

Daniel X Doval

Senior Software Engineer

☎ (786) 220-4753 @ xcoderdani@gmail.com 🔗 linkedin.com/in/daniel-doval-a55260346/ 📍 Miami, FL, 33186

SUMMARY

Senior Software Engineer with over 10 years of experience across diverse industries, including **E-commerce**, **Supply Chain**, and **Entertainment**. Specialized in building scalable, high-quality solutions with a focus on microservices architecture, integrating advanced Generative AI technologies. Proficient in **Java**, **Node.js**, **React.js** and **Angular**, with a proven track record of delivering **end-to-end** projects in fast-paced, agile environments. A detail-oriented and organized professional with strong problem-solving skills and a commitment to efficiency and innovation.

SKILLS

Backend Development

Java 8/11/17, Spring, Spring Boot 3+, Spring MVC, Hibernate, Spring Data JPA, JDBC, Spring Security, Spring Cloud, Eureka, Resilience4j, Spring Actuator, Maven, Gradle, Servlets, JWT, OAuth, SSO, C/C++, PHP (Laravel, Codeigniter), Node.js, Express.js, Nest.js, C# (.NET, ASP.NET Core), Python (Django, Flask, FastAPI), Kafka, ActiveMQ, RabbitMQ, RESTful API, GraphQL (Apollo Server), gRPC, OpenAPI, Swagger, Elasticsearch

Frontend Development

JavaScript (ES6+), TypeScript, React, Vue, Angular, Next.js, HTML, CSS, Bootstrap, Tailwind CSS, Material UI, D3.js, Axios, Redux, Mobx, Context API, Story Book, React query, Vuex, WebSockets

Database

PostgreSQL, MySQL, SQLite, Oracle, MS SQL, MongoDB, Caching (Redis, Memcached), ORM (Mongoose, Hibernate, Prisma, Sequelize), RDS, DynamoDB

Testing Framework

Unit Testing (JUnit, Mockito, Spring Test, Testcontainers, Jest, Mocha, Chai), E2E Testing (Cypress, Playwright)

Cloud/DevOps

AWS, Azure, GCP, Docker, K8s, Jenkins, CircleCI, Github Actions

Software Engineering

Object-Oriented Programming, SDLC, TDD, BDD, Data Structures and Algorithms, Generative AI

Other

Postman, Prometheus, Grafana, Datadog, Git(Github, Gitlab, Bitbucket), Agile(Jira, Scrum, Kanban), Webpack, CRA, Vite, NPM, Yarn, Slack, LucidChart, Figma

EDUCATION

 Bachelor of Science in Computer Science

University of Florida

📅 08/2010 - 05/2014 📍 Gainesville, Florida

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Luxoft

📅 09/2020 - 11/2024 📍 New York, NY

Developed an Online Shopping Application utilizing cloud native architecture and integrating Generative AI technologies from the ground up.

- Designed and implemented projects using **Java** and **Spring Boot**, focusing on scalability and resilience. Deployed and orchestrated containers using **Docker** and **AWS ECS**, ensuring efficient resource utilization and seamless integration with AWS services.
- Implemented **AI-powered** search algorithms and personalized product recommendations using **Elasticsearch**, integrating **GenAI** Models developed in **Python**.
- Developed secure and scalable **RESTful APIs** using **Spring Boot**, implementing **Spring Cloud Gateway**, **Spring Security**, **JWT**, **OAuth**, and **SSO** to ensure authentication, authorization, and data protection.
- Used **PostgreSQL** for structured data, and **MongoDB** for unstructured data, and deployed it with **AWS RDS** and **DynamoDB**, ensuring automated backups and read replicas for failover.
- Designed and implemented scalable **messaging workflows** with **Apache Kafka** to handle real-time updates for millions of users.
- Improved the performance and reliability during peak traffic events by optimizing caching with **Redis** and **AWS CloudFront**, ensuring high availability.
- Implemented **monitoring**, **logging**, and performance **visualization** using **Spring Boot Actuator**, **Prometheus**, and **Grafana**, ensuring real-time insights and system reliability.
- Developed a responsive, user-friendly pages and components using **React**, **Redux**, and **Tailwind CSS**.
- Conducted Unit Testing (**JUnit**, **Mockito**) and E2E testing(**Cypress**), and collaborated with DevOps to optimize the **CI/CD pipeline** using **Docker** and **Github Actions**.
- Led a small team by managing project development in **Agile** environment, using **JIRA**, **GitHub** and **Slack**. And mentored 2 junior engineers and conducted code reviews regularly, promoting best practices and coding standards.

Software Engineer Backend

Cognizant

📅 05/2019 - 08/2020 📍 Teaneck, NJ

- Designed and developed a media streaming service using **Java** and **Spring Boot**, **React**, and **WebSockets**, supporting thousands of concurrent users.
- Reduced system bottlenecks by 20% through **Kafka**-based message streaming for real-time data processing.
- Created and maintained unit and integration tests using **JUnit** and **Mockito**; conducted end-to-end testing with tools like **Postman** and **Swagger** to ensure API reliability and performance.
- Leveraged **GenAI** for personalization and content generation to enhance user engagement and experience.
- Integrated **Amazon S3** for scalable storage, ensuring high durability and availability of static assets like images, music, and videos, reducing storage costs by 30%.
- Utilized **AWS Lambda** for serverless architecture, achieving 40% cost savings through automatic scaling of backend services.
- Optimized compute resources with **AWS EC2** Auto Scaling, resulting in a 30% reduction in infrastructure costs during low-traffic periods.
- Collaborated with DevOps to set up monitoring and alerting systems using **Prometheus** and **Grafana**, enhancing system observability and enabling proactive response to potential issues.
- Conducted thorough code reviews to identify performance bottlenecks, optimizing web-tier efficiency and reducing API response times by 25%
- Debugged critical production issues by analyzing logs, tracing call stacks, and collaborating with cross-functional teams to ensure quick resolutions
- Collaborated with a 9-member Agile team to deliver client solutions on time

PROFESSIONAL EXPERIENCE

 Software Engineer II

VentureDive

 10/2015 - 04/2019  Mountain View, CA

- Designed, and developed multiple end-to-end solutions, including an ERP system, an inventory management platform, and a chat application utilizing **PHP/Laravel**, **Node.js/Express.js**, **React**, and **Angular**.
- Collaborated with development teams to create custom modules in **JavaScript/Node.js** and **PHP/Laravel**, reducing third-party dependencies by 40%.
- Designed and implemented an **MVC**-based architecture in an ERP system, utilizing Ajax to enable asynchronous data updates and improve the responsiveness of user interfaces for enhanced real-time data management.
- Automated repetitive support tasks with **Python** scripts, improving support efficiency by 30%.
- Executed data-driven development by implementing **JavaScript** and **GraphQL** schemas to collect page data for various locales, significantly improving site performance by 120% through optimized queries and caching.
- Generated custom reports in PDF, Excel, and Word formats, utilizing JSON, XML, and CSV exports from **PostgreSQL** databases.
- Created analytical representations using graphical libraries such as **Chart.js** and **D3.js**.
- Utilized **React**, **TypeScript**, **Redux**, and **Ant Design** (Antd) to develop and maintain scalable UI components.
- Participated in code reviews to ensure adherence to coding standards and best practices, guiding new developers to align with team standards.

CERTIFICATION

AWS Certified Developer - Associate

Amazon Web Services, 2023

HackerRank Certified Software Engineer

HackerRank, 2024
