PROFILE

Results-oriented Senior Full-Stack Engineer with over 10 years of experience designing and developing large-scale web applications and RESTful APIs. Proficient in Java, Spring Boot, Hibernate, microservices architecture, JavaScript, TypeScript, React and Angular with a strong focus on performance optimization, scalability, and maintainable code. Adept at leveraging object-oriented principles to create robust solutions for enterprise-level projects.

EMPLOYMENT HISTORY

Senior Full-Stack Engineer, Tech Solutions Inc

May 2018 — Present

- Designed and implemented highly scalable RESTful APIs using Spring Boot and Hibernate, handling millions of requests daily with minimal latency.
- Led the development of a microservices-based architecture, resulting in a 20% increase in system scalability and modularity.
- Spearheaded the migration of legacy monolithic applications to Spring Boot microservices, significantly improving application maintainability and performance.
- Enhanced application performance by optimizing database queries and leveraging caching mechanisms such as Redis and Ehcache.
- Implemented secure user authentication and authorization using Spring Security and OAuth 2.0, ensuring compliance with industry standards.
- Developed asynchronous processing pipelines using RabbitMQ and Kafka, reducing data processing time by 35%.
- Built and maintained CI/CD pipelines using Jenkins and Docker, automating deployments and ensuring consistent delivery cycles.
- Built reusable and modular React components, improving development efficiency by 30%.
- Integrated complex state management solutions using Redux Toolkit and React Query, ensuring consistent data flow across the application.
- Improved SEO and accessibility scores using Next.js for server-side rendering and static site generation.
- Conducted regular code reviews and enforced best practices, improving code quality across the team.

Senior Full-Stack Engineer, ITC Management Group

Sep 2016 — May 2018

- Delivered a robust e-commerce platform leveraging Spring Boot, Hibernate, and Thymeleaf for dynamic web content rendering.
- Designed and maintained a role-based access control system using Spring Security, enhancing the platform's security.
- Integrated third-party services such as payment gateways and shipping APIs, ensuring seamless transactions and logistics operations.
- Improved system performance by implementing query optimization and batch processing, reducing API response time by 25%.
- Migrated on-premises infrastructure to AWS, reducing hosting costs by 30% and increasing system reliability.

- Led the transformation of frontend solutions by migrating a legacy codebase to a modern, scalable React-based application, enhancing performance and maintainability.
- Developed and maintained responsive UIs for an e-commerce platform using React.js, Redux, and Material-UI.
- Implemented custom hooks to encapsulate and reuse logic, reducing redundant code by 20%.
- Mentored junior developers, providing guidance on OOP principles, design patterns, and best coding practices.
- Collaborated closely with other developers and product managers to deliver end-to-end features, ensuring alignment between business objectives and technical solutions.

Full-Stack Engineer, KeyTech Solutions

Jan 2015 — Sep 2016

- Assisted in the development of a CRM platform, implementing core functionalities using Spring MVC and Hibernate.
- Wrote and optimized SQL queries for data retrieval, ensuring efficient database interactions with PostgreSQL.
- Collaborated with the QA team to write and execute JUnit and Mockito tests, ensuring 95% code coverage.
- Contributed to the development of SOAP-based web services for integration with external systems.
- Developed a fully responsive platform and migrated an outdated website with over thousands of users to modern single-page applications using React, resulting in a 20% increase in user engagement and a highly positive user experience.
- Built dynamic, responsive dashboards for data visualization using Chart.js and D3.js.
- Improved site performance metrics by implementing lazy loading, code splitting, and image optimization.
- Collaborated closely with cross-functional teams, participated in code reviews, and employed industry best practices to ensure efficient code structure, maintainable codebase, and seamless collaboration throughout the development lifecycle.

EDUCATION

Bachelor's degree, Middle Tennessee State University

Mar 2010 — Aug 2014
