## Security Consultant , Penetration Tester,Manager

At RED SKY Consulting, the focus is on leading red team engagements, mentoring junior team members, and conducting in-depth security assessments, including external/internal network evaluations, physical penetration testing, and application vulnerability exploitation. With a Certified Ethical Hacker (CEH) credential, they contribute to safeguarding critical systems by identifying and addressing vulnerabilities in collaboration with clients and teams.

With over a decade of information security experience, they specialize in wireless security, intrusion detection, and manual vulnerability reproduction. Dedicated to empowering teams through mentoring, training, and knowledge-sharing, their mission is to strengthen organizational resilience while advancing the security posture of client infrastructures.

Defcon Speaker as mrmojo

First person to break the registry encryption on shared folders Win95/98

## WORK EXPERIENCE

### RED SKY Consulting

#### Penetration Tester / Red Team

10/2023 - 12/2024

Death Valley, California, United States

- Leading Engagements
- Designing and implementing red team exercises for junior team members
- Mentoring 5 junior team members
- Helping 5 Junior team members with Studying for and obtaining certifications
- Training 5 Junior team members
- Supervising Junior Team members on engagements
- Scoping Engagements
- Physical Penetration Testing
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening
- LLM aided penetration testing
- Android ,OS penetration testing

**KPMG**

**Senior penetration tester**

**01/2022 – 03/2023**

**Las Vegas, Nevada, United States**

- Security Architecture Review
- Leading Engagements
- Designing and implementing red team exercises for junior team members
- Mentoring 5 junior team members
- Helping 5 Junior team members with Studying for and obtaining certifications
- Training 5 Junior team members
- Supervising Junior Team members on engagements
- Scoping Engagements
- Physical Penetration Testing
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

**Motorola Solutions**

**Senior Penetration Tester**

**10/2016 – 07/2021**

- Security Architecture Review
- Leading Engagements
- Designing and implementing red team exercises for junior team members
- Mentoring junior team members
- Helping Junior team members with Studying for and obtaining certifications
- Training Junior team members
- Scoping Engagements
- Physical Penetration Testing
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening

- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

## **Red Cell Infosec**

**10/2015 – 12/2019**

### **CEO and Lead Penetration Tester**

**Las Vegas, Nevada Area**

- Red Cell Infosec is full service firm specializing in Penetration Testing, Risk Assessment and Security Consulting. Our testers have a proven track record of delivering excellence and overcoming the unique security challenges presented by wide range of clients and industries.

## **Trustwave**

**02/2015 – 10/2015**

### **Principal Security Consultant / Penetration Tester**

**Las Vegas, Nevada Area**

- Security Architecture Review
- Scoping Engagements
- Physical Penetration Testing
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

## **CSC**

**10/2013 – 10/2014**

### **Senior Penetration Tester / Business Architect**

- Security Architecture Review
- Scoping Engagements
- Physical Penetration Testing
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

**T-Mobile**  
**Senior Security Analyst / Penetration Tester**

**05/2011 - 04/2013**  
**Richland/Kennewick/Pasco, Washington Area**

- Security Architecture Review
- Developing a Vulnerability Management & Assessment Services Program
- Scoping Engagements
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

**Integralis**  
**Penetration Tester**

**02/2010 - 05/2011**  
**Greater Boston Area**

- Security Architecture Review
- Scoping Engagements
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

**Self Employed**  
**Independant Security Consultant**

**09/2006 - 12/2009**

- Security Architecture Review
- Scoping Engagements
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment

- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening
- Physical Penetration Testing

## **Portcullis**

**02/2006 - 08/2006**

### **Senior Penetration Tester**

- Security Architecture Review
- Scoping Engagements
- Host Network and Service Enumeration
- External Network Assessment
- Internal Network Assessment
- Wireless /Bluetooth/ rfid Assessments
- Firewall Rule-set Review/Log Analysis/Access Bypassing
- Blind Web, Network, Application Assessment
- Trusted Web, Network, Application Assessment
- Automated Security Scans
- Manual Vulnerability Reproduction and exploitation
- Host and Network Based IDS/IPS Signature Annalist ,Custom Signature Creation, Rule set review
- Penetration, Bypassing, Topology and Network Deployment
- Network Security Appliance Device Assessment
- Proprietary Web Application Assessment and Hardening
- Proprietary Network Protocol Analysis
- Proprietary Operating System Review And Hardening

## **PivX Solutions**

**01/2005 - 02/2006**

### **Senior Security Researcher**

- During Dominique's time at PIVX He built, designed and maintained the black labs environment from the ground up .He developed a secure communications hub for remote security researchers in other countries. He Established, secure multi-user environment for reverse engineering. He designed and implemented an Automated Real-time, Semi-sentient data collector. (Collector scanned both underground and mainstream sources. He also designed and implemented an automated defense and intrusion protection infrastructure including honey pots, IDS, IPS and attacker profiling modules.
- He also authored both the company-wide department interaction and release policy for security threats and Threat assessment and incident response policy. He was also responsible for the security of the Pivx Networks perimeter to this end He preformed multiple application and network penetration test as part of his security duties.

## **Microsoft (contractor)**

**08/2002 - 10/2004**

### **Senior Security Consultant**

- Microsoft's Msntv Unit was the business unit responsible for developing and securing WebTV and latter Msntv .Services and Set-top Units. When I first contracted with Microsoft my main duties were four fold. My first duty was to secure the existing web infrastructure to prevent further attacks and intrusions. Second was to review the proprietary operation system on the set-top boxes for security holes. My third duty was to secure the proprietary protocols and services from further exploitation. My last duty was to infiltrate the web-TV hacking underground and create an information pipeline for the Microsoft security team. I accomplished all of these goals and more.

- In addition to these tasks I also managed to track down the major intruders and offenders hacking the web TV services and provide enough information for successful criminal prosecution. I designed and supervised the implementation of multiple security policies. When intruders exploited a documented hole in the web TV units to make them dial 911 I managed to track down the intruders, developed a method of preventing further exploitation of the web TV service, and managed to compile a complete list of all compromised units world wide by device ssid for blacklisting. I was also key in coordinating between business units of Hotmail to obtain evidence and establish a timeline for all web TV attacks. I also developed several test beds and methods of reproducing attacks.
- During my second contract at Microsoft I was in charge of the security architecture of the new operating system deployed on set top units. My main task was to review the hardware, Operating systems and services for the renamed MSNTV business unit. To my knowledge there hasn't been a single successful attack on the MSNTV/WEBTV services or hardware since I have completed the contract.

## **Wells Fargo Financial Senior Penetration Tester**

**01/2001 - 07/2001**

- Wells Fargo is one of American largest financial intuitions/Banks. Dominique's duties as a member if the IDVA/IDS (intrusion detection vulnerability analysis) black team were two fold. Dominique's primary task was to perform penetration test on Acquired banks and financial institutions prior to their inclusions to the Wells Fargo world wide banking networks. This testing was 30 percent web application and 70 percent host based.
- Dominique's secondary task was to maintain the perimeter security and intrusion detection systems for the world wide Wells Fargo networks. To this end He designed and implemented a real-time link between the wells Fargo firewalls and intrusion detection systems and a notification system for IDVA team members.
- He also designed and authored a security personnel Rota system for team members allowing 24X7 response times. He also authored multiple penetration testing tools for team use.

## **CERTIFICATIONS**

### **Certified Ethical Hacker (CEH)**

**12/2019 - 12/2023**

EC-Council

## **VOLUNTEERING & LEADERSHIP**

### **National Collegiate Cyber Defense Competition**

Guest Red Team Member

## **SKILLS**
