WORK EXPERIENCE

CHVMA

Austin, Texas

Software Developer

Jul 2024 - Present

- Developed TreasureCoastFence.com for a Florida-based fencing company using Next.js, React.js, Node.js, Express.js, MongoDB, SEO, and UI/UX design tools (Figma, Canva), driving a \$250,000 revenue increase within months through optimized performance and a responsive user interface
- Designed the 'Case Studies' page and several other UI components for SymphonyOS (symphonyos.co) using CSS, Webflow, JavaScript, Figma, wireframing, and various other UI/UX technologies, enhancing the platform's design consistency and user engagement
- Created landing pages and ticket purchasing platforms for Boston music events using Next.js, React.js, MongoDB, RESTful APIs, Framer, and SEO, contributing to 260+ ticket sales in 20 days through audience research, SEM, and a revamped social media strategy
- Redesigned RestorationHC.com for a healthcare agency in Massachusetts using Framer, Next.js, WordPress, Figma, and RESTful APIs, leading to a 42% increase in worker applications via targeted ad campaigns and lead generation
- Integrated cloud-based analytics to track user behavior and optimize marketing campaigns, leveraging Google Analytics, Hotjar, and Mixpanel

Adonai Alliance Home Healthcare Agency

Lynn, Massachusetts

Software Developer

Sep 2022 - Dec 2024

- Designed and implemented interactive elements, microservices, and SEO strategies across multiple websites using WordPress, CSS, JavaScript, and Figma, increasing daily visitors to over 4,000 per month
- Developed a digital payslip system using MySQL, MongoDB, Tauri.js, Node.js, Tailwind CSS, Rust, React.js, and Next.js, improving worker pay accuracy from 77% to 96%
- Created and managed MongoDB and MySQL databases to securely store sensitive medical information, enhancing system security and patient data retrieval performance
- Built a shift clock-in web app deployed on Vercel, leveraging Tauri.js, Rust, CSS, React.js, and Next.js, effectively resolving lost work hours for traveling nurses
- Architected scalable microservices using Node.js, Express.js, and MongoDB, significantly improving system modularity and fault tolerance

Integral Studio

Remote

Software Engineer

Jul 2023 - Jul 2024

- Conceived Riphumanart.com, a summer tour website for the rap collective EARTHGANG, utilizing Next.js, TypeScript, SEO, React.js, and Tailwind CSS, driving web traffic and contributing to multiple sold-out shows across Europe
- Designed and developed the Letterman Club website for EARTHGANG's EP release party using Next.js, React.js, TypeScript, Tailwind CSS, Figma, SEO, and Vercel, resulting in increased social media engagement and ticket sales
- Created landing pages and a ticket purchasing site for Coi Leray's EP release party using Figma, JavaScript, Next.js, and Tailwind CSS, leading to a sold-out venue with 44% of streams originating from the website's pre-save link.
- Optimized e-commerce microservices by addressing React state mutations, improving reliability, performance, and maintainability through TypeScript-based unit testing and refactoring inefficient API
- Implemented comprehensive unit tests in TypeScript to detect and resolve a persistent React state mutation bug in e-commerce microservices, fully resolving the issue within two months

SymphonyOS

Los Angeles, California

Software Developer Intern

Jun 2022 - Sep 2022

- Improved the scalability and reliability of e-commerce microservices by resolving React state mutations, implementing TypeScript-based unit tests, and refactoring inefficient API calls, reducing latency by 32% and improving system maintainability
- Deployed, tested, and troubleshooted RESTful APIs using Postman, JavaScript, and TypeScript, leading to a 24% reduction in application downtime through optimized request handling and error recovery mechanisms
- Refined website architecture and UI/UX using Figma, Webflow, TypeScript, CSS, and JavaScript, optimizing responsiveness and accessibility, resulting in a 100% increase in user adoption within two months
- Developed automated test cases in collaboration with the QA team using TypeScript, reducing technical debt below 5%, ensuring long-term system stability, and maintaining high code quality
- Designed and implemented scalable microservices using Next.js, TypeScript, PostgreSQL, and Node.js, optimizing deployment efficiency and improving system uptime

- Developed and maintained [Freebandz.com](#) for rap artist Future, leveraging Next.js, TypeScript, Tailwind CSS, and Vercel to enhance system performance, integrate e-commerce functionality, and create a new revenue stream, increasing site engagement and merchandise sales
- Collaborated with a cross-functional Agile team to design and deploy [SZASOS.com](#) and [SZACTRL.com](#) for SZA's award-winning projects, implementing Figma, Next.js, SEO, TypeScript, and JavaScript to create highly available, scalable, and secure web applications
- Executed digital marketing optimization using SEO, Mailchimp, and Google Analytics, ensuring system stability and scalability, resulting in a 68% boost in organic traffic, a 31% increase in music streams and merchandise sales, and higher social media engagement
- Refactored and optimized existing codebases using MERN stack, Next.js, and TypeScript, improving API efficiency, system performance, and security, while proactively identifying and resolving 7+ bugs per month through rigorous QA testing
- Improved software reliability and scalability by implementing CI/CD pipelines and containerized deployments, reducing deployment failures by 45% and boosting overall system resilience

EDUCATION

Bachelor's of Science in Information Technology**Boston, Massachusetts***University of Massachusetts Boston**Graduation Date: May 2023***CERTIFICATIONS**

Microsoft: Azure Administrator Associate (AZ-104)**Udemy:** Javascript - The Complete Guide**SKILLS**

React.js, Next.js, Tauri.js, Tailwind CSS, Bootstrap, HTML, CSS, JavaScript, TypeScript, GraphQL, SSR, SSG, Prototyping, Wireframing, Figma, Canva, Framer, Webflow, WordPress, CMS, Express.js, Node.js, RESTful APIs, Microservices, SaaS, Scripting, Python, Rust, MySQL, PostgreSQL, MongoDB, Firebase, Database Administration, Redis, Vercel, Netlify, Docker, Git, GitHub, GitLab, CI/CD, Azure, Google Cloud, QA, Postman, Wireshark, Cypress, Jest, Mocha, A/B Testing, Sprint Planning, Iterative Development, Scrum, Google Analytics, Hotjar, Mailchimp, Agile Practices, OOP, SEO, OpenAI APIs
