

Damin P

Full Stack Developer | damin2240@gmail.com | 813-419-0703

PROFESSIONAL SUMMARY

- **8+ years** of experience designing, developing, and implementing **Java/J2EE-based enterprise applications**.
- Experience with **Agile methodologies**, such as **Scrum**, **Extreme Programming**, and **Test-Driven Development (TDD)**.
- Demonstrated Experience with **Spring Core, MVC, AOP, JDBC, and Spring Data JPA**, as well as **Spring Boot, Spring Cloud (Config Server, Ribbon, Eureka, Zuul, Sleuth, Hystrix, Bus)**, and **Java Microservices**.
- Comprehensive working knowledge in designing and developing **large-scale enterprise applications** using **Java 7/8/11**.
- Development experience using **Angular 2/4/5/6/7/8/9/10/11/12/13/14/15**, **JavaScript**, **TypeScript**, **jQuery**, **Node.JS**.
- Proficient in the creation of custom directives, pipes and dependency injection, modules, as well as knowledge of lazy loading and routing in **Angular**.
- Expertise in implementing **SOA approaches** and **web services** using spring boot, jersey, and swagger microservices using **HTTP**.
- Demonstrated expertise with **Amazon Web Services** components, including **S3, EC2, and Glacier**.
- Experience with **Spring MVC, Spring IoC, Spring Data, Spring Async, Spring Web Services, and Spring AOP**.
- Comprehensive understanding of how **Amazon Web Services (AWS)** components work, including **EC2 for virtual servers, S3 for storing objects, Elastic Beanstalk, Elastic Cache, and DynamoDB for storing data**.
- Ability to integrate **AWS Console and APIs** with various **Amazon Web Services** such as **EC2, SQS, S3, Elasticsearch and DynamoDB**.
- Proficient in **SOA and Web Services technologies**, including **SOAP, REST, and UDDI**.
- Strong expertise in **J2SE - OOPS, Exception Handling, Multithreading, Collections Framework, Concurrency Collections, Generic, File I/O, Serialization, and JDBC**.
- Hands on experience with the implementation of core **Java SE 11 concepts**, including utility methods, local variable syntax for lambda parameters, and nested access control.
- Experience with **SOA (Service Oriented Architecture), REST and J2EE Web Services** using **SOAP, WSDL, JAXB, JAX-RPC** using **Apache Axis**.
- Proficient with **Hibernate Persistence Framework**.
- Hands on experience in deploying, installing, configuring, and troubleshooting Java application servers such as **JBoss, Apache Tomcat, WebSphere, and WebLogic**.
- Expertise in **Eclipse, IntelliJ, and Spring Tool Suite (STS) IDE tools**. Testing web services with **SOAP-UI** or finding bugs in code are examples.
- Strong familiarity with **Java core concepts**, including **multithreading, synchronization, collections, and exception handling**.
- Experience with Oracle and MySQL expertise in creating composite **SQL queries, procedures, triggers, and stored procedures**.
- Proficient in **Maven**, a widely used **Continuous Integration and Continuous Delivery tool**.
- Ability to communicate, analyze, document, and organize information.
- Well versed with **Git** and **GitHub version** control systems.
- Ability to diagnose, troubleshoot, and consider long-term and short-term implications of possible solutions.

TECHNICAL SKILLS

Programming Languages	JAVA (11), SQL, PL/SQL
Frameworks	Spring (Cloud, Core, JPA, JDBC, MVC, AOP, Batch, Boot, Transaction, Annotations, IOC, DI), Hibernate
Web Services	SOAP, Restful, Micro Services Architecture
Web Technologies	HTML5, CSS3, XML, AJAX, JSON, Angular 15/14/13/12/11/10/9/7/6/5/4/2, Bootstrap, Angular Material
Databases	Oracle, MySQL, DB2
Application Servers	WebSphere, JBoss, Apache Tomcat, WebLogic
Tools/ Utilities	JMS, Hibernate, JPA, Queues
Build Tools	ANT, Maven
CI/CD Tools	Jenkins
Ticketing Tools	Jira
IDE Tools	Spring Tool Suite, Eclipse IDE, IntelliJ
Methodologies	Agile, Waterfall, TDD
Operating System	Windows, iOS, Android

Affinity Bank | Atlanta, GA

Nov 2023 – Till

Date

Full Stack Developer

- Iteratively design and develop the application using the **Agile Scrum methodology**.
- **Utilized weekly status meetings and daily scrums to ensure effective communication and collaboration.**
- Implemented Spring Framework modules, including **Spring IOC, Spring AOP, Spring MVC**, Spring Security, Spring Batch, and Spring Data.
- Assessed designs in order to make informed decisions about coding, programming, and integration.
- Improved legacy application by building components using **Angular 15, NPM, Node JS**, and **Angular Material**.
- Implemented **Agile** and **Scrum** methodologies to develop a **Typescript** and **Angular 15** web application.
- Utilized **Amazon S3 buckets** and **ElasticSearch** to enable efficient document search.
- Used **Spring IOC** for dependency injection and loose coupling, along with **Spring AOP** for logging.
- Accessed and authorized the system using Spring Security and **OAuth2**.
- Implemented enterprise **Java 11 solutions** using standards/best practices, including the **SDLC**. Implemented enterprise **Java 11 solutions** using standards/best practices, including the **SDLC**.
- Integrated **SOAP web services** with **Spring Boot** by migrating to **Spring RESTful web services**.
- Created a Restful web service using **JAX-RS** with **OAuth2 Security Framework**.
- Integrated **Java SDK** with **AWS**.
- Developed new tables, functions, views, indexes, constraints, and triggers to improve application performance.
- Implemented **Java SE11 applications** on a daily basis using **Tomcat server environments**.
- Developed microservices using **Spring Boot** and used Jenkins to deploy and integrate them continuously.
- Utilized Maven for system builds, **Git** for version control, and GitHub for code deployment.
- Developed complex workflows and conditions for **JIRA**, and set up and maintained the system using advanced scripts.

Environment: Java 11, Spring, Spring Boot, Angular 15, Spring IOC, Spring AOP, Spring MVC, Spring Security, Spring Batch, Spring Data, AWS, OAuth 2, JAX-RS, Tomcat Server, REST, Maven, Jenkins, Oracle, Spring Tool Suite, GITHUB, Jira, Agile, Windows.

Univista Insurance | Miami, FL

Dec 2022 – Oct

2023

Full Stack Developer

- Designed and developed the application iteratively using **Agile Scrum methodology**.
- Utilized **Spring Data** to implement Spring Boot applications.
- Implemented **Spring Boot** for cloud microservices development to accelerate development time.
- Utilized **Amazon S3 buckets** as an object storage service for storing and retrieving media files related to the application using **AWS SDK**.
- Created **Angular 11/12 Single Page Applications** with user-friendly login, logout, account recovery, and new password generation if the user forgets the password.
- Installed libraries like **angular-cli, typescript**, etc., which are required to develop an Angular application using **Node Package Manager (NPM)**.
- Improved performance of **Angular applications** through the use of performance optimization techniques.
- Implemented business rules and workflows using **Spring MVC, IOC, Spring Data**, and **Spring AOP**.
- Utilized Java 11 features, such as **utility methods, lambda parameter local variables**, and **nested access control**.
- Authentication and authorization of **APIs** using **OAuth 2.0 tokens** implemented with **Spring Security**.
- Utilized **EC2, S3, RDS, EBS, Elastic Load Balancer, Auto scaling groups**, and optimized volume and **EC2 instances** on **AWS**.
- Accessed-control, authentication, authorization, and authorization features have been implemented with **Spring Security** and **LDAP**.
- Implemented **JAX-RS REST services** using **Spring REST technology**.
- Created robot jobs / batch programs using **Java** and the **Spring framework**.
- Developed the Maven Build scripts and **pom.xml files**. Utilized Maven to automate the building of **JARs, WARs**, and **EARs**.
- Automated build and release processes with **CI/CD pipelines** using **Jenkins**.
- Implemented the **GIT** version control system and used **JIRA's** bug tracking and fixture management tools.
- **Implemented and maintained the application, as well as providing production support.**

Environment: Java 11, Spring, Spring Boot, Angular 11/12, Microservices, Spring Data, Spring AOP, Spring Security, AWS, JAX-RS, Apache Tomcat Server, STS, JSON, Maven, Jenkins, Jira, GIT, Agile, Windows.

Acute Informatics | Gujarat, India

Oct 2019 – Nov

2022

Full Stack Developer

- Participated in requirements gathering, design, and development phases.
- Added default and static methods to Java 1.8 to ensure interface compatibility.
- Created **Spring Eureka, Netflix**, and **Ribbon service** discovery solutions with **Apache Axis**.
- Utilized **Spring Boot** to implement **REST microservices**, generate metrics at the method level, and implement persistence via **Spring AOP**.

- Developed and maintained **Single-Page Applications (SPAs)** using **Angular 8/10**.
- Implemented core **Angular 8/10** functionalities like components, directives, services, and modules.
- Utilized **Angular CLI** for efficient project setup, development, and build processes.
- Improved **Angular application performance** with **Kafka** to process high-volume data more efficiently
- Integrated UI component libraries like **Angular Material** for a consistent design.
- Implemented microservices that interact with **REST web services** using **Spring Boot architecture**.
- Developed a **SOA Micro Service** that offers recent activity feeds using Amazon Simple Queue Service and a **JSON HTTP REST API**.
- Connected to **Amazon S3** buckets using **AWS SDK** since this is the object storage service used to store and retrieve media files.
- Implemented REST web services within a **SOA architecture** and used **JDBC** to link to the information model.
- Captured runtime exceptions and other log information using **Log4j**
- Developed and deployed a **Tomcat application** with the latest version of **Maven**.
- Automated software development, testing, and deployment using **Jenkins**.
- Automated issues and tasks have been created in **JIRA**.
- Implemented Spring MVC and JAX-RS to rewrite applications to provide high-quality **RESTful services**.
- Created business logic using Java concepts like collections, generics, exceptions, and IO.
- Actively participated in daily stand-up meetings and weekly iterative reviews to track the progress of each cycle.

Environment: Java 8, Spring, Spring Boot, AWS, Microservices, JDBC, Spring AOP, Spring IOC, Spring DI, Spring MVC, AWS, Apache Tomcat Server, Spring Tool Suite, Spring Eureka, JAX-RS, Maven, Jenkins, Jira, Agile, Windows.

Digicorp Information Systems | Gujarat, India
2019

Aug 2017 – Sept

Full Stack Developer

- Utilized **agile software development** methodologies to develop flexible and interactive applications.
- Created **client-side Java 8 codes** to simulate web application navigation, page validation, and form submission in web forms.
- Implemented **Java 8 features such as default, static methods, and concurrency API** to maintain interface compatibility and **concurrency**.
- Created customized **Angular 7** services to interact with the backend API.
- Updated an already existing application with **Angular 7** after redesigning it in the advanced workspace
- Implemented **Angular 7 forms, modules, DOM, expressions, controllers, filters, and HTTP requests**.
- Created a **single page application (SPA)** using **Angular 7** and implemented a client-side **MVC architecture**.
- Developed new components and some packages using **Angular CLI**, including **PrimeNG, Angular Material, and Bootstrap**.
- Used **Angular 7 controllers** for managing the data in each view.
- Incorporated **Angular Service** calls using the **Angular 7 Factory**.
- Implemented **Spring Dependency Injection, Spring Transaction, Spring MVC, and Spring AOP** in applications.
- Managed servers and executed code on **AWS Lambda**.
- Implemented **AWS Cloud** technologies such as **IAM, Elastic Servers, EC2 instances, S3 instances, and Elasticsearch**.
- Managed credentials for multiple groups and set up custom **IAM policies** using **Amazon IAM**.
- Managed user login and access control using **Spring Security and Spring JDBC**. **OAuth2** provided third-party authorization.
- Developed the application using **Spring MVC, Spring IOC, Spring AOP, Spring Boot, and Spring Security**. Implement **Restful web services** using **REST APIs**.
- Developed an application using **Spring MVC, Spring IOC, and Spring AOP modules**.
- Configured **Oracle connection pool**, included in **MySQL JDBC driver JAR**, to optimize performance.
- Implemented roles, privileges, and authentication for spring security applications.
- Developed the application using **Maven** and deployed it on Apache Tomcat using the build tool.
- Utilized **Junit** test cases and **Log4j** to test application classes and methods.
- Utilized **Git** to track file versions and create branches and code merges.

Environment: Java 8, Spring, Spring Boot, Microservices, Spring Dependency injection, Spring Transaction, Spring AOP, JDBC, AWS, Oracle, Apache Tomcat Server, Maven, REST, Log4j, Junit, GIT, Eclipse IDE, Jira, Agile, Windows.

Cybage Software | Gujarat, India
2017

Jul 2016 – Sept

J2EE Developer

- Contributed to the analysis, specification, design, implementation, and testing of the **Software Development Life Cycle**.
- Integrated dependency injection between components with **Spring (IoC)**.
- Integrated **Hibernate and Spring frameworks** into **Spring MVC architecture**.
- Implemented **Hibernate mapping files** for relational mapping by configuring **Hibernate POJOs**.
- Implemented **AWS solutions** using **EC2, S3, RDS, EBS, Elastic Load Balancer, Auto scaling groups, optimized volumes and EC2 instances**.
- Used **JMS** to communicate important information in an asynchronous and reliable manner, such as the status of a payment.
- Integrated **Spring and Hibernate** with **Hibernate ORM**.

- Implemented **Spring MVC** as a Web module and **Hibernate** as an **ORM** for mapping Java classes to data tables. created new **Action classes** to interact with **business logic**.
- Utilized SQL and PL/SQL to access, modify, and update Oracle databases.
- Implemented Continuous Integration and **Continuous Deployment (CI/CD)**.
- Using **GIT** to manage the repository without causing conflicts.
- Utilized **JIRA** to manage our projects. Progress is tracked by epics, tasks, and subtasks.

Environment: Java 1.7, Spring, IOC, AOP, AWS, MVC, REST, Hibernate, JMS, Jenkins, GIT, Jira, Agile, Windows.
