bhavani.dwarapureddi98@gmail.com

Hillsboro, Oregon

## PROFILE SUMMARY

Highly motivated and detail-oriented Information Security Analyst with 5 years of industry experience in safeguarding organizational IT infrastructure, ensuring data confidentiality and Integrity. Experienced in working with Juniper Next-Generation Firewalls and Switches. Skilled in conducting risk assessments, developing risk mitigation strategies, and implementing control measures to minimize exposure to cyber threats. Proficient in SIEM tools like Splunk, LogRhythm and Microsoft Defender to analyze security events and detect threats.

## EDUCATION

Bachelor of Technology – Electronics and Communication Engineering in Jawaharlal Nehru Technological University, Andhra Pradesh, India.

**GPA: 3.6 / 4.0**

## EXPERIENCE

### Information Security Analyst / Walmart / October 2023 – Present.

- Responsible for developing and managing an effective information security policy to ensure the confidentiality, integrity and availability of all the data that is related to the company's IT infrastructure.
- Experienced in monitoring network traffic for the suspicious activities observed, conducting vulnerability assessments and troubleshooting security incidents.
- Monitored and analyzed security alerts using SIEM tools like Splunk to detect unusual activity and remediate potential threats.
- Analyzed security logs files and alerts to identify and respond to potential security incidents.
- Monitored and analyzed event logs using Splunk to detect and address potential anomalies in network.
- Responsible for protecting data of customers and vendors against accidental, modification or unauthorized damage by employing threat detection tools like SolarWinds.
- Conducted regular Risk assessments to the organizations information systems and infrastructures.
- Experienced with Python scripting for automation and data analysis in the networking environments.
- Successfully implemented a network security monitoring system to analyze network traffic to detect and mitigate security threats.
- Experience in working with email threat protection tools like Darktrace.
- Experienced in detecting, analyzing, and managing risks to information security.
- Detected and resolved complex network related issues by utilizing monitoring tools like Wireshark.
- Documented and maintained information security policies and procedures in alignment with the organizational goals and compliance standards.
- Collaborated with cross functional teams to maintain Malware Prevention, security practices, Data and Intrusion Detection/Prevention Systems (IDS/IPS).

## Network Engineer / Juniper Networks / TCS / January 2020 - July 2023

- Experience in troubleshooting for Juniper Routers (MX-480, MX-960, PTX-1000), Switches (EX-4200, EX-4300, EX-8200) and Next –Generation Firewalls (SRX-5000, SRX-4600, SRX-610).
- Mainly involved in fixing bugs for scripts of specific features like NAT, AUTH, ALG and VPN by executing test cases using Fusion tool.
- Configured and supported routing protocols OSPF, BGP, SNMP and EIGRP.
- Performed the failure analysis for any bugs observed and raising the bugs identified during executions using JUNOS GNATS and tracking the bug to its closure.
- Understanding the test cases and associated product functionality and debugging the script according to JUNOS release plan.
- Troubleshot connectivity issues of DUTs.
- Following up on the bug fixes and verifying fixes given by Developers.
- Analyzed logs and pinpoint root causes.
- Actively involved in loading Junos image either manually or automatically for SRX models like High end, TVP and Seize Testbeds.
- Knowledge of tunneling technologies like IPSEC and MPLS.
- Hands on experience in testing protocols on Firewalls.
- Monitored events to run smoothly in Fusion tool during the execution to avoid bugs.
- Experience in working with JIRA to create Stories and assign points to the stories.
- Effectively resolved routing issues within multiple contexts of SRX Firewalls.
- Managed and monitored system X servers like Mobaxterm.
- Interacting with the Client in status meetings and sync up daily with the team in stand-up calls.

## SKILLS

|                            |                                                               |
|----------------------------|---------------------------------------------------------------|
| Network Devices:           | Routers, Firewalls, Switches and Gateways                     |
| Computer Networks:         | LAN, WAN and MAN                                              |
| Routing Protocols:         | BGP, OSPF, IS-IS, ECMP, SNMP and RIP                          |
| IP Addressing:             | IPV4 and IPV6                                                 |
| Layered Networking Models: | OSI and TCP/IP                                                |
| Other misc. Features:      | Syslog, LSYS, FTP, SSH and ISSU                               |
| Cloud Service Providers:   | Amazon Web Services (AWS)                                     |
| Programming Languages:     | C and Python                                                  |
| Tools:                     | Fusion, Wire Shark, Splunk, Microsoft Defender and SolarWinds |
| Operating System:          | Linux and Windows                                             |
| Microsoft Office:          | Word, Excel and PowerPoint                                    |

## CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- Cisco Certified Network Associate (CCNA)
- AWS Certified Cloud Practitioner
- TCS Certified Networking Foundations
