Skills

Cloud & Infrastructure

AWS, GCP

CI/CD & Automation

GitHub Actions, Jenkins, CircleCI, ArgoCD, Spinnaker

Infrastructure as Code

Terraform, Pulumi, CloudFormation, Ansible

Containerization & Orchestration

Kubernetes (EKS/GKE), Helm, Service Mesh, Docker

Monitoring & Logging

Prometheus, Grafana, Datadog, ELK Stack, Honeycomb

Scripting & Development

Python, Bash, Go

Security & Compliance

IAM, HashiCorp Vault, Secrets Management

Certificates

- AWS Certified Solutions Architect – Professional
- Certified Kubernetes Administrator (CKA)

Profile

Senior DevOps Engineer with 10 years of experience in cloud infrastructure, Kubernetes orchestration, CI/CD automation, and observability.

Proven success in:

- Cutting infrastructure costs by 30% using AWS Graviton and Karpenter.
- Reducing API latency by 35% with optimized autoscaling strategies.
- Enhancing deployment efficiency with ArgoCD, GitHub Actions, and Terraform.

Passionate about automation, scalability, security, and reliability, with a track record of leading cloud migrations and improving DevOps workflows across distributed teams.

Professional Experience

Senior DevOps Engineer

Intercom

01/2022 – present

- Led the migration of Intercom's integrations infrastructure to Terraform and Kubernetes, enhancing scalability and reducing API request failures by 40%.
- Developed and maintained Infrastructure as Code (IaC) solutions with Terraform and Atlantis, ensuring consistent and reproducible environments across staging and production.
- Optimized Kubernetes (EKS) workloads by implementing horizontal pod autoscaling (HPA), reducing container orchestration overhead by 35% and improving resource efficiency.
- Improved CI/CD workflows by integrating ArgoCD and GitHub Actions, enabling automated canary deployments and cutting rollback time by 40%.
- Implemented distributed tracing with OpenTelemetry and Honeycomb, significantly reducing mean time to resolution (MTTR) for incidents by 60%.
- Lowered infrastructure costs by 30% through AWS Graviton migration and Karpenter-based autoscaling strategies, optimizing compute resource utilization.

DevOps Engineer

Global Payments

08/2016 – 12/2021

- Developed PCI-DSS compliant AWS multi-account architecture, ensuring 99.99% uptime for financial transaction processing.
- Automated cloud provisioning using Terraform, reducing infrastructure deployment time by 60%.
- Integrated Datadog APM & SIEM tools, strengthening real-time security monitoring and incident response automation.
- Managed Kubernetes clusters (EKS) and optimized load balancing strategies, cutting API call latency by 35% and improving response times by 20ms.
- Built event-driven serverless workflows with AWS Lambda, SQS, and EventBridge, reducing operational overhead by 50% in payment processing.
- Implemented HashiCorp Vault for secrets management, improving SOC 2 compliance and security best practices.

Education

Bachelor of Science

University of Miami

2012 – 2016
