Professional Summary

Seasoned Database Administrator with over six years of hands-on experience, I excel in optimizing database performance, ensuring data integrity, and implementing robust security measures. Proficient in various database management systems, including SQL Server, Oracle, and DB2, I possess a strong track record of streamlining operations and enhancing efficiency through strategic planning and innovative solutions. With a keen eye for detail and a commitment to continuous improvement, I am poised to drive excellence in database management within any dynamic environment.

Skills

- **Database Management:** Installation, configuration, and setup of MS SQL Server, Oracle Database, and IBM DB2 following best practices. Performance tuning and system health monitoring. Ensuring high performance, availability, sustainability, and security.
 - **Backup and Recovery:** Monitoring backup and recovery procedures. Monitoring high availability and disaster recovery (HADR) solutions. Disaster recovery planning and implementation exercises.
 - **Database Operations:** Designing, implementing, administering, developing, testing, and demonstrating databases across different platforms. SQL installation and management in standalone and cluster environments setup. Upgrades, patching, and migration.
 - **Security Management:** Experience with database encryption solutions and data security. Implementing security at different levels of database objects using transparent data encryption, data masking, schema, and views.
 - **Reporting and ETL:** Application of CDC, SSIS, and SSRS in ETL and reporting operations.
 - **Cloud Services:** Migration and deployment of databases to Microsoft Azure Cloud services. Azure database administration experience.
 - **Additional Skills:** Failed job analysis and prevention. Good working knowledge of incident management, change management processes, and capacity planning. Documenting processes for knowledge sharing. PowerShell usage with DBA-Tools. Data warehouse experience. Capacity planning and management of very large databases (VLDB). Strong experience with MS SQL Server 2008 through 2019 administration in standalone and cluster environments.
-

Professional Experience

Database Administrator II | **First National Bank**
Sep 2021 – Present

- Partner with solution architects and development teams to configure database environments.
- Configure HA/DR solutions, including Always-On, Traditional Failover Clustering, Log Shipping, and replication.
- Perform daily health checks of databases and document processes for knowledge sharing.
- Manage multiple databases, including SQL Server, Oracle, and DB2, across production, test, and development environments.

- Use SolarWinds Database Performance Analyzer (DPA) to monitor and resolve database performance issues.
- Execute data migrations using Database Migration Assistant (DMA).
- Implement Transparent Data Encryption (TDE) and encrypted communication to secure data.
- Provide 24/7 support for OLTP and OLAP environments.
- Perform performance tuning, automate regular processes, and assist developers with query tuning.

MS SQL Database Administrator | Dell Technologies

Dec 2019 – Aug 2021

- Managed and maintained database systems, optimizing MS SQL Server, Oracle Database, and IBM DB2.
- Reduced downtime by 20% through robust backup and recovery procedures.
- Designed and implemented database solutions, boosting operational efficiency by 25%.
- Migrated and deployed databases to Microsoft Azure Cloud services.
- Enhanced data security with encryption solutions and implemented security measures like data masking.
- Documented procedures for team knowledge sharing and supported incident and change management processes.

MS SQL Database Administrator | Matheny Medical & Educational Center

Aug 2018 – Nov 2019

- Supported solution architects and developers to design database architectures for high-volume applications.
- Conducted MS SQL Server instance upgrades and database migrations.
- Tested and implemented backup and recovery methods, including point-in-time recovery.
- Designed and configured MS SQL Server databases following best practices.
- Provided technical support for production, development, and test environments.

Education

- Master of Science (Data Science and Analytics) Pennsylvania Western University, California, PA (In Progress)
- Associate Degree (Cybersecurity) Community College of Allegheny County, Pittsburgh, PA (2022)
- Master's in Business Administration (MBA) Federal University of Technology, Akure, Nigeria (2011)
- Bachelor's Degree (Banking and Finance) Ondo State University, Ado Ekiti, Nigeria (1999)

Certifications

- Microsoft Certified Azure Administrator (in view)
- Microsoft Certified Azure Fundamentals
- MCSA SQL Server 2016 Certified
- SAS programming 1 Essential

Additional Information

- Extensive experience with MS SQL Server versions 2008 through 2019.
- Proficient in PowerShell scripting for DBA tasks.
- Strong documentation skills for process standardization and knowledge sharing.
- Adept at capacity planning and managing very large databases (VLDBs).
- Experience with Azure database administration and cloud migration strategies.
