

Casey Franek

Westminster, CO 80021
(970) 685-2326
caseyfranek@gmail.com

Summary

- Senior programmer with 12 years of experience in feature development and maintenance
- Experienced working with agile teams in person, across time zones, and internationally

Work Experience

Vertafore - Software Engineer II

Denver, CO 05/2024 - 08/2024

- Performance tuning database and desktop applications, improving efficiency up to 90%
- Troubleshoot and fix defects while keeping stakeholders informed

Sopheon - Senior Software Engineer

Arvada, CO 05/2011 - 02/2024

Duties

- Design and develop web applications and Windows services for core products
- Collaborate with product owners to size stories, prioritize work, and provide alternatives
- Conduct maintenance and provide second echelon technical support
- Translate stories into tasks, determine work prioritization, and resolve technical hurdles
- Provide leadership and technical support for offshore teams, and mentor junior developers
- Assist in the creation of test plans, technical documentation, and write automated tests
- Address tech debt, update technology stack, and maintain development environment

Projects

- Designed import and export functionality to receive regular updates from other systems
- Created functionality to transfer configuration between dev, test, and production systems
- Other specialized integrations include Active Directory and DTIC
- Maintained, expanded, and performance tuned calls within a versioned REST API
- Implemented features to translate project portfolios into PowerPoint presentations
- Constructed a chart builder to convert tabular reporting data into custom visualizations
- Developed a distributed Redis cache to improve call efficiency up to 80%
- Created tools for expressions that would stay current and trigger other functionality
- Reduced manual configuration with data driven configuration management
- Improved system performance with a Redis cache across a load balanced environment
- Developed strict workflows that would restrict the ability to alter a versioned document set
- Implemented design features that would make project configuration dynamic

Skills

- Coding languages: C#, ASP.Net, tSQL, Javascript, jQuery, JSON, React, Material UI, D3.js
- General coding: Database design, design patterns, performance tuning, design systems
- Quality control: unit testing (nUnit, Moq), Selenium, profiling, code reviews, test plans
- Software: Visual Studio, VS Code, SSMS, Git, TFS, Azure Devops, Jira, ANTS, Confluence
- Agile Methodologies: Scrum, Kanban, sizing, story refinement, acceptance criteria review

Education

Bachelor of Science: Computer Science

Colorado School of Mines - Golden,CO (Graduated 05/2010)
