Technical Skills

Languages: JavaScript, HTML, CSS, SQL, C++, Python, Java
Developer Tools: Git, Node.js, React.js, Bootstrap, Flask, AWS
Concepts: Software Development, Website development, Artificial Intelligence
Certification: AWS Certified Developer Associate, Web Development Bootcamp, Google Data Analytics Professional Certificate,

Professional Summary

Software Developer with **3 years** of experience, skilled in **software development, web development** and **AI/ML** with expertise in **Python, JavaScript** and **AWS**; proficient in collaboration and communication.

Education

University of Nebraska-Lincoln Jan. 2024 - Aug. 2025
Master of Science in Computer Science (GPA: 3.76/4)

- Relevant Coursework: Operating Systems Principles, Multi-Edge Computing, Algorithm Design & Analysis, Secure Software Engineering.

Experience

Flipjungle Ltd Jun 2023 – Dec 2023
Software Engineer

- Leveraged **NLP techniques** for skill assessment through chatbots and integrated adaptive tutors using **AWS**.
- Developed backend infrastructure on **AWS** with **RESTful APIs** using **Python frameworks** to enhance scalability.
- Employed **BERT models** for emotional tone analysis in learner responses and readability assessment.
- Utilized statistical models for **grammar error detection, topic relevance** and **lexicon analysis**.
- Improved learner engagement by 25%** through the integration of adaptive chatbots with personalized tutoring.

Ftech AI Ltd Jan 2022 – May 2023
Software Engineer

- Conducted **NLP research**, proposed solutions, and utilized **NLP models** to enhance chatbot models.
- Developed core **out-of-domain (OOD)** detection for improving domain-specific chatbot performance.
- Deployed NLP applications for **sentiment analysis** and **named entity recognition (NER)**.
- Implemented **RESTful APIs** using **Docker** for efficient deployment and integration of **NLP models**.
- Enhanced chatbot accuracy by 30%** through the development of out-of-domain detection models.

Projects

Flipjungle EdTech (Back-end) | *Python, Flask, SQLAlchemy, DynamoDB, AWS* - [Github](#)

- Developed a learner management system with **Flask**, integrating various **AWS services** for scalability.
- Managed **SQLAlchemy** relational databases to ensure efficient data handling and implemented **microservices**.

Recipe Blog (Back-end) | *Node.js, Express, MongoDB, Bootstrap, Javascript, HTML, CSS* - [Github](#)

- Built a recipe blog with **Node.js**, implementing user authentication and session management with **npm packages**.
- Utilized **MongoDB** for efficient data handling and designed a responsive UI with **Bootstrap**.

Music Application (Back-end) | *Django, Python, Gunicorn, PostgreSQL, HTML, CSS* - [Github](#)

- Created a music listening app using **Django**, featuring user authentication and social login integration.
- Deployed with **Gunicorn**, managing static files and optimizing the database with **PostgreSQL** for scalability.

Publications

Duong, Q.D, et al. "Scale embedding shared neural networks for multiscale histological analysis of prostate cancer." Proc. SPIE , 2019.
