Summary

- Over **17 years of progressive experience** in the insurance technology domain, specializing in **end-to-end delivery of enterprise-grade solutions** using DuckCreek Billing, Java/Java EE, AgencyPortal, and DCT Distribution Management System (DMS) across multiple carriers and lines of business.
- Proven ability to **lead cross-functional global teams** in Agile environments, driving collaboration between offshore and onshore teams to ensure timely and quality delivery of initiatives. Strong focus on **mentorship, performance optimization**, and team development.
- Adept at **strategic planning and execution**, aligning technology solutions with business goals. Known for offering innovative, client-focused approaches to complex technical challenges and product customizations.
- Successfully led **technical transformation projects**, partnering with product owners and stakeholders to prioritize feature delivery, manage technical debt, and ensure operational excellence while balancing short- and long-term goals.

Skills

- Insurance Domain: DuckCreek Billing, DCT Distribution Management System (DMS), AgencyPortal Framework
- Technologies: Java / Java EE, Spring, XML, SOAP, WSDL, XSLT
- Tools & Platforms: JIRA, SOAP UI, Git, SQL Server, Oracle
- Design Patterns: MVC, Session Facade, DTO
- Project Experience: Configuration, Customization, Integrations, Mentoring
- Soft Skills: Technical Leadership, Agile Methodology, Client Communication, Team Mentoring

Work Experience

Tech Lead/Manager

June 2019– Present

Duck Creek Technologies

- Led end-to-end configuration and customization of DuckCreek Billing modules including Payments, Disbursements, Invoicing, Receivables, and Events, aligning with multiple carrier-specific requirements.
- Directed integration with external payment services, developing reusable modules and workflows for real-time rating and seamless payment processing.
- Acted as a key facilitator with business architects to design and validate configurable prototypes, improving solution accuracy and delivery timelines.
- Customized Billing Express Portal and DMS applications using Author, Manuscripts, Skins, JavaScript, and XSLT; deployed code via Jenkins/Octopus in non-prod environments.

- Conducted code reviews and implemented scalable design principles, fostering high-performance, maintainable solutions.
- Mentored junior developers, college interns, and Co-Ops—managing career development and performance evaluations for team members.

Senior Consultant

June 2014– May 2019

Capgemini Inc

- Led the delivery of AgencyPortal components across 38 U.S. states and six comparators, driving sprint-based releases and stakeholder communication.
- Collaborated with offshore teams to address integration and policy-center issues; maintained transparency through daily reporting.
- Created BookSmart reports and dashboards for auto/home policies to enhance underwriting and claims insights.
- Piloted SonarQube proof of concept to streamline code quality reviews across teams.

Sr. Software engineer

June 2007 – May 2014

Accenture Solutions

- Delivered customized AP/C5 components for tax processing across KY and non-KY states; engineered using XML, XSLT, SOAPUI, and WSDL.
- Applied design patterns such as MVC, Session Facade, and DTO for scalable component design.
- Designed UML diagrams and mentored new team members to accelerate ramp-up and contribute to projects.

Educational and Professional Development

- Certified Azure fundamentals AZ900
- DCT Policy 2024 and DCT Billing 2024 certified
- Completed Post Graduate certificate in Big Data Engineering from BITS, Pilani Institute in Jan 2020
- SCJP 1.5 and SCWCD 1.5 certified
