

Christiana Reynolds

Roseville, CA 95747 ♦ (916) 210-9767 ♦ christiana.c.reynolds@gmail.com ♦ www.linkedin.com/in/christiana-reynolds

Results-oriented IT professional with an extensive background in system administration, application and network monitoring, cybersecurity, and automation. Demonstrated ability to design and implement enterprise-wide monitoring solutions, optimize storage and backup processes, and improve system performance and reliability. Proficient in utilizing HP OpenView, SCOM, and automation tools to enhance operational efficiency and reduce downtime. Committed to fostering innovation, efficiency, and business continuity for prominent clients in various sectors, including healthcare, finance, aviation, and government.

Core Expertise

Information Technology | TCP/IP | Cloud Management | Network Troubleshooting | Computer Science | Operational Support | Scripting | System Administration | Database Administration | Application Administration | PKI | API | Network & Application Monitoring | Nessus | Project Management | Jira | Confluence | ServiceNow | Azure | Microsoft Teams | Customer Engagement | Security Vulnerability Management | Asset Management | Crisis Management | Time Management | Vendor Management | B2B | Effective Problem-Solving | Critical Thinking | Sound Judgment | Leadership & Collaboration | Virtual Collaboration | Cultural Sensitivity & Awareness

Computer & Technical Skills

Monitoring:	System Center Operations (SCOM), Service Manager (SCSM), HP OpenView - Operations (HPOV), Network Node Manager (NNM), SiteScope
System Administration:	Solaris, HP-UX, Linux, Windows, Ksh, Csh, Bash, PowerShell, Perl
Storage & Backup Administration:	NetApp, EMC Symmetrix, NetBackup
Cloud:	Azure
Database Administration:	Oracle, Microsoft SQL/SQL-AlwaysON

Professional Experience

Verizon, Remote (Ashburn, VA)

March 2006 – April 2024

Enterprise Architect-Tools & Automation Engineer

- Spearheaded the design, testing, and deployment of a Network Application Performance Management solution, providing essential metrics regarding application availability and performance to external clients, enhancing business continuity.
 - ✓ Directed the automated implementation and provision of operational support across various customer environments.
 - ✓ Assumed a pivotal role in the development and implementation of a comprehensive Network, Application, and Performance Monitoring service, thereby ensuring uninterrupted monitoring and support for esteemed clients, including Kaiser Permanente, USPS, Santander, JetBlue, American Airlines, State Street, California Employment Development Department, Live Nation and Sony.
 - ✓ Proactively monitored and optimized customer network and system environments utilizing HP OpenView, Network Node Manager, Internet Services, and Performance Manager, enhancing system reliability and minimizing downtime.
 - ✓ Managed inventory of IT assets, ensuring accurate tracking and allocation to optimize resource utilization.
 - ✓ Identified and resolved system security vulnerabilities by conducting regular audits, applying patches, and implementing hardening measures to maintain compliance and protect sensitive data for System Center Operations Manager and Service Manager management and Microsoft SQL servers, as well as customers' gateway servers.
 - ✓ Developed automation scripts in PowerShell & Bash to monitor browser security configurations. Worked closely with security teams to harden browser settings, ensuring compliance with corporate security standards.

Lead Systems Engineer

- Designed and implemented tailored system and application monitoring solutions, enhancing performance and reliability for external clients.
 - ✓ Leveraged HP OpenView and System Center Operations Manager (SCOM) to detect and mitigate system issues proactively.
 - ✓ Optimized monitoring frameworks to increase automation, streamline troubleshooting, and enhance operational efficiency.

Sr. HP OpenView Administrator/Consultant | Omnipros, Fremont, CA

February 2005 – March 2006

- Spearheaded enterprise-wide network and system monitoring using HP OpenView, NNM, Internet Services, and Performance Manager.
 - ✓ Proactively identified and resolved system issues, minimizing disruptions and enhancing overall network reliability.
 - ✓ Provided expert consultation on HP OpenView solutions, enabling clients to enhance system visibility and operational effectiveness.

Sr. Unix System Administrator | Intel, Folsom, CA

April 2001 – February 2005

- Implemented an enterprise-wide monitoring solution using the HP OpenView platform, enhancing system performance and issue resolution.
 - ✓ As a member of the Sacramento regional team, I optimized storage, backup, and recovery operations, ensuring data integrity and minimizing downtime.
 - ✓ Member of the Divisional Business Continuity team and facilitated disaster recovery drills.
 - ✓ Managed and maintained a high-performance server compute farm, improving scalability and operational efficiency.

- ✓ Sun-Fire 3800's, 480's, 280's, 420's, E3500's, E4500's, Windows 2000 & 2003 servers, and NetApp FAS960, F880 & F840's.

Technical Lead | Hewlett Packard, Roseville, CA

December 2000 – April 2001

Managed a cross-functional team of Unix, SAP Basis, and Oracle Database administrators to support mission-critical systems for external customers, ensuring high availability and optimal performance of business-critical applications.

- ✓ Provided technical guidance and oversight to ensure system stability, scalability, and security across complex, multi-platform environments.
- ✓ Coordinated with external customers to define and meet service level agreements (SLAs), troubleshoot performance issues, and implement solutions to improve system efficiency and uptime.
- ✓ Led the implementation of automation tools and processes to streamline system maintenance, reduce manual intervention, and improve response times.
- ✓ Ensured compliance with security and operational standards by developing and enforcing best practices for system configuration, patch management, and vulnerability remediation.

Unix System Administrator | Applied Materials, Santa Clara, CA

August 1999 – December 2000

Provided comprehensive Unix system administration for production, development, and testing environments, including user account management, performance tuning, and system monitoring.

- ✓ Managed patching cycles and implemented security updates to mitigate vulnerabilities and ensure system integrity.
- ✓ Oversaw backup and recovery operations using enterprise-level tools, ensuring data protection and quick recovery in the event of system failure.
- ✓ Planned and executed three offsite Disaster Recovery (DR) exercises to validate recovery procedures, improve readiness, and minimize downtime during actual incidents.
- ✓ Documented system configurations, troubleshooting procedures, and recovery steps to create a knowledge base for quicker issue resolution and team training.

Unix System Administrator/Consultant | Matrix Solutions Inc., Roseville, CA

March 1998 – August 1999

Remotely provided managed services for the Applied Materials customer, ensuring seamless system operations and support.

- ✓ Set up and administered a test lab for Applied Materials, ensuring a stable environment for application testing and validation.
- ✓ Provided installation and recovery support for all applications in the Y2K lab, ensuring compatibility and stability in preparation for the millennium transition.

System Administrator/Government Contractor | DSA, San Antonio, TX

June 1996 – March 1998

- Provided Unix and Windows system administration support for Air Force medical projects, including installing, configuring, and maintaining servers and workstations.
 - ✓ Managed system security and compliance with DoD standards by applying patches, conducting security scans, and remediating vulnerabilities.
 - ✓ Supported software deployments, upgrades, and configuration changes to ensure compatibility with existing infrastructure and minimize disruptions.
 - ✓ Developed and maintained scripts to automate system monitoring and management tasks, improving operational efficiency.
 - ✓ Collaborated with project teams and stakeholders to align IT infrastructure with project goals and performance requirements.

System Administrator (Clearance - Top Secret/SCI) | United States Air Force, Georgia-Greece-Germany-Texas March 1988 – July 1996

- Managed tactical communications and IT infrastructure, including Unix and Windows servers, to support mission-critical operations.
 - ✓ Installed, configured, and maintained operating systems, applications, and network services in secure, high-availability environments.
 - ✓ Provided frontline technical support for system outages and performance issues, ensuring rapid resolution to maintain operational readiness.
 - ✓ Managed user accounts, access permissions, and security controls to protect sensitive information and ensure compliance with military protocols.
 - ✓ Trained junior personnel on system administration procedures, troubleshooting techniques, and security best practices.

Education & Professional Development

Bachelor of Science in Information Technology - University of Phoenix

Associate in Information Systems Technology (*Levitow Awardee*) - Community College of the Air Force
