

Zachary Ralph

Clayton, NC | 417-880-5256 | Zacharyralph97@gmail.com

To whomever this may concern for At Bay,

Please accept this Cover Letter with my resume following it.

I am a dedicated cybersecurity analyst with over 7 years of experience in Networking, Technical and Customer support, Network Security, Identity Protection, Security architecture, Application Development, Risk Management and threat protection, ISO 27001 and NIST frameworks, DLP, Log Analysis and various IT Operations and business practices/protocols. Due to my vast umbrella of knowledge in I.T., I have 100% confidence I can learn any position quickly and contribute to building high performance teams in any environment as I have over the last 7 years while managing over 5000 endpoints and 4500 users in a 3-person team. After looking into your website and openings, I would love to join the team and atmosphere of having a meaningful work life, and protecting those around us.

Please consider my 5+ years of experience and qualifications:

- 6000+ Incident Response and threat mitigation tickets and created Microsoft Defender / CrowdStrike playbooks for real time threat response.
- Created and executed phishing campaign for over 4000 users in Microsoft Defender
- Managed and remediated annual Verizon mandated Cloud and Internal/External penetration testing of over 125 Attack Vectors including configuring Web Categories and throughput issues with Azure VPN, In house servers, and upgraded TLS using Linux.
- Demonstrated strong technical expertise in Information Security architecture, vulnerability management tools, firewalls, IDS/IPS, remediations, Information assurance, Enterprise Risk, Strategic Risk, Network Security, and IAM.
- Hands on experience in Microsoft Defender, Intune, Azure, Kali Linux, Autopsy, Bloodhound, MDM, MFA, Identity Management and protection, and CrowdStrike implemented workflows and threat protection as does the Federal Government.
- I have improved the management and remediation process for compromised devices / users from resetting passwords, to including the verification of a lockout, revoking all active sessions, resetting password with the user after verifying identity, and monitoring logins for 72 hours after.

Summary

I am a dedicated and results driven Cyber Security analyst with 5+ years of experience in threat detection, incident response, vulnerability management, utilizing SIEM tools and security frameworks to proactively identify and mitigate risks. I report directly to the VP of I.T. and I come with a proven track record of enforcing robust security controls, access policies, safeguarding critical network and cloud infrastructure.

Education and Training

Bachelor of Science, Cyber security Information and Assurance, Senior at Western Governors University (Graduating 2025)

Certs: A+, Network+, Security+, Project+, Pentest+, ITIL 4, Microsoft Server Administrator, CYSA+, IT Operations Specialist, Network Vulnerability Assessment Professional, Network Security Professional, Secure Infrastructure Specialist, Security Analytics Professional, CCSP, SSCP

Experience

Cyber Security Analyst, Russell Cellular – Verizon Wireless Retailer, July 2020-Current

I worked with Verizon Wireless to provide Russell Cellular with the same requirements and expertise that is used by Verizon's security team. This included high amounts of security research ensuring the implementation of Verizon Security, NIST Frameworks 2.0, ISO2700x, PCI-DSS, and SAQ-D. I come with hands on experience with network vulnerability testing tools listed in my skills below. I Worked closely with Verizon's penetration testing teams to test our networks and mitigate/remediate vulnerabilities while also building and configuring Web Application Firewalls, NGFWs, and keeping our security and user access policies up to date. All of this was done through Microsoft Defender, Intune, Azure, Entra, Kali Linux with various distros and tools, CrowdStrike, Arctic Wolf, Metasploit, Mimi Katz, Wireshark, Bitdefender, CLI, PowerShell, etc.

Technical Support Specialist, AT&T/Spring Mobile, November 2017-February 2020 (Covid)

Started in remote work helping user support including password resets, sales iPad troubleshooting, Jira ticketing system, Ninja One ticket system, Opus Mobile Support and endpoint troubleshooting.

Skills

Incident Management in Msoft Defender and CrowdStrike	API Management in Azure, AWS, DUO, Key vault	Web Content Filtering with whitelists/blacklists and email filtering
Identity Management in CS and MDEF	Application Security in Apple business manager, Intune, Azure, AWS	Patch management / Update Software
IT Asset Management / Server Management	Cyber Threat Protection / Zero-day Protection	SIEM Analysis/Ticketing System
Quality Assurance Testing	Network Vulnerability Scanning	Kali Linux Distros
Data Loss Prevention / Archiving	Wireshark Packet Capture	Identity Protection
Advanced Endpoint Protection in Msoft Defender, CS/MS Query	Penetration Testing/ Vulnerability Remediation	ISO 27001- ISO 27002, NIST, GDPR, PCI-DSS, SAQD
Intune/MDM Software	Digital Forensics/Autopsy	Sandbox/URL Filtering
Active Directory/Entra/GPO	IDS/IPS	MFA Registration Campaign
