

System Administrator | Network Administrator

Detail-oriented and innovative IT professional with **extensive experience in system administration, SQL Server database administration, and software development** within enterprise SaaS environments. Proven ability to **design, deploy, monitor, and maintain scalable IT infrastructure** and cloud-based systems. Adept at cross-functional collaboration, problem-solving, and **ensuring system integration, performance, security, and compliance**. Strong foundation in **Agile methodologies, scripting with PowerShell and Python**, and a track record of translating technical needs into actionable strategies and solutions. Excellent written and verbal communication skills, with a passion for mentoring, documentation, and stakeholder engagement.

Areas of Expertise

- System Administration
- Agile Methodology
- Performance Tuning
- Technical Troubleshooting
- Performance Tuning
- System Integration
- Data Migration
- Cloud Infrastructure
- Database Query Optimization
- Penetration Testing
- Multi-Language Support
- Vendor Management
- Strategy Execution
- Version Control
- SOLID Principles
- Cloud Infrastructure
- SaaS Deployment
- Stakeholders Engagement
- Backup & Recovery
- Problem Resolution Scalability
- Security & Compliance

Career Experience

Midwest Auction Oct 2024– Present
Server Upgrade | Independent Contractor

- **Deployed a new Dell server** running Microsoft Windows Server 2022, **ensuring a stable and modernized infrastructure.**
- **Installed and configured Microsoft Hyper-V** to support virtualization and **improved the system resource efficiency.**
- **Migrated legacy RedHat Linux server to a new RedHat VM**, enhancing performance and maintainability.
- **Upgraded OKI dot-matrix printers from serial to TCP/IP connectivity** and currently preparing Azure Site Recovery for virtual machine replication.

Enmark Systems Apr 2017– Sep 2024
Software Developer

- Delivered technical solutions that **enhance application reliability and system scalability** through collaborative development and agile methodologies.
- **Designed and deployed scalable .NET applications using VB.NET, C#, and SQL Server**, aligning with business needs and industry best practices.
 - Implemented and optimized solutions for DevOps work items, improving code performance and **reducing issue resolution time by 30%.**
 - Developed tools for Active Directory user management and internal asset tracking, **enhancing system integration and user visibility.**
 - **Conducted code reviews** to ensure compliance with SOLID principles, **enabling maintainable and high-performance software systems.**

Enmark Systems Apr 2008- Apr 2017
System & SQL Administrator

Managed enterprise-wide IT operations across system administration, database optimization, and customer support, **ensuring high availability, scalability, and security across platforms.**

- **Implemented and maintained Windows Server environments** (on-premises and cloud), including DNS, firewall, and Active Directory configuration for enterprise clients.
- **Administered and optimized SQL Server databases**, utilizing T-SQL, execution plans, and Index Tuning Advisor to improve performance and ensure data integrity.
- **Managed backup and disaster recovery strategies** using local/cloud solutions and automated deployment of SQL instances via PowerShell.
- Spearheaded system and data migration projects to isolate customer environments, **improving security, performance, and compliance** with industry standards.
- **Managed vendor and stakeholder communications** to address project status, requirements, and technical integration objectives, ensuring alignment with business goals.
- **Delivered customer support through ServiceNow and Zendesk**, demonstrating exceptional customer service, critical thinking, and technical troubleshooting across hardware, software, and networking platforms.

Additional Experience

Server Upgrade | Independent Contractor - Midwest Auction | October 2024 – Present

Education

Bachelor of Science (B.S.) in Computer Science

Rasmussen College

Certifications

- Microsoft Certified Solutions Associate (MCSA): SQL 2016 Database Administration
- Microsoft Certified Solutions Associate (MCSA): SQL 2016 Database Development
- Microsoft Certified Solutions Expert (MCSE): Data Management and Analytic
- CompTIA A+ Certification
- Certified Entry-Level Python Programmer | Expected Completion May 2025

Technical Skills

VB.NET | C# | T-SQL | PowerShell | Python | Microsoft Visual Studio | SQL Server | SQL Management Studio | SQL Profiler | Azure DevOps | Microsoft Windows Server | Active Directory Domain Services (AD DS) | Exchange Server | Microsoft Entra (Azure AD) | Office 365 | Microsoft Hyper-V | VMware ESXi | DNS | DHCP | IIS | Group Policy | Windows Deployment Services (WDS) | Microsoft Remote Desktop Services (RDS) | Wireshark | Acronis | Ghost | Macrium | ServiceNow | Zendesk | Microsoft Office | Microsoft Teams | Autodesk AutoCAD | Microsoft Dynamics 365 (CRM) | SCO-Unix | Check Point | SonicWall | Dell | Netopia | Barracuda | Cisco | Always On Availability Groups | Registered Servers | Azure Site Recovery | RedHat Linux | OOP (Object Oriented Programming)
