New Braunfels, TX

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Paramount

04/2022 - 12/2024 New Braunfels, TX, United States

- Led a team of developers in building and deploying multiple ASP.NET and .NET core web applications on Azure, supporting high traffic with over 100,000 monthly active users.
- Developed and optimized complex PL/SQL packages, procedures, and triggers to enhance database performance and support critical business processes.
- Extensive experience in building dynamic and responsive web applications using Angular, with a focus on modular architecture, performance optimization, and seamless user experiences.
- Skilled in developing and managing Service-Oriented Architecture (SOA) systems to streamline service integration, improve system scalability, and enhance overall business process efficiency.
- Leveraged Entity Framework and other ORM technologies, such as NHibernate, to optimize database operations and design complex queries in ASP.NET applications.
- Hands-on experience with Azure Cosmos DB, including designing schema-free databases, implementing scalable solutions using partitioning and global distribution, and optimizing queries using SQL API.
- Extensive experience in designing and optimizing MS SQL stored procedures to streamline database operations and enhance application performance.
- Demonstrated very senior-level expertise in designing and integrating secure authentication systems utilizing OpenID and OAuth for enterprise-level applications.
- Stayed updated with the latest Azure services and trends, incorporating Azure Kubernetes Service (AKS) to streamline infrastructure management.
- Leveraged Azure AI and machine learning services to develop predictive analytics solutions, driving improved customer engagement and increased revenue.

Senior Software Engineer

Chegg

03/2021 - 03/2022 New Braunfels, TX, United States

- Developed numerous services and functions using AWS OpenSearch, ASP.NET, AWS Batch job, Spring Boot, and GraphQL, facilitating efficient data retrieval and processing.
- Experience with RabbitMQ and Apache Kafka, including designing, configuring, and maintaining message broker systems to ensure reliable message delivery and scalable event-driven architectures.
- Craft dynamic and responsive user interfaces with Angular and React, ensuring optimal performance through meticulous optimization for enhanced page speed.
- Implemented AWS Batch jobs to automate and optimize data processing tasks, improving efficiency and reducing processing time by 30%.
- Implemented GraphQL to provide flexible and efficient data querying capabilities, improving performance and reducing API response times.
- Specializing in Blazor and Razor, with extensive experience in developing dynamic web applications using ASP.NET for interactive components.
- Proficient in architecting and implementing scalable cloud solutions on Microsoft Azure, with extensive expertise in backend development and integration using C#.
- Proficient in SQL Server with extensive experience in T-SQL, including query optimization, database design, and performance tuning.
- Provided technical guidance and mentorship to junior team members, fostering a culture of knowledge sharing and continuous learning.

Software Engineer

Pluto TV

07/2018 - 02/2021 New Braunfels, TX, United States

- Built ASP.NET web application development projects, focusing on scalability and security.
- Implemented best practices such as MVC architecture and dependency injection for efficient codebase management.
- Developed dynamic user interfaces using React, prioritizing code maintainability and performance.
- Implemented Redux for state management in complex React applications, including designing predictable state containers, managing asynchronous actions with middleware, and optimizing performance through selective data fetching and memorization.
- Implemented micro-frontend architecture to break down monolithic frontends into smaller, agile modules.
- Designed communication mechanisms between micro-frontends, leveraging GraphQL and REST APIs for seamless data exchange.
- Worked closely with backend teams to define API contracts and ensure frontend-backend alignment.

SUMMARY

Experienced full stack engineer with 7+ years of demonstrable expertise in C#, ASP.NET, React, and Angular.

Committed to the development and delivery of more than 50 robust and scalable web applications aligned with both business objectives and user requirements.

Proficient in implementing microservices utilizing RESTful API and GraphQL, along with adept utilization of Azure and AWS solutions.

Consistently strive to leverage technical proficiency to drive innovation and exceed project expectations.

SKILLS

C#	.Net	.Net Core	C/C++	Web API
WinForms	LINQ	Entity Framework	T-SQL	
Blazor	Razor	Terraform	Node.js	Java
Python	MySQL	MSSQL	Azure CosmosDB	
SQL Server	PostgreSQL	MongoDB	Azure	
Azure DevOps	AWS	XUnit	Apache Kafka	
RabbitMQ	RESTful API	gRPC	GraphQL	
Git	SVN	Jira	Agile/Scrum	
Github/Gitlab	CI/CD	TDD	Docker	
Kubernetes	Jenkins			
React	Vue.js	Angular	AngularJS	
JavaScript	ES6+	Webpack	TypeScript	
Next.js	Nuxt.js	Redux	Ngrx	Jest
Cypress	Mocha	Vite	WebSocket	
jQuery				

KEY ACHIEVEMENTS

- Robust and Resilient Search System with AWS OpenSearch**
Designed and implemented a robust search system utilizing AWS OpenSearch and microservices architecture.
- HIPAA Compliance in Healthcare IT**
Ensured adherence to HIPAA regulations in healthcare IT systems, safeguarding patient data through robust privacy and security measures.
- Micro-frontends architecture**
Implemented micro-frontends architecture to enhance scalability and flexibility in frontend development.

PROFESSIONAL EXPERIENCE

Software Engineer

Stock Alert Solutions

05/2017 - 07/2018 New Braunfels, TX, United States

- Experience implementing HIPAA regulations and standards in healthcare IT systems, ensuring data privacy, security, and compliance with patient confidentiality requirements.
- Led frontend development projects, utilizing React, Angular, JavaScript, TypeScript, and Node.js to deliver dynamic and scalable user interfaces.
- Implemented reusable components and state management patterns to ensure maintainability and flexibility across projects.
- Leveraged React, Angular, and JavaScript to develop responsive and interactive user interfaces, focusing on user experience and performance optimization.
- Proficient in jQuery for DOM manipulation, event handling, and AJAX interactions, enhancing user interface functionality and responsiveness in web applications.
- Utilized TypeScript for type-checking and enhanced code reliability, enabling early error detection and improved development efficiency.
- Developed server-side applications and APIs using Node.js, ensuring seamless integration between frontend and backend systems.
- Converted Figma designs into pixel-perfect HTML/CSS, ensuring responsiveness and cross-browser compatibility, with a focus on maintaining design fidelity and optimizing load times.

EDUCATION

Bachelor's Degree in Computer Science

Texas Tech University

03/2013 - 04/2017
