

Dinesh Kumar Nayak

Phone: 469-442-6760

Email: nk.dinesh@gmail.com

PROFESSIONAL SUMMARY:

- IT Specialist with over 15 years of experience in Analysis, Design, Development, Testing, Deployment and Maintenance/Support of Java/J2EE Applications.
- Experience in Travel/Transport/Hospitality (TTH), Banking/Financial Services (BFS), Information/Media/Entertainment (IME) industries and clients American Express, Ameriprise Financials, Dun & Bradstreet, Southwest Airlines, American Airlines, PNC Bank, J P Morgan & Chase.
- Hands on experience on Java, Servlets, JSP, EJB, Struts, Springs, Hibernate, JMS, Microservices, Spring Boot
- Experienced in deploying applications using JBOSS, IBM WebSphere Application Server, Apache Tomcat Application servers.
- Sound knowledge in working on Linux, writing shell scripts and other Linux commands.
- Experience in data modelling with Oracle, MS SQL Server, MySQL, Couchbase, Cassandra
- Experienced in branching, tagging, and maintaining the version control systems like GitHub, Subversion (SVN) on Unix/Linux and Windows platforms.
- Experience in deploying and managing micro services using Docker and Kubernetes.
- Experience in Production Support activities - handling user reported issues, bug fixing, minor enhancements, incident management, change management, and problem management and sharing on-call responsibilities.
- Experience in ITSM tools Remedy, Service Now and Cherwell.
- Proficient in using Splunk and ADX for logs, Dynatrace, and Grafana for application monitoring, Control-M for batch processing, Soap UI, Postman for service/API request/response.
- Good understanding and knowledge on AWS cloud environment and Python

EDUCATION:

- Master in Computer Applications (MCA), Biju Patnaik University of Technology, Odisha, India

CERTIFICATIONS:

- SCJP Certified Professional
- SCWCD Certified Professional
- AWS Certified Solutions Architect - Associate
- ITIL V3 Certified

TECHNICAL SKILLS:

Operating Systems	: WINDOWS, UNIX/LINUX
Programming Languages	: JAVA/J2EE, Microservices, SpringBoot, Angular, Python
Cloud Technologies	: AWS, GAIA, AZURE
Databases	: Oracle, MySQL, MS SQL Server, IBM DB2, Teradata, Couchbase, Cassandra
IDEs	: IBM WSAD, Eclipse, IntelliJ Idea
Servers	: Tomcat, JRun 4.0, WebSphere 5.1, JBoss 4.0
Containers	: Docker, Kubernetes
Monitoring Tools	: Splunk, Dynatrace, Grafana, CloudWatch, DataDog
Other Tools	: SVN, GIT, MS VSS, Postman, MS ADX, JIRA, Control-M

PROFESSIONAL EXPERIENCE:

Nov 2022 – Till Date *Associate Engineering Manager, VIRTUSA, USA*
Project: JPMC Bank – IPM Reliability Engineering

These applications used by the bankers for customers bank account opening and other functions.

- Troubleshoot user reported production issues.
- Set up new Alerts, Dashboards in Splunk and Dynatrace
- Involved in production bug fixes/minor enhancements of applications written in Java, SpringBoot, MicroServices architecture, production deployments using Jenkins pipeline.
- Supported applications on AWS platform which were developed using EC2, S3, Lambda, EKS and ECS.
- Involved in maintenance activities like application health checks, PLM/Pathcing.
- Automated certificate and Functional ID expiry report generation processes using Python.
- Involved in writing user stories/creating defects for bigger production issues.
- Managing and renewing production certificates.

Environment: Java, SpringBoot, Oracle, SQL Server, GAIA Cloud, AWS Cloud, Jenkins, Linux, Cassandra, Splunk, Dynatrace, Python

May 2022 – Nov 2022 *Senior Software Engineer, Mastech Digital, USA*
Project: PNC Bank - Capital Stream RTB Support

This is project associated with application used for applying and processing Loans for customers.

- Involved in application deployment in all environments including production.
- Troubleshoot user reported issues in production environment using Splunk, Dynatrace.
- Execute SQL queries as needed to fix data issues as well as loan/lending clause updates.
- Updating the status on a daily/biweekly/monthly basis to clients.
- Involved in writing user stories/creating defects.
- Assigning tasks to team members based on daily activities.

Environment: Java/J2EE, Oracle, Windows, Linux, Eclipse, Tomcat, GitHub, Dynatrace

Sep 2018 – May 2022 *Technical Lead, Tata Consultancy Services, USA*
Project: American Airlines - Airport Operations – Baggage

This is project associated with an application used at airport Ramp, having two interfaces – Desktop and Mobile. All the applications in Baggage Ramp area are being revamped to come under one umbrella with microservices and Couchbase. Involved in the application named “DEVIATE” which is one of the applications. Disaster Recovery site of the application to serve clients without any downtime in case of any issues.

- Troubleshoot and resolve production issues in the application on a need basis, be it level 2 or level 3.
- Set up new alerts in Splunk and Dynatrace, worked as Splunk admin.
- Fix data issues at the back end by SQL Queries in SQL Developer on the database.
- Validate application to be compatible with multiple browsers.
- Involved in application deployment in all environments including production.
- Worked with Mobility team to deploy application on mobile devices.
- Involved in writing user stories/ creating defects.

Environment: Java, SpringBoot, MicroServices, Angular 6, HTML, CSS, Oracle, CouchBase, Windows, Linux, Android, GitHub, Splunk, Dynatrace, AZURE cloud

Oct 2015 – Sep 2018 *Team Leader, Tata Consultancy Services, USA*
Project: American Airlines - AOPS Maintenance & Support

This is a support project which has support activities of four applications named Baggage Handling Systems, T-Link, Baggage Re-Route, and Ground Event Tracker (GET) NextGen which fall under Airport Automation portfolio of American Airlines. All these applications involve both L2 and L3 activities like working on tickets, code changes for bug fixes, enhancements.

- Involved in application deployment in all environments including production.
- Set up new alerts in Splunk and Dynatrace, worked as Splunk admin.
- Involved in both L2 and L3 activities.
- Involved in writing user stories/ creating defects.
- Contributed to bug fixes and enhancements.

Environment: Java/J2EE, Flex, Oracle, Windows 2007, Linux, IBM RAD, WebSphere, SABRE HTE, Flash Builder, Tortoise SVN, Splunk, Dynatrace

May 2014 – Oct 2015 *Team Leader, Tata Consultancy Services, Chennai, India*

Project: American Airlines - AOPS Maintenance & Support

This is a support project which has support activities of three applications named Baggage Handling Systems, T-Link and Baggage Re-Route which fall under Airport Automation portfolio of American Airlines.

All three applications involve both L2 and L3 activities like working on tickets, code changes for bug fixes, enhancements.

- Decided on the activities to be carried out after discussion with on-site counterpart daily and assign tasks to team members accordingly.
- Updated the status on a daily as well as weekly basis.
- Involved in both L2 and L3 activities.
- Involved in writing user stories.
- Contributed to bug fixes and enhancements.

Environment: Java/J2EE, Flex, Oracle, Windows 2007, Solaris, IBM RAD, Eclipse, SABRE HTE, Flash Builder, Tortoise SVN, Splunk

Apr 2011 – May 2014 *Technical Leader, Tata Consultancy Services, Chennai, India*

Project: Southwest Airlines - Application Maintenance & Support

There are two portfolios named Customer Experience (CE) and Business Intelligence (BI).

As a part of BI portfolio, involved in 3 different applications' (Rapid Rewards, CIRRUS and Revenue Management) support, bug fixes and enhancements.

- Decided on the activities to be carried out after discussion with on-site counterpart on a daily basis and assigned tasks to team members accordingly.
- Updated the status on a daily as well as weekly basis.
- Involved in both L2 and L3 activities.
- Involved in writing user stories.
- Contributed to bug fixes and enhancements.

Environment: Java/J2EE, Springs, Oracle, Windows XP, Linux, Eclipse, Rational ClearCase

Feb 2011 – Apr 2011 *Developer, Logica India Pvt. Ltd., Chennai, India*

Project: Gas Transportation and Management System (GTMS)/Client: Bord Gáis Éireann (BGE), Ireland

GTMS enables BGE to manage their transportation business under the commercial framework of Entry/Exit.

It meets the reporting requirements essential to the day-to-day operation of a transportation system. It provides Shippers with online access to all key information and functions to support all key communications with the Transporter. It has the flexibility to accommodate for future expansion. Provided a full audit trail for all capacity, nomination, allocation and billing processes.

- Worked on design and development of change requests.
- Performed coding and unit testing.
- Worked on deployment in production environment.
- Prepared the design document, UT cases, Support Hand over document.
- Provided Functional and Technical support to the Team.

Environment: Java/J2EE, Springs, JSF, Windows XP, Eclipse, Tomcat, Oracle 11g, Sub Version

Jun 2010 – Feb 2011 *Team Leader, Cognizant Technology Solutions, Chennai, India*
Project: Data Center Migration (DCM)/Client: Dun and Bradstreet (D&B)

Data Center Migration for NextGen Application from Berkeley Heights to Conway. The Java version was upgraded to jdk1.5 from jdk1.4. The oracle version was upgraded to 11.2.0 from 10g. The migration involved different applications NextGen, GOLF-GMC, FDS, ADS, and GCL along with the technical upgrades.

- Built, deployed, and tested applications for all functionalities in new Data Center according to the upgrades.
- Regular follow ups with integration testing and performance testing teams.
- Decided on the activities to be carried out after discussion with on-site counterpart daily and assigned tasks to 5 team members accordingly.
- Updated the status on a daily as well as weekly basis.

Technologies: Java/J2EE, JMS, XML, Linux, Eclipse, Oracle 10g

Jan 2009 – Jun 2010 *Developer, Cognizant Technology Solutions, Chennai, India*
Project: IPA Programme EOS Changes/Client: Dun and Bradstreet (D&B)

Data from SHOPS Database for UK/IR is proposed to come as GSRL 7.0 to GRATE system which is a part of GMS (Global Monitoring Solutions). This involved changes in GRATE, EPRT and Core GMS components and adding new destinations like CASE, UK-Scorecard, and IR-Scorecard.

- Involved in Analysis of current flow, Design of proposed changes.
- Development of the changes and unit testing.
- Build and deployment in all environments.
- Transferred Knowledge to the new team members and support team.

Technologies: Java/J2EE, JMS, XML, Eclipse, Oracle 10g, XSLT, Jboss 4.0, IBM MQ Server

Nov 2006 – Jan 2009 *Developer, Cognizant Technology Solutions, Hyderabad, India*
Project: Advisor Relationship Tracking (ART)/Client: Ameriprise Financial, USA

ART is a web-based application which keeps track of the relationship with Client/Advisor while interacting with various Mainframe systems. It also provides some web-based services for Refund, Transfer/Reversal, and search functionality to find Profile information of Client/Advisor. ART is used by Financial Advisors and Customer Service Representatives to track the relationships end to end i.e. from service agreement to delivery assurance.

- Involved in Analysis of the current flow.
- Prepared design documents.
- Involved in coding and unit testing.
- Transferred Knowledge to the support team.

Technologies: Java/J2EE, EJB, XML, Struts, Linux, IBM WSAD 5.1, IBM DB2
