.
- Experienced in configuring and deploying SAP Fiori applications, including managing catalogs, groups, and tiles for optimal user accessibility.
- Managed application lifecycle through version control and deployment processes.
- Demonstrated expertise in cross-application navigation to enhance user journeys and task completion efficiency.
- Proficient in debugging and resolving application issues, ensuring minimal disruption to business operations.
- Collaborative and effective team player with the ability to meet tight deadlines and adapt to shifting project priorities.
- Committed to continuous learning and applying industry best practices to deliver innovative solutions that align with organizational objectives.
- Successfully delivered the assigned tasks/project within project timelines, improving user experience and streamlining business processes.
- Optimized application performance by analyzing and resolving performance bottlenecks.
- Provided technical expertise in troubleshooting and resolving Fiori application issues.
- Prepared the technical specification documents for every development and the bug fixed in all the projects.
- Worked on SAP UI5 projects following Agile methodology, participating in sprint planning, daily stand-ups, and retrospectives to ensure seamless project execution.
- Collaborated closely with cross-functional teams to deliver incremental features in bi-weekly sprints, adhering to project timelines and quality standards.
- Actively contributed to backlog refinement, story point estimation, and iterative development cycles for SAP UI5 applications.
- Experience in DevOps practices, ensuring smooth deployment, continuous integration, and continuous delivery in SAP BTP environments.
- Ensured continuous delivery by integrating testing, debugging, and deployment processes within the Agile framework.
- Experience in working in Agile development environments, leveraging Git, SAP Web IDE, and Visual Studio Code for collaborative and efficient development.
- Effectively communicated technical issues and solutions to non-technical stakeholders, ensuring smooth project execution and alignment with business objectives.
- Prioritized tasks in line with business needs, ensuring that urgent bug fixes or performance issues were addressed quickly in a fast-paced development environment.
- Hands-on experience in developing role-based workspaces using SAP Work Zone for seamless business user access.
- Proficient in the SAP BTP cloud deployment process, including CI/CD pipelines for automated deployments using SAP tools like Cloud Foundry and MTA.
- Designed and implemented OData services using SAP Gateway, CDS Views, and SAP CAPM to expose business data securely for SAP Fiori applications.
- Hands-on experience with creating SQL tables and writing SQL views, stored procedures.
- Developed and integrated SAP Fiori applications with backend services using OData (V2/V4) and RESTful APIs to enable seamless data exchange between UI and SAP S/4HANA.
- Consumed and tested OData and RESTful APIs in SAP Fiori/UI5 applications using SAP Business Application Studio (BAS) and Web IDE for efficient data binding.
- Handled CRUD operations in SAP Fiori apps using Function Modules to read, update, and process business transactions.

TECHNICAL SKILLS:

Languages	SAPUI5, SAP Fiori, HTML5, CSS3, JavaScript, SAP ABAP, SAP S/4HANA, Node.js
Databases	SAP HANA Cloud, SQL, SQL Server
Platforms and Frameworks	SAP Gateway, SAP Fiori Launchpad, SAP Fiori Elements, OData Services, SAP BTP, SAP BAS, Cloud Foundry
Development Tools & IDEs	SAP Web IDE, Visual Studio Code, SQL Server Management Studio, SAP MII, Eclipse

DevOps & CI/CD	Git, DevOps Practices, CI/CD Pipelines for SAP BTP, Transport Requests (TRs)
Authentication & Security	SAP Cloud Connector, SAP Identity Authentication Service (IAS), Identity Provisioning Service (IPS), XSUAA (Authorization & Trust Management), OAuth 2.0, SAML 2.0
Development Methodologies	Agile Methodology (Scrum, Sprint Planning, Stand-ups, Backlog Refinement)
Testing	Qunit, OPA5, Unit Testing, User Acceptance Testing (UAT), Debugging & Performance Optimization

PROFESSIONAL EXPERIENCE:

Client: ABM, Texas, USA	May 2024 – Present
Role: SAP Fiori Consultant	

Project Description:

Experienced in developing end-to-end solutions on SAP BTP using the SAP CAP Model, including creating custom Fiori applications, enhancing standard Fiori apps, and deploying them in Cloud Foundry runtime. Skilled in Business Application Studio, Fiori Elements, and List Report development for seamless data management and reporting. Proficient in debugging, resolving defects, and integrating Fiori apps with backend systems. Successfully collaborated with cross-functional teams to gather requirements, implement user-friendly interfaces, and optimize applications for performance and scalability, ensuring compliance with audit and regulatory standards.

Responsibilities:

- Responsible for developing E2E solutions on SAP BTP using the SAP CAP Model. and integrating with SAP S/4HANA.
- Portal for regulatory process management, quality information, and safety data information of raw materials and finished goods. The system ensures that all actions, changes, and approvals are traceable and stored securely, adhering to audit and compliance standards.
- Experience in SAP Business Technology Platform (BTP).
- Developed backend services using SAP Cloud Application Programming Model (CAPM) with Java for building scalable and modular applications.
- Utilized OData Services to expose business logic from SAP S/4HANA to SAP Fiori frontend applications.
- Experience with MTA(Multi-Target Applications) for deploying cloud-native applications.
- Experience in Business Application Studio and Cloud Foundry based Development and Deploy.
- Experience in Developing Reports using SAP Fiori Element List Report.
- Development experience with Fiori Elements and Fiori Overview Pages.
- Experience in developing Custom Fiori Applications in SAP Business Application Studio (BAS) and deploying them in Cloud Foundry runtime.
- Developed various types of Fiori Apps. Ensured that each application followed SAP Fiori design principles and best practices.
- Applied custom format functions to dynamically format data before displaying it in UI elements. Enhanced user experience by presenting data in a more readable and structured manner.
- Used UI5 fragments to create reusable UI components, improving development efficiency and maintainability. Integrated fragments across different views to maintain consistency in application design.
- Implemented XSUAA authorization and roles for secure access control.
- Create a Project maintenance application for Project Managers to create tasks and manage resources in the project.
- Created a list report app using Fiori elements and CAP, enabling users to add information admin related information which is then used as input in the regulatory management app.
- Integrated SAP Fiori Applications with SAP S/4HANA backend systems, ensuring seamless data exchange between frontend applications and core SAP processes.
- Experienced in leveraging SAP BTP tools such as SAP Web IDE, Business Application Studio (BAS), and SAP Launchpad to streamline development processes.
- Actively resolved issues in existing Fiori applications by debugging and addressing defects in alignment with business requirements to ensure seamless application performance.
- Enhanced and customized standard SAP Fiori applications to align with specific business requirements. Implemented

user feedback and optimized performance for better usability and efficiency.

- Worked on integrating SAP Fiori applications with backend systems, ensuring seamless data flow and interaction between the frontend and backend.
- Collaborated with cross-functional business teams (MM, IM, PM, FI/CO, PS, CVI) to gather requirements, assess feasibility, and translate them into technical solutions that enhanced SAP application functionality.
- Designed and developed complex data models using Core Data Services (CDS) for data modeling on SAP HANA databases and optimizing with CQLs.
- Optimized OData queries with \$expand, \$filter, \$select, and batch processing to improve performance in Fiori applications.
- Handled CRUD (Create, Read, Update, Delete) operations efficiently using OData services to ensure real-time data updates in SAP UI5 applications.
- Designed and implemented user-friendly interfaces and added new features to existing SAP Fiori apps to meet evolving business needs, ensuring scalability and improved user experience.
- Deployed Fiori applications from Web IDE to the SAP Fiori Launchpad, ensuring proper configuration and usability for end users.
- Developed no-code/low-code applications using SAP Build Apps to streamline business processes.
- Designed and configured UI components using drag-and-drop functionality to create responsive Fiori-like applications.
- Integrated SAP Build Apps with SAP BTP services such as SAP HANA Cloud, SAP CAPM, and SAP S/4HANA.
- Connected SAP Build Apps with OData and REST APIs for seamless backend integration.
- Developed and maintained ABAP CDS Views and AMDP (ABAP Managed Database Procedures) for efficient data processing in SAP HANA environments.
- Developed OData services and integrated REST APIs using JSON for seamless communication between SAP and third-party systems.
- Ensured scalability and security by configuring authentication and role-based access controls in SAP Build Apps.
- Configured and managed SAP Cloud Connector for secure hybrid cloud integration between SAP BTP and on-premise systems.
- Integrated SAP Identity Authentication Service (IAS) and Identity Provisioning Service (IPS) for centralized user authentication and role management.
- Developed Fiori apps for Quotation Order, Purchase Order, Sales Order, Goods Receipt, and Invoice Verification using CDS Views, OData, and RAP.
- Experience in working on BAPIs, IDocs and RFCs for standard and custom SAP Fiori/UI5 applications based on the business requirements.

Environment: SAPUI5, SAP FIORI, SAP Web IDE, HTML, CSS, JavaScript, Git, SAP Fiori Launchpad, SAP Fiori Elements, SAP BTP, SAP BAS, SAP S/4HANA, SAP Gateway, OData Services, Eclipse

Client: Kronos Digital Solutions India, Bangalore, India

Feb 2023 – Aug 2023

Role: Consultant – SAP Development Operations

Project Description: As a consultant, in this project I actively supported and enhanced SAP Fiori applications to meet dynamic business needs. I designed and implemented SQL views, stored procedures, and triggers to optimize backend operations, supporting SAPUI5 applications with improved data manipulation and performance. Comprehensive unit tests and OPA tests were developed and executed as per SAPUI5 guidelines to ensure high-quality, reliable applications.

Responsibilities:

- Actively resolved issues in existing Fiori applications by debugging and addressing defects in alignment with business requirements to ensure seamless application performance.
- Created and managed Manufacturing Integration and Intelligence (MII) transactions for introducing new features or fixing detected defects, enabling efficient data exchange and streamlined workflow processes in SAP Fiori applications.
- Created and managed Manufacturing Integration and Intelligence (MII) transactions for introducing new features or fixing detected defects, enabling efficient data exchange and streamlined workflow processes in SAP Fiori applications.
- Designed and implemented SQL views, stored procedures, and triggers to support SAPUI5 applications, optimizing database interactions and enhancing data manipulation and aggregation for backend operations.
- Incorporated database objects such as stored procedures and views into SAP MII transactions to facilitate real-time data processing and improve application responsiveness.

- Analyzed and optimized SQL queries and backend processes to improve the overall performance of SAP applications.
- Developed and executed comprehensive unit tests to validate the functionality of individual components in SAPUI5 applications, ensuring robust and error-free performance.
- Followed SAPUI5 guidelines to create and perform One Page Acceptance (OPA) tests, validating end-to-end functionality and ensuring the applications adhered to user expectations.
- Collaborated with cross-functional business teams to gather requirements, assess feasibility, and translate them into technical solutions that enhanced SAP application functionality.
- Designed and implemented user-friendly interfaces and added new features to existing SAP Fiori apps to meet evolving business needs, ensuring scalability and improved user experience.
- Deployed Fiori applications from Web IDE to the SAP Fiori Launchpad, ensuring proper configuration and usability for end users.
- Actively addressed FUT and UAT defects, working closely with QA and business teams to ensure timely issue resolution and application readiness for production.
- Optimized OData queries with \$expand, \$filter, \$select, and batch processing to improve performance in Fiori applications.
- Handled CRUD (Create, Read, Update, Delete) operations efficiently using OData services to ensure real-time data updates in SAP UI5 applications.
- Used SAP NetWeaver to integrate SAP Fiori applications with backend SAP systems, ensuring seamless connectivity and data exchange between SAP ECC or SAP S/4HANA and SAP Fiori.
- Partnered with business stakeholders to design intuitive interfaces and integrate functionality that met strategic objectives while ensuring alignment with best practices.
- Experience in DevOps practices, ensuring smooth deployment, continuous integration, and continuous delivery in SAP environment.
- Experience in Cloud Foundry DB Security concepts (Roles, Privileges, Data Access).
- Knowledge of ABAP OOPS concepts to integrate SAP Fiori applications based on business requirements.
- Developed Fiori apps for Quotation Order, Purchase Order tracking, Goods Receipt, Quality Analysis, Filter Consitions using graph and Invoice Verification using CDS Views, OData, and RAP.
- Developed OData services and integrated REST APIs using JSON for seamless communication between SAP and third-party systems.

Environment: SAPUI5, SAP FIORI, HTML, CSS, JavaScript, SAPMII, SQL, SAP Fiori Launchpad, Visual Studio Code, SAP Gateway, OData Services, SQL Server Management Studio

Client: Accenture, Hyderabad, India

Dec 2021 – Feb 2023

Role: Application Development Analyst – SAP Fiori Consultant

Project Description: In this project, I customized and enhanced standard SAP Fiori applications to meet business requirements, optimizing performance and incorporating user feedback. I developed custom Fiori apps using Fiori Elements for efficient, role-based, and responsive applications. Key achievements include implementing Excel data export functionality, enabling cross-application navigation in SAP UI5, and resolving FUT and UAT defects in collaboration with business and quality teams. Additionally, I managed the deployment of custom apps to the SAP Fiori Launchpad, ensuring smooth user access and conducting thorough unit testing for error-free functionality.

Responsibilities:

- Enhanced and customized standard SAP Fiori applications to align with specific business requirements. Implemented user feedback and optimized performance for better usability and efficiency.
- Designed and developed custom SAP Fiori applications using Fiori Elements, leveraging metadata-driven templates to accelerate deployment and provide an intuitive user experience.
- Implemented functionality for seamless data export from Fiori Elements applications to Excel, enabling efficient reporting and data analysis for end users.
- Developed and managed cross-application navigation in SAP UI5, ensuring a smooth and consistent user journey across related Fiori applications, reducing task completion times and enhancing usability.
- Proactively resolved Functional Unit Testing (FUT) and User Acceptance Testing (UAT) defects by collaborating with business users and quality assurance teams, ensuring functional and quality requirements were met.

- Developed OData services and integrated REST APIs using JSON for seamless communication between SAP and third-party systems.
- Managed the end-to-end deployment process of custom Fiori applications from SAP Web IDE to the SAP Fiori Launchpad. Created transport requests (TRs) and configured catalogs, groups, and tiles for seamless user access.
- Conducted thorough unit testing of Fiori applications, debugging issues, preparing detailed test cases, and ensuring compliance with SAP's best practices. Delivered bug-free applications to functional teams for further testing.
- Analyzed and optimized the performance of Fiori applications by addressing bottlenecks, enhancing database interactions, and improving app responsiveness.
- Worked on integrating SAP Fiori applications with backend systems, ensuring seamless data flow and interaction between the frontend and backend.
- Incorporated user feedback to refine applications, making them more intuitive, responsive, and aligned with business requirements.
- Focused on creating role-based, responsive, and reusable Fiori applications that catered to different business functions and user roles.
- Ensured the accurate creation and movement of transport requests (TRs) for deploying changes across different environments, maintaining application consistency.
- Configured SAP Fiori Launchpad by setting up catalogs, groups, and tiles, ensuring a structured and user-friendly app landscape.
- Worked closely with business and functional teams to understand requirements, prioritize changes, and deliver solutions that met organizational goals.
- Followed SAP's best practices throughout the development, testing, and deployment lifecycle, ensuring the delivery of high-quality, maintainable solutions.
- Developed and deployed App Router to manage requests, handle security configurations, and route traffic to the correct services in SAP Fiori applications.
- Exposure to new technologies like SAP BTP and SAP BAS for SAP Fiori application development.
- Developed backend services using SAP Cloud Application Programming Model (CAPM) with Java for building scalable and modular applications.
- Experience in DevOps practices, ensuring smooth deployment, continuous integration, and continuous delivery in SAP BTP environments.
- Optimized OData queries with \$expand, \$filter, \$select, and batch processing to improve performance in Fiori applications.
- Handled CRUD (Create, Read, Update, Delete) operations efficiently using OData services to ensure real-time data updates in SAP UI5 applications.
- Knowledge of ABAP OOPS concepts to integrate SAP Fiori applications based on business requirements.
- Developed Fiori apps for Quotation Order, Purchase Order tracking, Goods Receipt, and Invoice Verification using CDS Views, OData, and RAP.
- Used SAP NetWeaver to integrate SAP Fiori applications with backend SAP systems, ensuring seamless connectivity and data exchange between SAP ECC or SAP S/4HANA and SAP Fiori.
- Provided support for SAP Fiori application issues in the SAP BTP environment, utilizing the CAP model for troubleshooting and enhancements.
- Strong understanding of Identity Management, SAML, OAuth, and SAP Cloud security.
- Worked on activating the OData services for standard SAP Fiori applications using TCode SICF and assigned roles for the groups and catalogs.
- Developed and maintained ABAP CDS Views and AMDP (ABAP Managed Database Procedures) for efficient data processing in SAP HANA environments.
- Led the end-to-end design and development of RICEF objects in S/4HANA landscapes, ensuring high performance and maintainability.
- Experience in working on BAPIs, IDocs and RFCs for SAP Fiori/UI5 applications based on the business requirements.
- Extensively worked on ABAP OO, WebDynpro, Smartforms, User Exits, BADI, and Enhancement Framework for extending standard SAP processes and also used them in some of the SAP Fiori apps as per the business requirements.

Environment: SAPUI5, SAP FIORI, SAP Web IDE, HTML, CSS, JavaScript, Git, SAP Fiori Launchpad, SAP Fiori Elements, SAP Gateway, OData Services, SAP BTP, SAP BAS, Eclipse

Project Description: In this project, I activated and configured standard SAP Fiori applications, ensuring proper role assignments and service activation via SAP Gateway. I customized catalogs, groups, and tiles within the Fiori Launchpad to improve user access and experience. I extended standard app functionality to meet business requirements and provided continuous support for issues and enhancements. Additionally, I worked with cross-functional teams to deploy applications and optimize performance.

Responsibilities:

- Successfully activated and configured multiple standard SAP Fiori applications, ensuring proper role assignment, service activation through SAP Gateway, and end-to-end functionality.
- Validated applications on the SAP Fiori Launchpad to ensure optimal performance, proper UI consistency, and alignment with user requirements.
- Designed and configured custom catalogs, groups, and tiles in the SAP Fiori Launchpad, organizing content based on user roles for streamlined access and enhanced user experience.
- Analyzed and extended the functionality of standard SAP Fiori applications to accommodate custom business requirements and improve usability.
- Provided continuous support for resolving issues in standard Fiori applications, collaborating with cross-functional teams to troubleshoot and deploy fixes efficiently.
- Activated OData services in the SAP Gateway, ensuring smooth communication between the backend systems and Fiori applications.
- Optimized OData queries with \$expand, \$filter, \$select, and batch processing to improve performance in Fiori applications.
- Collaborated with cross-functional teams during deployment to ensure proper integration, testing, and performance of Fiori applications.
- Conducted rigorous testing and validation of activated and configured applications to maintain quality and functionality standards.
- Debugged and resolved technical and functional issues in Fiori apps, coordinating with stakeholders to address defects and align applications with business expectations.
- Monitored and optimized the performance of Fiori applications, addressing any bottlenecks to ensure seamless user interaction.
- Defined and managed user roles and permissions to ensure secure and appropriate access to applications within the Fiori Launchpad.
- Actively identified opportunities to improve existing configurations, ensuring that applications met evolving business demands effectively.
- Experience in SAP ABAP and SAP S/4 HANA development for SAP Fiori applications.
- Worked on SAP Upgrade and Migration projects, ensuring compatibility and efficiency improvements.
- Identified BAPIs and IDocs for the standard SAP Fiori applications.
- Used SAP NetWeaver to integrate SAP Fiori applications with backend SAP systems, ensuring seamless connectivity and data exchange between SAP ECC and SAP Fiori.
- Experience in Adobe Forms, SmartForms, SAPScripts, Data Dictionary, and ALV Reporting.
- Knowledge of ABAP OOPS concepts to integrate SAP Fiori applications based on business requirements.
- Exposure to latest technologies like SAP BTP and SAP BAS for Fiori development and supported in CAP project for Fiori development and deployed it in Cloud Foundry environment.
- Experienced in understanding the functional requirements clearly and developing the reliable Fiori applications.
- Experience in ABAP Proxies (Inbound and Outbound) for seamless SAP connectivity.
- Worked on activating the OData services for standard SAP Fiori applications using TCode SICF and assigned roles for the groups and catalogs.
- Developed and maintained ABAP CDS Views and AMDP (ABAP Managed Database Procedures) for efficient data processing in SAP HANA environments.
- Led the end-to-end design and development of RICEF objects in S/4HANA landscapes, ensuring high performance and

maintainability by identifying and testing the BAPIs and IDocs for Data Migration Objects to activate the standard SAP Fiori applications as a part of S/4 HANA Greenfield Implementation project.

- Experience in working on BAPIs, IDocs and RFCs for SAP Fiori/UI5 applications based on the business requirements.

Environment: SAPUI5, SAP FIORI, SAP Web IDE, HTML, CSS, JavaScript, Git, SAP Fiori Launchpad, SAP Gateway, OData Services, SAP BTP, SAP BAS, SAP ABAP, Eclipse

Client: NTT Data, Hyderabad, India

May 2018 – Sep 2019

Role: SAP Fiori Developer

Project Description:

As SAP Fiori developer, I develop and customize Fiori applications using SAPUI5 and JavaScript to create user-friendly interfaces. I have configured Fiori catalogs, groups, and tiles in the Launchpad while enhancing and debugging existing applications to meet business needs. I work on integrating OData services, implementing UI modifications, and optimizing performance for a smooth user experience. Collaborating with backend developers, I ensure seamless data binding and cross-app navigation. I have followed SAP UI5 coding standards, conducted unit testing, maintained documentation, and supported app deployment across system landscapes.

Responsibilities:

- Develop and customize SAP Fiori applications using SAPUI5 and JavaScript.
- Create and configure Fiori catalogs, groups, and tiles in the Fiori Launchpad. Ensure proper role-based access and user authorization for smooth application usage.
- Work on standard SAP Fiori app enhancements by modifying and extending existing SAP Fiori applications by adding new functionalities or UI improvements. based on business requirements.
- Debugged and resolved technical and functional issues in Fiori apps, coordinating with stakeholders to address defects and align applications with business expectations.
- Implement UI modifications using XML views, controllers, and formatter functions.
- Integrate SAP Fiori apps with OData services for seamless data retrieval. Handle CRUD (Create, Read, Update, Delete) operations while ensuring proper error handling.
- Conduct thorough testing of Fiori applications to identify and resolve issues before deployment.
- Collaborate with backend developers to ensure proper data binding and service integration. Ensure smooth data flow between the UI and backend, resolving any inconsistencies.
- Work on cross-app navigation and routing between different Fiori applications.
- Develop and use fragments to reuse UI components across applications.
- Optimize application performance and improve user experience.
- Followed SAP UI5 coding guidelines and best practices.
- Maintain proper documentation of development and enhancements.
- Assist in deploying and transporting SAP Fiori applications from development to quality and production environments.
- Work closely with functional teams to understand and implement business requirements.

Environment: SAPUI5, SAP FIORI, SAP Web IDE, HTML, CSS, JavaScript, Git, SAP Fiori Launchpad, SAP Gateway, OData Services

EDUCATION:

Master's in Computer Science

3.94/4.0 CGPA

Rowan University, New Jersey, United States

Bachelor's in Electrical and Electronics Engineering

9.22/10.0 CGPA

Chaitanya Bharathi Institute of Technology, Hyderabad, India

CERTIFICATIONS:
