Objective Summary

I am an IT Professional with a passion for learning and optimization. During my years of experience I have shown a consistency in service and finding opportunities for improvement, and as a result I have earned promotions along the way. I am detail oriented and aim to get the job done right the first time. My goal is to find a position where I can make use of my current skills but also find opportunities to learn new ones. I can organize, be self-directed and be a supportive part of a team. Eventually, I would like to move into a lead position where I can apply all of my practical experience to larger-scale plans, support my team of professionals and do my best to contribute to steering my department and company in a positive direction.

Education

DeVry University - Bachelor's in Network Communications Management

September 2004 - June 2007

- Graduated Summa Cum Laude

College of the Sequoias - General Education units for transfer

September 2002 - August 2004

Certifications

Server+ **Network+** **Security+** **CCENT** **VCP-DCV**

Technical Skills

Advanced

- VMWare vSphere
- Citrix Virtual Apps and Desktops
- Citrix Netscaler (ADC) Load Balancer
- Microsoft Windows Server
- Microsoft Active Directory
- Microsoft ADFS (SSO w/MFA)
- Microsoft Exchange
- Microsoft Office 365 Administration
- Microsoft Hyper-V
- Microsoft Powershell Scripting
- Enterprise Wireless
- Server Hardware Planning and Maintenance
- HP Hyperconverged Blades and SANs
- DNS, DHCP, WINS, NTP, VPN

Proficient

- Cisco Routers, Switches, ASA
- Sophos Firewall
- Google G Suite Administration
- Microsoft IIS
- Microsoft Data Protection Manager
- Apache
- Veeam
- Linux (Ubuntu Server)
- Out of Band Management
- PKI
- MSSQL/MySQL
- MacOS
- RADIUS/802.1x
- Cisco VoIP
- Fiber Channel and iSCSI

Experience

Kaweah Health, Visalia, CA - Tier 3, Server Administrator 2

February 2020 - Current

This role administers the server environment which services multiple sites and remote offices across Tulare County. Most sites require 24/7 uninterrupted service, which entails maintaining an on-call rotation to provide support. Critical to the position is balancing time between participating in deployment/upgrade projects and addressing issues.

- Supporting a company of 5500+ users in a 24/7 environment where uptime and responsiveness is critical to the organization's function and safety of patients.
- Environment is hosted by 1000+ VMs across dozens of hosts with multiple clusters connecting back to multiple SAN units.
- Administering and maintaining a Citrix environment used for Published Applications as well as Virtual Desktops, accessed by both thick and thin clients, on and off site.
- Daily communication and coordination with people in other departments to resolve issues and progress deployments.
- Weekly participation in System Change review and planning meetings, often leading to testing and fleshing out details of deployments and minimizing end-user impacts.
- Took the lead in working out a new strategy for catching up and maintaining server updates while staying in coordination with the various departments affected by each application. Increased our monthly update capacity by x4 and continuing still to make improvements.
- Using PowerShell to automate bulk tasks and save time for IT Administrators. Some scripts include basic intelligence to adapt to the possible expected conditions and fail out with logging should an unexpected condition arise. Created documentation to ensure others in my team can use and maintain these scripts as well.
- Act as a last stop for issues that cannot be resolved by Tier 2 or for troubleshooting those issues which requires a large time commitment. If a resolution cannot be found then collaborating with vendors and/or contractors to work out a solution.
- Participate in the on-call rotation, responding to any server or hosted application related calls after-hours and weekends.

The Harker School, San Jose, CA - Network Administrator 3

March 2008 - February 2020

Proactively monitored and maintained a multi-site network and systems while troubleshooting complex issues ranging from wireless congestion mitigation to Exchange Server encryption mismatch. At times acted as lead in planning and implementing new systems or upgrades. Routinely collaborated with end users to troubleshoot connectivity or web application issues. Responsible for all aspects of the network infrastructure from ISP to endpoint, as well as server hardware, on-premise services and cloud based services.

- Supported 600+ staff and 2300+ students across four campuses
- Responsible for managing Cisco routers and switches, 200+ Aerohive wireless access points, Cisco ASA Firewalls, Barracuda spam and URL filtering
- Management of Google G Suite and Office 365 productivity suites

- Management of Hyper-V and VMWare hosts
- Management of Cisco VoIP phone system, POTS lines and Corporate Verizon Services
- Support and management of Android and Apple iOS mobile devices
- Management of Active Directory, Exchange and general network services using PowerShell as needed (DHCP, DNS, WINS, NTP)
- Maintained server backups with Veeam (previously MS DPM, previously Symantec)
- Worked with contractors for structured wiring expansion, upgrades and repairs.
- Worked with vendors to research and evaluate new hardware
- Planned and deployed hardware for upgrades, service expansion or new applications
- Ensured security standards were enforced for user accounts and file access
- Maintained security certificates for all servers and sites
- Investigated unusual behaviors to track down and stop any users or external threats performing attacks on our systems
- Fast recovery from hardware failures and malware infections, along with providing advisements to management to make improvements in infrastructure and security to mitigate future incidents.

This position served as both Network and Systems administrator. I began with Harker as a Level 1 and over the years I gained additional skill-sets to advance to Level 2 and 3. I also mentored the school's Robotics Club (FRC) for nine years, helping the kids reform how the group was managed and growing the membership.

Dell Inc., Fremont, CA - Technical Support Helpdesk Agent 2, SME, Team Lead

June 2006 - March 2008

Supported multiple client companies as an outsourced internal IT Helpdesk. Daily responsibilities for this position required the administration of Active Directory accounts, Citrix Metaframe environments, file and security management, RSA token administration and general Desktop Support.

As Level 2 I provided advanced troubleshooting and took on cases that would require extensive time or research to complete. Worked as part of a team who effectively supported multiple companies with varying environments and user bases. Later I became a lead for a team of twelve technicians providing dedicated service to our department's largest client.
