Email: Deekshithreddy0303@gmail.com

Professional Summary

Integration Developer with **4 years of IT experience**, specializing in **Dell Boomi, MuleSoft Anypoint Platform, and Informatica IICS**. Proficient in designing and developing **RESTful/SOAP APIs, ETL workflows, and enterprise integration solutions**. Adept at integrating diverse systems like **Salesforce, Databases, FTP, SAP, and ServiceNow**.

Certified **MuleSoft Level-1 Developer**, with hands-on expertise in **DataWeave, JavaScript, SQL, API-Led Connectivity, and workflow automation**. Skilled in **performance tuning, API security, and deployment in CloudHub and Informatica Cloud environments**. Strong communicator and problem-solver with experience collaborating in Agile environments.

Technical Skills

Dell Boomi:

- Dell Boomi Atom Clouds, Local Atoms, Molecules
- Boomi Connectors: HTTP, Salesforce, SFTP, SAP, Database, Disk, FTP
- Data formats: XML, Flat file, CSV, Database, JSON
- Process deployment, scheduling, and performance tuning

MuleSoft:

- API Design using RAML, RESTful/SOAP APIs
- MuleSoft Connectors: HTTP, FTP, Database, SMTP
- DataWeave scripting and transformation
- API security, deployment in CloudHub
- MUnit testing and automation

Informatica IICS:

- ETL workflow development and data integration
- Source Analyzer, Target Designer, Workflow Manager
- Data cleansing, transformation, and migration

General Skills:

- Programming & Scripting: JavaScript, SQL
 - Development & Testing Tools: Postman, JIRA, Confluence, MUnit
-

Professional Experience

Dell Boomi Developer | ATNI

Client: Atlantic Tele-Network, Inc.

Technologies: Dell Boomi, Salesforce, MySQL, FTP, JSON, XML, JavaScript

- Developed **end-to-end integration** between Salesforce and FTP using **Dell Boomi**.
- Designed and implemented **custom mapping functions** using JavaScript.
- Created and optimized **Dell Boomi processes**, including transformations and API integrations.
- Conducted **unit and system testing** for integration components.

MuleSoft Developer | Fisker Inc.

Client: Fisker Inc. (Electric Vehicle Company)

Technologies: MuleSoft, CloudHub, SQL, REST APIs

- Designed **API specifications using RAML** and built complex **Mule flows**.
- Integrated **multiple data sources** into a centralized database for reporting.
- Applied **performance optimization techniques** like scatter-gather and choice routers.
- Deployed APIs and ETL workflows in **CloudHub**.

MuleSoft Developer | UKG (Ultimate Kronos Group)

Client: UKG (Human Resource Management Solutions)

Technologies: MuleSoft, FTP, Database, SMTP

- Designed **ETL workflows for payroll data processing** using MuleSoft.
- Implemented **data retrieval, transformation, and delivery**.
- Created **test cases** to ensure **90%+ code coverage**.
- Ensured **smooth data migration** across environments using **Cloudbees and Harness**.

MuleSoft Developer | CHEP

Client: CHEP (Supply Chain & Logistics)

Technologies: MuleSoft, Salesforce

- Automated **Salesforce case creation** using MuleSoft workflows.
- Developed **data synchronization mechanisms** to maintain consistency across systems.
- Integrated error handling mechanisms for improved **diagnostics and monitoring**.

Informatica IICS Specialist | TriNet

Client: TriNet (HR Solutions Provider)

Technologies: Informatica IICS, SQL, Cloudbees, Harness

- Designed and implemented **ETL workflows** for HR data migration.
- Developed **taskflows, mapping tasks, and data transformation pipelines**.
- Wrote **complex SQL queries** to facilitate **seamless data integration**.
- Migrated data across environments using **Cloudbees and Harness**.

Education

Bachelor of Technology (B.Tech) in Information Technology

SR International Institute of Technology

Certifications

- **MuleSoft Certified Developer - Level 1 (Mule 4)**
- **Completed Dell Boomi Associate Developer, Professional Developer Certification and API Management, MDM, Associate Admin, and Event streams**
