

Daniel Garcia
Senior Web3 Full Stack Developer
Tyler, TX, United States

About Me

- **10+ years of expertise** in software engineering, specializing in both traditional **web2** and cutting-edge **web3** decentralized application (**dApp**) development.
- Proficient in defining, designing, and deploying user interface best practices for modular solutions across various system development life cycle methodologies including **Scrum**, **Waterfall**, and **Agile**.
- Experienced in enforcing **WCAG standards** to enhance **accessibility** and seamlessly translating **Figma** designs into responsive and inclusive **front-end** code.
- Skilled in **smart contract** and web3 dApp development, utilizing technologies such as **Solidity**, **Rust**, **Hardhat**, **Foundry**, **Truffle**, **Remix**, **Web3.js**, **Ethers.js**, and **WAGMI hooks**.
- Strong collaboration with designers, offering valuable insights to optimize both aesthetics and accessibility across traditional and blockchain-based applications.
- Proficient in front-end development with **JavaScript**, **jQuery**, **HTML**, and **CSS**, as well as integrating **Web3.js** and **Ethers.js** for seamless interaction with **Ethereum** blockchain networks.
- Real-time experience in building **Single Page Applications (SPAs)** and decentralized applications, ensuring smooth **user experiences** across both web2 and web3 environments.
- Leveraging extensive backend experience to architect and develop scalable **RESTful APIs** using **Node.js**, **Express.JS**, **Nest.JS**, and **Python**, and integrating with blockchain networks for data exchange and verification.
- Deep Knowledge in **Artificial Intelligence** technologies (**ChatGPT**, **Llama**, **Deep Learning**, **Machine Learning**, **Keras**, **Scikit-learn**)
- Proficient in **SQL** queries for **PostgreSQL**, **MySQL**, **MongoDB**, and **GraphQL**.
- Experienced in leveraging **GraphQL**, **subgraph**, and **theGraph** to query blockchain data in real-time for **on-chain data visualization**, enabling dynamic and insightful analysis of blockchain transactions and activities.

Experience

Web3 Frontend Developer at Nifty Island

Jan 2024 – Dec 2024, Austin, TX, US

- Led the development of the cutting-edge **NFT marketplace** for creating, buying, selling, and trading NFT, ensuring a seamless user experience for blockchain-powered trading tools.
- Implemented responsive and user-friendly interfaces using **Next.js**, and **Tailwind CSS**, focusing on accessibility and performance optimization.
- Designed, built, and deployed scalable applications utilizing **AWS EC2**, **S3**, **Lambda**, and **IAM**, ensuring high availability and performance.
- Established a robust **CI/CD pipeline** using **Docker** for containerization, **CircleCI** for continuous integration.
- Collaborated with backend teams to integrate blockchain features using **Web3.js**, **Ethers.js**, and Solidity-based smart contracts.
- Designed comprehensive test scenarios, automated regression testing, and collaborated with cross-functional teams to ensure testing aligned with business requirements.

Blockchain Developer at Ultimax Digital

Jan 2020 – Nov 2023, New York, NY, US

- Designed and developed a scalable **NFT marketplace** on the **Ethereum** network, enabling seamless buying, selling, and trading of digital assets.
- Implemented smart contracts using Solidity, ensuring secure and efficient execution of **NFT minting, transfers, and auctions**.
- Optimized gas fees and transaction performance by leveraging best practices in smart contract development.
- Employed **Wagmi, Web3Modal, EthersJS** and **Foundry** for seamless web3 integration to facilitate easy interactions with wallets, smart contracts, and transactions, ensuring a user-friendly and efficient decentralized experience.
- Developed a responsive and intuitive frontend interface using **React.js** and **Tailwind CSS**, enabling users to browse, mint, and manage **NFTs** effortlessly.
- Conducted rigorous testing and deployment of contracts on the **Ethereum testnet** and **mainnet**, ensuring reliability and security.
- Collaborated with UI/UX designers and backend developers to deliver a feature-rich and user-friendly platform.

Full Stack Developer at Vevue

Oct 2015 – Dec 2019, Capitola, California, US

- Developed and maintained full-stack applications, implementing scalable and efficient features using **JavaScript, Node.js, and Vue.js**.
- Designed and optimized APIs to ensure seamless data integration between the frontend and backend.
- Gained hands-on experience in blockchain development, deploying the **VUE** token on a decentralized network.
- Collaborated with cross-functional teams to integrate blockchain features into web applications, ensuring secure and transparent transactions.
- Enhanced system performance by implementing caching strategies and database optimizations using **MongoDB**.
- Participated in code reviews and **Agile** development processes to deliver high-quality software solutions.

Frontend Developer Intern at GlobalBoost

Mar 2014 - Sep 2015, Washington, DC, US

- Designed and implemented responsive web interfaces using **HTML, CSS, and JavaScript**.
- Developed interactive features to enhance user experience and ensured cross-browser compatibility.
- Optimized web pages for performance, improving load speeds by 30%.
- Collaborated with team members to integrate APIs and dynamic content.
- Gained hands-on experience with version control systems like **Git** and frontend tools such as **Bootstrap** and **jQuery**.
- Debugged and tested web applications to ensure quality and functionality.

Education

Baylor University, TX, US

Sep 2011 – Jun 2014

Graduated at the top of my class with a Bachelor's degree in Computer Science, specializing in web development, database management, and software engineering.

- Graduated with a major in **Computer Engineering**, gaining a solid foundation in both hardware and software systems.
- Studied a wide range of topics including **software development, computer architecture, and data structures**.
- Gained hands-on experience with **programming languages** and technologies such as **Java, C++, and Python**.

- Engaged in **research projects** focused on **machine learning**, **network security**, and **computer systems optimization**.
- Developed problem-solving and analytical skills by working on complex engineering projects and collaborating in team environments.
- Learned about the latest trends in **artificial intelligence** and **blockchain** technology, applying this knowledge to academic projects.

Skills

- JavaScript (ES6+), React.js, Vue.js, HTML5/CSS, TailwindCSS, Web3.js, Ether.js, Wagmi
- Solidity, Ethereum, Bitcoin, Solana, Hyperledger, Smart Contract, Rust, ERC20, ERC721
- Node.js, Python, Golang, SQL/NoSQL, Restful API, Distributed Systems
- Smart Contract Auditing, CryptoGraphy, Polkadot, Cosmos, Interoperable dApps
- Git, CI/CD Pipelines, Docker, Cloud Platforms(AWS, Azure, GCP), Blockchain Node
- Tokenomics, DeFi, Truffle, Hardhat, Ganache, Remix
- Java, Kotlin, Swift, Flutter, React Native, Xcode, Android Studio
