SUMMARY

- Results-driven Java Full Stack Developer with over 4+ years of experience designing and developing scalable, high-performance web applications using Java, Spring Boot, Hibernate, J2EE, and RESTful APIs, following the full Software Development Life Cycle (SDLC) to build robust enterprise solutions.
- Expert in microservices architecture, cloud computing, and DevOps, deploying applications with AWS (EC2, S3, RDS), and automating CI/CD pipelines using Jenkins, GitHub, and Terraform for software delivery.
- Strong front-end development skills in React.js, Angular, and Bootstrap, combined with experience in Kafka, JMS, and Spark to enable event-driven architectures and real-time data processing in enterprise environments.

Technical Skills

Programming Languages: Java, J2EE, Python, C++, JavaScript, TypeScript, Go, Scala, Shell Scripting

Frontend: React.js, Angular, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Ajax, Next.js, Svelte, GraphQL, Redux, Webpack, Jasmine, Mocha, Material-UI

Backend: Spring (Boot, Cloud, Security, Batch, Integration), Struts2, Node.js, Express.js, Django, Flask, FastAPI, Ruby, RESTful APIs, Microservices, SOAP, Java EE

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, DynamoDB), Azure, GCP, Terraform, Kubernetes, Docker, Jenkins, Prometheus, Grafana, Ansible, GitLab, ArgoCD, Splunk, Puppet

Databases: MongoDB, MySQL, PostgreSQL, DynamoDB, Redis, Cassandra, Elasticsearch, HBase, SQLite

Testing: JUnit, Selenium, TestNG, Jasmine, Mocha, Cypress, Postman, PyTest, Mockito

Project Management: JIRA, Trello, Scrum, Kanban, Asana, Basecamp, Confluence, Microsoft Teams, Agile

Version Control: Git, SVN, CVS, Bitbucket, GitHub, GitLab, Mercurial

IDEs & Tools: IntelliJ, Visual Studio, Eclipse, NetBeans, Xcode, VS Code, Postman, Swagger, Linux/Unix

Relevant Coursework: Advanced Algorithms, Distributed Systems, Operating Systems, Machine Learning, Big Data and Analytics, Project Management, Database Management Systems, Computer Networks, and Security.

Experience

Johnson Controls

Dec 2022 – Present

Software Developer

Capitol Heights MD, USA

- **Description:** Developed scalable cloud-based applications, automated deployment processes, and implemented design patterns to optimize system performance and reliability.
- Implemented Amazon CloudWatch for AWS monitoring, centralized logs using CloudWatch Logs, and automated workflows via AWS Lambda, reducing debugging efforts by 50% and enhancing system observability.
- Developed RESTful microservices using Java 8, Spring Boot, and Hibernate, improving API response times by 30% and streamlining database transactions with JPA in Oracle and MongoDB.
- Built a Single Page Application (SPA) using React.js, Redux, and Node.js, optimizing UI responsiveness and reducing frontend latency by 50% with improved state management.
- Developed an event-driven architecture using Kafka and Spark Streaming to process log messages, enhancing real-time data analytics and fault detection.
- Optimized large-scale data processing with Java 8 (Stream API, Time API, and Concurrency Enhancements), improving system efficiency by 35%.
- Applied J2EE design patterns (Business Delegate, DAO, Singleton) to ensure modular, maintainable, and scalable multi-tier system architecture.
- Automated build, test, and deployment processes using CI/CD pipelines with Jenkins, Bamboo, and GitHub, integrating Infrastructure as Code (IAC) principles to streamline cloud provisioning and reduce manual configurations.
- Designed and deployed Spark-based data pipelines to process Cassandra datasets, enabling real-time monitoring and log processing improvements.
- Developed and deployed applications on AWS (EC2, S3, Lambda, RDS), ensuring high availability, fault tolerance, and auto-scaling, optimizing cloud resource allocation.
- Managed GitHub repositories, optimized branching strategies, and resolved merge conflicts, ensuring seamless team collaboration.
- Containerized applications using Docker and Kubernetes, improving scalability, auto-healing, and orchestration, reducing deployment time by 40% while ensuring efficient containerization strategies for microservices.
- Configured Pivotal Cloud Foundry (PCF) for cloud-based deployments and integrated AppDynamics for real-time performance monitoring and alerting.

- Developed responsive web applications using HTML, CSS, JavaScript, jQuery, and Bootstrap, ensuring cross-browser compatibility and enhancing UI/UX.

Technologies & Tools: AWS (Lambda, EC2, S3, RDS, CloudWatch, Auto Scaling Groups), Java 8 (Stream API, Time API, Concurrency Enhancements), Spring Boot, Hibernate, Kafka, Spark Streaming, Cassandra, React.js, Redux, Node.js, Jenkins, Bamboo, GitHub, Docker, Kubernetes, Selenium, JPA, REST APIs, MongoDB, Bootstrap, CSS3, HTML, JavaScript, jQuery, Containerization, Infrastructure as Code (IAC).

Cognizant

Feb 2022 – Aug 2022

Java Full Stack Developer

Hyderabad, India

- **Description:** Managed microservices migration, messaging systems, and application monitoring and deployment.
- Designed and implemented RBAC roles (OOB) and Custom RBAC roles at Subscription and Resource Manager levels to manage Azure resources, enhancing access security and compliance policies.
- Developed and optimized high-performance web applications using Scala, Akka, and Java 8, reducing latency by 30% for high-volume transactions.
- Migrated and restructured monolithic applications to a microservices architecture using Spring Boot and REST APIs, improving system modularity and fault tolerance by 40%.
- Implemented and maintained Kafka-based messaging systems for asynchronous microservices communication, integrating OAuth-secured RESTful APIs to enhance security and scalability.
- Built and automated CI/CD pipelines using Jenkins, Docker, and OpenShift, enabling seamless deployments and reducing deployment time by 60%.
- Developed and enhanced parallel processing capabilities using Java 8 Stream API, Lambda expressions, and multithreading, boosting processing efficiency by 35%.
- Orchestrated and deployed containerized applications using Kubernetes clusters, ensuring auto-scaling and improved cloud infrastructure performance.
- Implemented and monitored Spring AOP-based transaction management, adding logging mechanisms to improve security and transaction integrity.

Technologies & Tools: Azure, Agile, Angular, Apache Kafka, Bootstrap, CI/CD, CSS, DB2, Docker, Java, JavaScript, Jenkins, JMS, JSON, Kubernetes, Microservices, OAuth, OpenShift, Oracle, PL/SQL, PostgreSQL, RESTful APIs, Scala, Spring Boot, SQL.

Verizon

May 2020 – Jan 2022

Java Full Stack Developer

Hyderabad, India

- **Description:** Contributed to building and enhancing user interfaces, backend processes, and automation, ensuring seamless data integration and application performance.
- Developed and tested RESTful APIs using Swagger, Postman, and SoapUI to validate HTTP requests, improving API reliability by 40% and ensuring seamless integration between React.js frontend and Spring Boot backend.
- Optimized frontend performance using LESS/SCSS, Bootstrap, and Node.js, reducing page load time by 30% through lazy loading, asset bundling, and efficient DOM rendering.
- Implemented JSF MVC pattern with Ties Custom Tag Library to modularize UI components, decreasing frontend development time by 25% while improving code maintainability.
- Developed reusable React.js components and directives, improving UI efficiency by 35% by reducing redundant code, streamlining state management, and enhancing the user experience.
- Designed and built an ETL process in Java to extract, transform, and load JSON file data into SQL Server, improving data migration accuracy by 50%.
- Created JUnit test cases for DAO and Service Layer methods, increasing code coverage and stability, reducing post-deployment defects by 20%.
- Integrated AWS DynamoDB for dynamic configuration storage, enabling runtime feature flagging and improving deployment flexibility with zero downtime updates.
- Implemented Spring AOP transaction management, adding logging mechanisms that ensured secure and auditable transactions, reducing failure rates by 30%.

Technologies & Tools: AOP, AWS (DynamoDB, S3), Bootstrap, CSS, CSS3, Eclipse, HTML, Java, Java 8 (Stream API, Lambda Expressions), JavaScript, jQuery, JSF, JSON, JUnit, MVC, MySQL, Node.js, PCF, React.js, S3, Spring, Spring AOP, SQL, SQL Server, SVN, Thymeleaf.

Education

University Of Maryland At Baltimore County

Aug 2022 – May 2024

Masters in Computer Science

Baltimore, Maryland

Certificates

- AWS Certified Developer – Associate.
- Oracle Certified Professional, Java SE 11 Developer.
