

DARIUS METCALF

Senior Full Stack Engineer

+1 315-636-4728 • dariusmetcalf007@gmail.com • www.linkedin.com/in/darius-metcalf-2ab171349 • Palm City, FL

Summary

Senior Full Stack Engineer with 10+ years of experience in designing and developing scalable web applications using .NET Core, .NET MVC, Web API, Blazor, and Entity Framework. Proficient in building distributed microservices, cloud-native applications, and responsive frontends with React, Angular, and Blazor. Extensive expertise in integrating cloud services such as Microsoft Azure, implementing CI/CD pipelines, and containerizing applications using Docker and Kubernetes. Adept at leveraging Python and Node.js for backend services, AI/ML solutions, and real-time communication systems. Skilled in optimizing database interactions with SQL Server and Azure SQL, driving performance improvements and reducing operational costs in high-traffic systems. Proven track record of leading cross-functional teams and delivering robust, customer-focused solutions.

PROFESSIONAL EXPERIENCE

Florida Blue

Jacksonville, FL

Senior Full Stack Engineer

01/2022 - 01/2025

- Led the design and implementation of a distributed microservices architecture using .NET Core and Web API for an insurance claim system, supporting over 1 million claims annually.
- Developed a health risk assessment tool using .NET Core, Entity Framework, and Python, improving the accuracy of premium calculations for over 2 million clients.
- Designed and implemented a React-based frontend for the insurance portal, enhancing user experience with modern UI features like lazy loading and code splitting.
- Integrated Microsoft Azure services such as Azure Functions, Logic Apps, and Azure App Service to build a scalable backend system, reducing operational costs by 30%.
- Built a responsive web application using Angular and Blazor for managing insurance plans, improving user engagement by 20%.
- Leveraged Docker and Kubernetes for containerization and orchestration of .NET and Node.js microservices, increasing deployment efficiency by 25%.
- Implemented advanced search capabilities using Elasticsearch and React, improving search speed for insurance plans by 50%.
- Utilized Docker and Kubernetes for containerization and orchestration of services, deploying over 30 microservices across multiple environments.
- Utilized Azure Cognitive Services and Python for advanced data processing features like language understanding and sentiment analysis in the customer interface.
- Employed Azure DevOps to implement CI/CD pipelines for .NET and Node.js services, reducing deployment time from 3 hours to under 1 hour.

Spring Health

New York, NY

Senior Full Stack Engineer

01/2019 - 12/2021

- Led the modernization of a patient management system, migrating from a legacy PHP system to .NET Core Web API and Node.js, enhancing system scalability and reliability for over 500,000 users.
- Developed a React-based mental health assessment dashboard, integrating .NET Core and Python-based backend services to handle over 200,000 assessments annually.
- Spearheaded the migration of the frontend from Vue.js to React and Angular, reducing bundle size by 20% and improving load times for over 1 million monthly users.
- Implemented a real-time chat feature using GraphQL and Node.js, improving communication between 100,000 patients and their healthcare providers.
- Developed an AI-based recommendation engine using Python and AWS SageMaker, improving personalized care plans for 200,000 patients by 25%.
- Utilized Entity Framework with Azure SQL to optimize data retrieval, improving query performance by 35%.
- Integrated Azure services like Azure Functions and Logic Apps to build a serverless patient data processing system, reducing infrastructure costs by 30%.
- Leveraged React hooks and the Context API to manage state, improving the overall user experience and reducing app load time by 15%.

AlertMedia

Austin, TX

Full Stack Engineer

01/2017 - 12/2018

- Developed a service marketplace application using .NET Core MVC, Node.js, and Angular, increasing platform traffic by 40% and improving user retention.
- Implemented real-time notifications using WebSockets and SignalR, enhancing user engagement and improving real-time updates by 18%.
- Built a robust backend using .NET Core Web API and Python for real-time analytics, reducing data processing time by 30%.
- Enhanced the frontend with React for the marketplace application, improving the user interface and increasing form completion rates by 30%.
- Optimized SQL Server and MySQL database queries using Entity Framework and Python, improving performance by 30%.
- Led the development of a real-time chat application using Node.js and React, enhancing user engagement by 40%.
- Implemented CI/CD pipelines using Azure DevOps and GitHub Actions for .NET, Node.js, and Python services, improving deployment times by 30%.

PROFESSIONAL EXPERIENCE

TaskRabbit

San Francisco, CA

Full Stack Developer

07/2014 - 12/2016

- Led the development of a comprehensive service marketplace application using Node.js and Express.js, creating a robust backend that served thousands of users daily, enhancing platform traffic by 40%
- Utilized Node.js and MongoDB in conjunction with Mongoose ORM to create a flexible and scalable database solution for the marketplace application, reducing data access times by 25% and ensuring high availability of data
- Integrated AWS services such as RDS for PostgreSQL management, S3 for scalable file storage, and EC2 for compute services, improving application performance, storage efficiency, and compute capability
- Strengthened the security of user authentication system by implementing JWT authentication, minimizing unauthorized access by 40%
- Implemented real-time updates using WebSockets in chat application, enhancing user experience by providing instant notifications and updates, leading to an 18% increase in user retention
- Utilized Python's Pandas and NumPy libraries for data processing and analysis in internal analytics tool, contributing to data-driven decision making

SKILLS

.NET Core • .NET MVC • Web API • Blazor • Entity Framework • LINQ • C# • Python • Node.js • Express.js • RESTful APIs • GraphQL • Microservices • SQL Server • MySQL • PostgreSQL • Azure SQL • DynamoDB • MongoDB • React.js • Angular • Vue.js • JavaScript • TypeScript • HTML5 • CSS3 • SASS • Progressive Web Apps (PWA) • Redux • React Hooks • Context API • Microsoft Azure • Azure DevOps • AWS lambda • API Gateway • Docker • Kubernetes • Jenkins • GitHub Actions • Serverless Architecture • Azure Databricks • PySpark • Azure Machine Learning • PyTorch • Scikit-Learn

Education

University of Florida

Bachelor's Degree, Computer Science

2010 - 2014
