

Hema Dhakshinadi

hdhakshinadi@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and proactive Security Analyst with a strong foundation in cybersecurity operations, academic research, and hands-on technical expertise. Adept at using industry-standard tools like Splunk, Nessus, and Wireshark to enhance threat detection and response. Skilled in evaluating and implementing cybersecurity solutions, designing threat detection frameworks, and aligning practices with compliance standards like ISO 27001 and NIST. Published research on antivirus software and emerging threat detection methodologies demonstrates a commitment to improving cybersecurity strategies and risk management.

TECHNICAL SKILLS

Cybersecurity Tools: Splunk, Nessus, Nmap, Wireshark, Kali Linux, OpenVAS, Metasploit

Programming: Python (automation scripting), Java

Threat Management: SIEM, firewall configurations, vulnerability management, incident response

Compliance & Standards: NIST, ISO 27001, GDPR, HIPAA

Operating Systems: Windows, Linux (Linux)

PROFESSIONAL EXPERIENCE:

CYBERSECURITY INTERN

MS Info Tech | USA

(March 2024 – September 2024)

- Conducted vulnerability assessments using Nessus, identifying and addressing critical system weaknesses in enterprise networks.
- Monitored and analyzed security events via Splunk, escalating incidents and coordinating remediation efforts with teams.
- Evaluated and compared antivirus solutions (Norton, McAfee, Bitdefender) for malware detection efficiency and operational impact.

- Supported the alignment of security practices with regulatory frameworks (ISO 27001, NIST), ensuring compliance across systems.
- Collaborated with IT and security teams to develop advanced threat detection strategies and improve incident response times.

JUNIOR CYBERSECURITY ANALYST

CODING GEEKS | INDIA

(April 2019 - May 2021)

- Monitored and managed IT infrastructure across various platforms, detecting potential threats and reducing incident response time by 30%.
- Performed vulnerability assessments and penetration testing using Nessus and OpenVAS, identifying and mitigating risks within systems.
- Configured and managed firewalls to enforce security policies for both internal and external network traffic.
- Conducted security audits to assess and improve network security, ensuring compliance with best practices and regulatory standards.
- Implemented patch management systems, ensuring security patches were applied in a timely manner to protect against known vulnerabilities.
- Responded to security incidents, including malware infections, unauthorized access attempts, and network intrusions, improving incident resolution efficiency.
- Collaborated with cross-functional teams to integrate security solutions across departments and ensure policy adherence.
- Developed and maintained security documentation for security incidents, vulnerability scan results, and policies.
- Provided cybersecurity training to employees, including phishing awareness and safe browsing practices.

EDUCATION

Diploma - Computer Science

(CGPA 7.5/10)

Sree Vidyanikethan Engineering College, Tirupati, India.

(JUNE 2020)

Bachelor of Technology (B-Tech) - Computer Science (CGPA 8.9/10)
Sree Vidyanikethan Engineering College, Tirupati, India. (MAY 2023)

Master's of Science (MS) – CyberSecurity Operations (CGPA 3.92/4.0)
Webster University, St Louis, MO. (December 2024)

CERTIFICATIONS

CompTIA Security+
Splunk Core Certified User
Certified SOC Analyst (CSA)
Certified Ethical Hacker (CEH)

RESEARCH PROJECTS

Enhancing Cyber Threat Detection Frameworks

- Conducted research to improve traditional detection methodologies like anomaly detection and machine learning integration for better threat identification.
- Proposed AI-powered automation for real-time behavioral tracking to reduce false positives and enhance detection efficiency.
- Focused on emerging threats like ransomware-as-a-service (RaaS) and APTs, developing scalable detection solutions.

Antivirus Software Comparison: Norton, McAfee, Bitdefender, Kaspersky

- Published research analyzing four leading antivirus software products on key metrics, including malware detection, system performance, and real-time protection.
- Provided actionable recommendations for selecting antivirus software based on detection accuracy, speed, and resource consumption.

SOFT SKILLS

- Strong problem-solving skills with a focus on detail and precision
- Excellent communication and collaboration abilities in team environments
- Ability to thrive in fast-paced, high-pressure situations
- Strategic thinking and proactive threat mitigation planning

INVOLVEMENT AND ACHIEVEMENTS

- Enhanced antivirus evaluation methodology, leading to a published comparative research study that improved malware detection understanding.
- Designed and implemented an AI-driven incident response workflow, streamlining real-time threat management and improving response times.
- Developed an automated vulnerability scanning protocol that strengthened security posture and reduced human error across systems.
- Played a key role in ensuring compliance with ISO 27001 and NIST standards, contributing to the university's successful audit and certification process.
