

David Gabrielson

Senior Technology Leader | Digital Transformation | AI Transformation Strategy | Quality Engineering

dsgabrielson@outlook.com <http://www.linkedin.com/in/davidgabrielson> Denver, Colorado 80465

SUMMARY

Accomplished senior technology leader with extensive experience, at the forefront of the AI revolution fundamentally transforming software development and digital product delivery. AI is already dramatically accelerating engineering tasks, but human expertise remains essential to validate its output and maintain quality standards. Doing this efficiently and rapidly is what will truly unlock accelerated engineering.

An expert in driving innovation through AI augmented development methodologies and positioning organizations to leverage the vast efficiencies of this new skill set. Brings hands-on implementation experience in AI powered testing frameworks and automated quality validation systems that have reduced delivery timelines by significant margins.

Passionate about technical leadership, mentoring professionals and building high-performing, teams where innovation thrives alongside personal growth. Proven track record of strategic vision, cross-functional leadership, and executive advisory skills with ability to provide first-rate guidance through pivotal technological transformation. Key skills highlights include:

SKILLS

AI and Modern Software Development:

LangChain, OpenAI, Anthropic, Pydantic, Python, CrewAI, Cursor, AIDER, Prompt Engineering, Azure OpenAI, AWS Bedrock, Vector DB, RAG, Git, Docker, Java, JavaScript, Oracle, Postman, C#, Node.js, SQL, AWS

Quality Engineering: Playwright, Selenium, TestNG, Puppeteer, Jest, Pytest, JMeter, Appium, TestRail, ALM

Collaboration and Project Management: Jira, Azure DevOps, Miro, Scrum, Kanban, Xtreme Programming

KEY ACHIEVEMENTS

Expanded Quality Capability

Grew team size from 10 to over 300 quality professionals across North America, contributing more than \$80M in revenue annually.

Delivered Large Transformation Programs

Delivered dozens of large mission critical engagements including a \$300M implementation of a new billing and operational system for a leading Telecommunications company.

Secured Major Engagements

Closed over \$40M in client engagements across multiple industries and influenced go-to-market success across North America.

Pioneered AI Modernization Approaches

Developed groundbreaking approaches to AI-augmented legacy modernization for major financial services firm.

EXPERIENCE

Managing Director

Slalom

Denver, CO

01/2015 - 03/2025

- As a senior leader in Slalom's Build organization, established the Quality Engineering capability, developed a best-in-class modern quality engineering approach. Grew the quality practice and expanded Slalom's footprint across North America to nearly 300 quality engineering specialists.
- Spearheaded the organization's AI transformation as it relates to Product Engineering and Software Development. Responsible for developing enablement programs for 1000s of Slalom employees.
- Pioneered groundbreaking AI modernization approaches using intelligent agents to transform legacy applications into modern architectures for Fortune 500 clients. Reducing conversion time by more than 40% while maintaining exceptional quality standards.
- Led critical engagement to develop and launch innovative AI and IoT powered products for the Purina Petivity program.
- Drove business growth through go-to-market and sales initiatives while personally delivering and leading teams delivering mission-critical solutions for Fortune 500 clients. Closed over \$40M in client engagements with government, energy, financial services, hospitality, and retail clients.
- Performed hands-on oversight for multiple, multi-year engagements, including hands-on software and platform development and operation of those solutions.

EXPERIENCE

Executive Strategy and Delivery Consultant

Seattle, WA

Alaska Airlines

01/2013 - 01/2015

- Developed the strategy, designed the process and led the day-to-day testing activities for a multi-million-dollar Airline Crew Management modernization project.
- Advised senior executives on quality assurance best-practices and developed a detailed strategy and roadmap to mature the Enterprise testing capability maturity level.
- Worked with business users and stakeholders as well as FAA auditors to conduct appropriate user acceptance testing in an efficient and effective manner.
- Implemented a sophisticated metrics based quality KPI framework that allowed for real-time accurate assessment of the quality state of this high-risk, safety critical system.

Senior Manager

Chicago, IL

U.S. Cellular

01/2010 - 01/2013

- Department Head and Leader of all aspects of Software Quality and Testing.
- Collaborated across organization boundaries to develop a strong culture of quality throughout the Enterprise.
- Implemented strict quality standards and mature testing processes based on industry best practice.
- Provided senior leadership and daily direction to a team of over 100 internal and contractor resources.
- Delivered a 3 year, \$300+ million billing and operational system transformation programs with Amdocs.

Manager - Quality Assurance

Overland Park, KS

Sprint

01/2008 - 01/2010

- Led numerous process reengineering projects aimed at improving quality of software delivery and reducing production defects by nearly 40%.
- Gained enterprise recognition as an innovator in the use of best in class metrics such as DORA other and models to drive positive change throughout the organization.

Manager - Systems Integration Consulting

Chicago, IL

Deloitte Consulting

01/2003 - 01/2008

- Directed large and diverse teams implementing multi-million-dollar systems integration programs for multiple clients without a single instance of a project slipping schedule or budget overruns.
- Successfully managed over 9 nine large-scale projects for multiple clients in the telecommunications and financial services industries.
- Created platform conversion testing strategies for Boost Mobile and US Cellular that enabled those clients to move millions of subscribers from one billing platform to another.

Prior Roles

Tokyo, Chicago

President and Founder, Adcore Japan, Tokyo | Senior Consultant, Daugherty Business Solutions, Chicago, IL

1998 - 2023

- Established Tokyo-based digital consultancy (Adcore).
- Delivered critical Oracle ERP solutions for client in telecommunications industry.
