📍 Alice, TX

A creative & self-motivated software engineer, with 8+ years of hands-on experience in web services & application development. Over the past 8 years, I loves picking up new tools and technologies and strives to optimize the reliability of my code a little more with each project by writing automated tests, modularizing meaningfully, and choosing great technologies.

SKILLS

- React.js
- React Native
- Redux
- Next.js
- MUI / AntD
- Tailwind CSS
- Styled Components
- Apollo GraphQL
- React Query
- redux-toolkit
- Typescript
- Javascript
- Jest
- Cypress
- Selenium
- Enzyme
- HTML5, CSS3
- SASS, LESS
- Bootstrap
- Amplify
- Design tools
- Agile/Scrum
- SDLC
- Node.js
- Express.js, Nest.js
- REST, SOAP API
- Serverless
- Microservices
- AWS Lambda
- API Gateway
- SQL, NoSQL
- PostgreSQL
- DynamoDB
- SQS, Redis
- Websocket
- Docker
- Kubernetes
- AWS
- GCP

WORK EXPERIENCE

Senior Full Stack Engineer

Wipro | Jul 2023 – present

- Worked as a core member and design & build UI with React / Redux from scratch.
- Designed architecture of UI app, built re-usable components with storybook, developed UIs from Figma design based on styled components.
- Implemented Redux state management with Redux-Thunk and used React Query.
- Developed custom React-Hooks for custom purpose, implemented Unit Testing and Integration Testing with Jest, Cypress.
- Designed microservice architecture based on business domain, solved technical difficulties in communication between microservices, meet the testing coverage up to 95%.
- Defined GraphQL schema, integrated Apollo GraphQL, used Serverless framework to build & deploy microservices with CI/CD tools.
- Developed backend APIs (monolithic) with Node.js/Nest.js and communicated with clients to identify their needs and goals.
- Built socket server & integrated with Websocket to implement real-time communication between vendors and supports.
- Trained and supervised new employees and provided technical support to clients and co-workers.
- Managed servers and built pipeline for CI/CD on AWS platform.
- Worked in an agile/scrum environment and collaborated with teammates.
- Always followed software design principals. (e.g. SOLID)

ACHIEVEMENTS

- Co-operative work in any team
- Architecture Design
- Risk Management
- SDLC
- 99% accuracy in timeline

EDUCATION

Silicon Valley University | 2010 - 2014

Bachelor's Degree of Computer Science

Software Engineer

Cognizant | Oct 2020 - Jun 2023

- Built Company's website using React for frontend and Nest.js for backend for the advertising industry.
- Implemented complex UI from design and isolated 80% components for reusable.
- Used Material-UI and Tailwind CSS for build attractive & fully responsive UI.
- Defined various types of JSON data schema, classifying them, and solved complex analytic problems with functional programming.
- Developed backend RESTful APIs with Node.js/Express.js, GraphQL, Serverless.
- Investigated production issues, solved API latency issue and scaling problems.
- Optimized SQL query to resolve latency issue, developed some microservices to improve user experiences.
- Followed company's testing coverage culture and wrote unit tests and integration tests to ensure all updates working without problem.
- Managed CI/CD pipelines with Docker, Jenkins, AWS ECS.
- Agile software development and used modern new models for software development (e.g. SDLC)

Software Engineer

Syndigo | Apr 2018 - Aug 2020

- Rebuilt 4 years old SaaS application in React 16/JS/TS, Redux, Node and MongoDB with full user experience redesign.
- Built APIs with Ruby on Rails and GraphQL schemas, integrated them on the frontend, and established CI pipeline on GitHub Actions
- Deployed the application on AWS EC2.
- Mentored 3 team members, enabling them to achieve professional growth and personal goals.
- Implemented fully responsive and pixel perfect UIs using MUI, Styled Components.
- Worked in an agile environment with weekly stand-ups, kept track of user stories/bugs in Github projects.
- Customized MUI for company's usage and deployed it to NPM.

Software Engineer

Syndicode | Sep 2016 - Feb 2018

- Worked in an agile/scrum team, interactively working with other developers to build some products by using React / Angular.
- Learned Typescript and using it in many ways to improve coding experience and tracking issues.
- Started working with AWS and achieved some experience in building cloud based applications.
- Delivered 2 products and provide technical support for live customers.
