

ABOUT ME

Innovative System Architect & Software Engineer
Results-driven System Architect and Full Stack Developer with over 10 years of experience designing and delivering scalable, high-impact digital solutions. A natural leader with hands-on expertise, I specialize in complex system design, design system development, and human-centered product strategy, driving business growth through seamless user experiences. Expert in distributed systems, blockchain, AI/ML, and IoT integration, with a proven track record of optimizing efficiency and reducing operational costs. Architected a supply chain management system, cutting costs by 30%, and led the development of an award-winning e-commerce platform, boosting conversion rates by 25%. Proficient in Rust, Solidity, Vue.js, Python, and serverless architectures, I thrive in cross-functional teams, delivering high-performance, accessible applications. Passionate about design systems, decentralized applications, and emerging technologies, I push the boundaries of innovation to create scalable, future-ready solutions.

SKILLS

REACT, ANGULAR, NODE.JS, DJANGO, FLASK

PYTHON, JAVASCRIPT, JAVA, C++, GO, RUBY

MYSQL, POSTGRESQL, MONGODB, ELASTICSEARCH

DOCKER, KUBERNETES, JENKINS, GIT, AWS, GCP

MERN, MEAN, LAMP

AI & MACHINE LEARNING INTEGRATION

BLOCKCHAIN AND NFT DESIGN

PRODUCT STRATEGY & VISION

UX/UI/IA DESIGN

MODULAR DESIGN SYSTEMS

FIGMA AND OTHER PROTOTYPING TOOLS

WORK EXPERIENCE

KEEPSI

Richardson, Texas, US

2024 - 2025

Software Engineer & Product Design Principal

- Specialized in web development using **.Net Framework 4.5/4.0/3.5/3.0/2.0, Angular JS, Visual Studio Code, Visual Studio, ASP.NET, C#, VB.NET, WCF, JQuery, JSON, MVC 4, HTML5, Bootstrap, CSS 3, JavaScript, Google Maps API**.
- Extensive RDBMS experience on **LINQ, ADO.Net, Oracle PL/SQL, SQL Server, Web services, Windows Services, Visual Basic 6.0 and Classic ASP 3.0**.
- In-Depth understanding of the entire web related technologies, architectures, frameworks, component technologies and cross-platform **UI/UX** development.
- Extensive experience on **ASP.Net, MVC, Web API, AJAX methodologies and client-side programming using JavaScript, JSON**.
- Highly Knowledgeable in latest client-side open source frameworks such as Angular and experienced in frameworks **Angular JS, JQuery**.
- Experienced UI/UX designer, front-end developer using JavaScript frameworks, client-side template designing, data-binding and script-based UI controls.
- Expertise in mobile web development with cross-platform responsive design and web debugging tool on browsers IE, Google Chrome and Firefox.
- Experienced reading and understanding third party code libraries and troubleshooting UI related issues on browser-based debugging tools.
- Advanced level knowledge in implementing Object Oriented Design (OOD), Service Oriented Architecture (SOA), S.O.L.I.D Principles, Design Patterns, Dependency Injection (DI), Continuous Integrations (CI) and adhere to architecture and programming best practices.
- Proficient in Analysis, Design and Implementation of databases using SQL Server database, Oracle 10g/8i, MS-Access and writing Stored Procedures, having firm understanding of relational database system with strong PL/SQL and T-SQL experience.
- Working experience in using version control tools like Visual Source Safe (VSS), Team Foundation System(TFS) and GitHub.
- Possess extensive experience working with huge datasets, which includes Transactional and Dimensional database design, Stored Procedures, Database Structures, Data Analysis, Manageability, Performance tuning, trigger enhancements, Designing Tables, Views, Triggers, Cursors, Indexes, Transporting and loading big datasets.
- Participated in full Software Development Life Cycle (SDLC) process and Worked in AGILE development environment. Experienced in working and implementing SCRUM.
- Resourceful and reliable developer with quick learning capabilities, excellent interpersonal, communication, analytical and problem-solving skills. Highly organized and able to work tight deadlines and communicate effectively with technical peers.
- Inspired other developers to create great software; leading by example with ample knowledge sharing.
- A self-motivated individual and a good team player with excellent communication skills, effective problem solving and ability to work independently.

INSTAOVERS

NATIVE MOBILE APP

2024 - 2025

Senior Full Stack Developer & Product Design Principal

- Supporting an existing application made in ASP.Net and C#, using oracle as database. Used to find and resolve bugs, add new modules and enhancements to the existing ones and also different data fixes.
- Interacting with UI Analyst and Database people for proper understanding and generating the C# code.
- Storage and optimization of Data in the JSON Format.
- Expanded .NET and SQL abilities developing Windows SmartClient and Microservices for client.
- Responsible for developing the presentation layer using HTML, CSS, JavaScript, AJAX and .Net server controls.
- Invoked WCF Service which interacts with third part services for address validation and SQE validations via NCOG.
- Implemented business logic in Web API to invoke database to retrieve data into entities.
- Extensively used LINQ and ORM tools like Entity Framework to exchange data between web applications and database objects.
- Strong in report design and implementation with SQL Server Reporting Services (SSRS) for organizing and retrieving sensitive data in a very specific format (report).
- Extensive experience in developing N-tier applications using C#, .NET Remoting, .NET Serviced Components. Developed stored procedures, functions, and views for accessing the database.
- Development of Calendar application, a tool to view daily status report using MVC and Angular.
- Invoked Restful Web API's services using JQuery AJAX.
- Using Angular JS for the UI design for single page application.
- Designed Frontend with in object oriented JavaScript framework like Angular.JS and Required.JS.
- Using ADO.NET and Entity framework to communicate with the database.
- Using GIT-Hub and TFS for the purpose of version Control and source code maintenance needs.
- Effectively used JQuery and JavaScript for Client Side Validations
- Involved in translating the business requirements into technical design.
- Coordinating with team in troubleshooting and fixing production application issues.

FEEDME APP FOR FLAVORHAWK

Edmonds, WA

2024 - 2025

Full Stack Engineer & Design

- Requirement gathering and improving the architecture of the application.
- Understanding the assigned requirements and preparing the study report.
- Generating code for various operations that deal with data.
- Implemented repository, Factory and Decorator design patterns.
- Currently using MVC for developing the Business layer of the application.
- Storage and optimization of Data in the JSON Format.
- Responsible for developing the presentation layer using HTML, CSS, JavaScript, AJAX and .Net server controls.
- Creating and maintaining multiple web applications with using ASP.NET MVC with MVVM design pattern and style, creating several N-tier solutions along with the use of the JQuery, MVC architecture in Clean/Onion design pattern.
- Expert in creating various PL/SQL stored procedures, views, functions and temporary tables
- Extensive experience in developing N-tier applications using C#, .NET Remoting, .NET Serviced Components Designed the interactive front end using CSS3, HTML, JavaScript and Bootstrap.
- Unit Testing of the code using VS Unit.
- Troubleshoot user acceptance testing (UAT) and production Bugs and quickly provide solution to it.

ISTATION

Dallas, Texas

2020 - 2023

Product Design Principal

- Designed and launched an educational SaaS product from scratch, creating a cohesive North Star vision and 3-year roadmap that aligned cross-functional stakeholders.
- Innovated UX/UI/IA for tools used by over 5 million students and 100,000 teachers, driving significant growth in user engagement.

VAULLTI

Ave Seattle WA

2023 - 2025

Senior JavaScript Developer & Design

- Involved in the design, development and testing phases of Software Development using scaled AGILE methodology with Test Driven Development (TDD).
- Involved in functional requirements review and creating technical design documents and Integration Solution Design documents.
- Debugged and fixed bugs in **HTML5, JavaScript and CSS3** stored procedures, which were written by other developers.
- Implemented new features on the front end enhancing the user experience. Enhancing the features required changes using HTML5, CSS3, JavaScript, **jQuery, jQuery UI and AngularJS**.
- Implemented the Model View Controller architecture (MVC) by developing controller and service implementation classes.
- Extensively worked on Spring framework and integrated Hibernate and also used spring Inversion of controller and Dependency Injection principles.
- Extensively used Hibernate ORM in data access layer to write DAOs. Developed hibernate mapping and Configuration files.
- Designed and implemented **REST Web-Services** to provide the phone, plan & service data to the front end team and also integrated with the payment team to encapsulate pricing data using SOA.
- Used Log4j Logger for all logging purposes and JUnit for integrated test runs.
- XML for building data structures required for Web Services and JMS for sending asynchronous messages using the Event based Framework.
- Involved in unit, system, integration and regression testing.
- Participated in the analysis of defects, tracking issues and fixing them using Enterprise Quality Center.
- Involved in SQL development using Stored Procedures, Views and Queries.
- Co-ordinated with QA team to ensure the quality of application.
- Used SVN the version control tool for code commit and update.
- Guided and managed a 15-member development team to grow their technical skills via mentoring on operational improvements, coding practices, and technical issue resolutions; improved productivity by 49%.
- Spearheaded the strategy, research, and UX/UI/IA design for a new SaaS platform, incorporating ML/AI to enhance user personalization and experience.

APPLE GLOBAL PREFERRED PARTNERS

Cupertino, California

2022 - 2025

UX Principal & Software Developer

- Created different system pages which help executives to sell credits using the following technologies ASP .Net, C#, SQL Server, JavaScript, WCF, SmartClient, Telerik
- Designed and improved software development process, including creation of application to improve quality of software and cement the ability to reliably deliver releases on schedule.
- Developed RESTful services with WebAPI and SOAP Web Services to be consumed by Web Applications.
- Defined the architecture and technologies to use. Reviewer of analysis, design and implementation of application using ASP.NET MVC Core Architectural Design Pattern.
- Involved in Database Design, creating tables, indexes, views, stored procedures, referential integrity.
- Developed the complex features in C#, LINQ, SQL Server, and Oracle, i.e. the interaction with the other systems and APIs. Implemented MVC Filters on Authentication, Authorization and others.
- Developed Web apps with HTML, CSS, JavaScript, jQuery, ASP.NET MVC, AJAX, JSON, Bootstrap and Telerik controls.
- Design and developed using C# .NET SmartClient, taking advantage of Entity Framework and SQL Server with Windows and Web Services
- Responsible for implementing two screens from end to end. The MVC application also utilized Razor and LINQ. Involved in Deployment and Troubleshooting issues in the application during Go Live.
- Implementation of Windows services using C#. Implement Agile Methodology focusing on TDD and Scrum. MS SQL, Oracle utilized to store data from integration layer processing.
- Improved the test process using MSTest for unit testing, and FitNesse for integration testing.
- Collaborated on creation of user stories and acceptance criteria with business owners and subject matter experts.
- Documented entire project from machine setup and coding standards to test environments and system architecture.
- Ensured cross-browser compatibility by testing the applications of different browsers including Safari.
- Worked on multiple assignments which include development, implementation and support role for different pages of above two sections.

HYUNDAI MOTOR GROUP

Jan 2021 - Jan 2022

Product Design Principal

- Defined product vision and roadmap for the Hyundai SODAS platform, integrating AI and machine learning to develop a complex alert system that proactively identified patterns and trends.
- Utilized AI-driven data analysis to create an advanced alert and escalation system, allowing data analysts to swiftly identify critical insights and respond to emerging issues.
- Bridged stakeholder vision with technical execution through design workshops, reverse design, and iterative prototyping, aligning an 80-person team of engineers, management, and data scientists on a comprehensive 2-year product roadmap.
- Designed a modular, ML-powered system for monitoring and managing data alerts, enhancing the platform's ability to predict and react to user needs and market shifts.

EDUCATION

CENTER FOR ELECTRONIC ART, SAN FRANCISCO, CA

Digital Media Master + 3D Animation

PARSONS SCHOOL OF DESIGN, NEW YORK, NY

Product Development

UNIVERSITY OF UTAH, SALT LAKE CITY, UT

Math + Fine Art
