WORK EXPERIENCE

VillageCore

San Diego, CA

Software Development Internship

Jun 2024 - Aug 2024

- Deployed a Python-based LinkedIn scraping tool, overcoming anti-scraping barriers through innovative solutions like Google search scraping and CAPTCHA handling, reducing manual data entry time by 90%.
- Automated candidate matching workflows by integrating Airtable with APIs and Zapier, increasing data synchronization efficiency and reducing manual labor by 80%.
- Enhanced mobile app performance by implementing caching, lazy loading, image compression, and minification techniques, reducing initial load times by 70% and improving user experience on both iOS and Android platforms.
- Performed rigorous software testing and debugging to ensure compliance with Apple performance, security, and quality standards, focusing on identifying critical bugs and optimizing system behavior under varying conditions.

Partie

San Diego, CA

Software Engineering Internship

Jul 2023 - Sep 2023

- Developed a Twitch extension integrating real-time data from the Twitch API, creating interactive overlays and engagement features such as live polls and viewer statistics, increasing user interaction by 30%.
- Designed and built real-time applications using React and Angular front-end frameworks, integrating APIs to create robust, responsive user interfaces, including the custom Twitch extension for interactive overlays.
- Managed full iteration cycles by completing 100% of assigned tasks on schedule, demonstrating effective time management and prioritization of key deliverables without compromising code quality.

PT. Digital Satellite Indo

Jakarta, Indonesia

Software Engineering Internship

Jul 2022 - Sep 2022

- Contributed to the development of new features for an internal SoftPhone application, optimizing call connectivity and reducing latency by 40%, resulting in a 25% increase in user satisfaction and improved system performance.
- Created custom APIs with endpoints utilizing external databases like MongoDB, using Node.js and Express, and thoroughly tested them with Postman, improving data reliability and integration speed by 20%.
- Deployed features on Heroku and set up CI/CD pipelines, reducing software deployment times by 50% and minimizing downtime, ensuring quicker updates and feature rollouts.

PROJECT EXPERIENCE

Custom Operating System Development

San Diego, CA

Innovative Kernel and Scheduling Algorithm

Jan 2024 - Feb 2024

- Designed and implemented core kernel functions such as process pausing, resumption, and context switching, optimizing CPU utilization and enhancing system performance by 70%.
- Enhanced system throughput by optimizing kernel scheduling logic, resulting in a 30% increase in overall system responsiveness and stability.

Voice-Activated Recipe Generator App Project

San Diego, CA

Team Developer and Integration Specialist

Oct 2023 - Dec 2023

- Collaborated in a team of 5 to develop a voice-activated recipe generating app, integrating ChatGPT and REST APIs for flexible content generation, in which we received a 95% grade. (JavaFX)
- Developed seamless communication between DALL-E and Whisper APIs to create an intuitive voice-activated application, while identifying key features that led to reduced processing time by an average of 5 seconds per query.
- Established and integrated MongoDB database to store over 10,000+ saved recipes and engineered API endpoints.

EDUCATION

University of California, San Diego (Bachelor's)

San Diego, CA

Major: Computer Science, (GPA: 3.72/4.0) - 3 years STEM OPT without sponsorship

Graduation Date: Dec 2024

Shoreline Community College (Associate's)

Seattle, WA

Major: Computer Science, (GPA: 4.0/4.0)

Graduation Date: Jun 2022

SKILLS

Front End | Back End: HTML/CSS, React, Bootstrap, Angular, JavaScript | SQL, MongoDB, AWS, ASP.NET.

Language: C, C++, Java, JavaScript, Python, NodeJS, Typescript, ARM (64 bits), Verilog, Go, Kotlin, SQL, Rust, C#.

Skills: Git, Automation, Agile, App dev, Web Dev, APIs, Debugging, Algorithms, Data Structures, Database.

Interests: Full Stack Developer, Software Engineer, Software Developer, React Dev, Software Tester, Data Engineer.
