Objective: ❖ With a background in web application security and IT support, I specialize in identifying vulnerabilities, securing applications, and mitigating risks to protect organizations from cyber threats. As a Web Application Security Specialist, I conduct penetration testing, vulnerability assessments, and secure coding reviews, ensuring compliance with industry security standards. Beyond technical expertise, I bring strong problem-solving skills, adaptability, and a keen eye for detail, developed through years of experience in IT support and user training. I thrive in fast-paced environments, collaborating with teams to develop security protocols, incident response plans, and best practices that safeguard digital assets.

Technical Skills & Accomplishments:

- Web App Security Specialist at Orracle, LLC with knowledge on NIST compliance, HIPAA compliance and keeping systems running with the most up-to-date security concepts.
 - Knowledge of cyber security with vast levels of experience in the IT field covering cyber security monitoring and incident response, corporate security auditing, identity and access management, and network infrastructure.
 - Knowledge of Splunk and other SIEM/log analysis platforms.
 - Log analysis and cyber intrusion detection experience, churning raw logs into actionable security alerts to be fed into a remediation/vulnerability management workflow.
 - Adept at delivering pro-active cyber defense through threat hunting.
 - Experienced building custom cyber detections across a wide range of attack vectors including credential stuffing, brute force, DNS tunneling, Bot attacks, port scanning, DGA detection, DDoS, WannaCry, SQLi, etc.
 - Malware analysis, virus exploitation and mitigation/remediation techniques experience.
 - Knowledge of Bot detection, deep analysis, and mitigation.
 - Experience recreating incident timelines via deep log analysis leveraging advanced techniques like stacking, statistical analysis, event correlation and other methods of anomaly detection.
 - Highly proficient in modern advanced threat detection and analysis tools such as Bro IDS, RSA NetWitness (pcap analyzer), Splunk, FireEye, Joe Sandbox, Microsoft Advanced Threat Protection (ATP), CrowdStrike, advanced telemetry, heuristic analysis tools.
 - Strong knowledge of Enterprise network, desktop & server technologies, including experience with network intrusion methods, network containment, segregation techniques and technologies such as firewalls, web application firewalls, intrusion detection/prevention systems (IDS/IPS), packet analyzers, endpoint protection agents, honeypots, malware sandboxes, mail proxies, etc.
 - Experience working across Linux, Mac & Windows operating systems in a business environment.
 - Some experience working with Python/Java programming languages.
 - Outstanding attention to detail, logical and analytical thinking and systematic problem-solving capability with proven ability to learn new concepts quickly and succinctly.
 - Comfortable working in ambiguous situations and quickly adapting to changing events; reprioritizing efforts and resources as needed.
 - Relationship and task-oriented with great people skills that benefit to work well in teams to reach projected goals and assignments.
 - Exceptional written and oral communication skills with proven ability to communicate technical issues to technical and non-technical business area representatives.

Career History:

Web Application Security Specialist

Oracle, LLC, Lynchburg, VA February 2023 - Present

- Extensive experience has been gained by conducting vulnerability assessments and penetration tests to proactively identify and address security risks, ensuring alignment with NIST standards. Responsibilities include integrating secure coding practices into development workflows and reviewing application architectures for both regulatory and security compliance. Monitoring and responding to security threats drives the development of comprehensive security protocols, policies, and incident response plans that adhere to industry standards. In addition, clients receive education on best practices for website security and risk mitigation, fostering a proactive security culture that safeguards organizational assets and meets NIST guidelines.

Bartender

Southern Railway Taphouse, Richmond, VA March 2018 – November 2024

- I consistently maintained positive guest relationships through professional and friendly service, preparing beverages in a fast-paced environment while keeping a clean workspace. Additionally, I frequently handled opening and closing duties to facilitate smooth daily operations. By collaborating closely with team members, I ensured efficient workflows and delivered exceptional service, demonstrating strong teamwork and communication skills.

User Support Specialist

Johnson Health Center, Lynchburg, VA December 2015 – December 2017

- I delivered comprehensive technical support to end-users across various devices—computers, tablets, software, and phones—while managing Active Directory and MS Exchange user setup and maintenance. My responsibilities included troubleshooting and resolving support requests in person, via phone, or using remote tools, all documented through a ticketing system. I also oversaw network infrastructure and provided desktop support for onsite personnel and seven remote locations, ensuring minimal downtime and robust security measures. In alignment with HIPAA requirements, I supervised the management, deployment, and training of a cloud-based Electronic Medical Record (EMR) system for over 300 machines, creating user documentation for both EMR software and Office 365. Additionally, I negotiated and procured hardware and software solutions, optimizing cost efficiency and security standards. Collaborating with the CTO, I led a critical infrastructure project from new construction to completion, allocating funds for vital equipment and maintaining strict data protection protocols. This experience has equipped me with a strong foundation in cybersecurity practices, regulatory compliance, and risk management—critical for safeguarding information in a healthcare environment.

Customer Service Representative

StarTek, Lynchburg, VA March 2015 – November 2015

- I efficiently managed high-volume calls from business clients in a fast-paced, complex call center environment, addressing billing inquiries, account changes, troubleshooting issues, new product information, and complaints through multiple systems. To safeguard customer data, I consistently adhered to strict security protocols, verifying account details and ensuring personal and financial information remained protected. In addition, I meticulously documented each call, recording comprehensive notes on every action taken, which fostered accurate record-keeping and swift issue resolution. This approach enabled me to deliver prompt, effective assistance while maintaining the highest standards of customer service and data security.

User Support/Helpdesk

Randolph College, Lynchburg, VA August 2009 – June 2012

- Demonstrated strong problem-solving abilities by diagnosing and resolving a diverse range of computer and network-related issues, leveraging analytical thinking and technical expertise to deliver effective solutions. Collaborated with team members to escalate complex concerns and worked closely with customers to provide clear guidance, showcasing excellent communication and interpersonal skills. Proactively identified and reported bugs and system vulnerabilities, reflecting keen attention to detail and a commitment to preserving the integrity and security of the organization's IT infrastructure.
-

Education:

B.S. in Computer Information Systems

Liberty University, Lynchburg, Virginia

Concentration in **Cybersecurity**

2024

Honors

- Earned CompTIA Security+, showcasing a strong grasp of foundational cybersecurity principles and industry best practices.
- Recognized as a top performer for resolving an above-average volume of technical support tickets while maintaining quality standards and HIPAA compliance at Johnson Health Center.
- Placed on the Dean's List for multiple semesters, reflecting academic excellence in Information Technology courses.
- Was a part of a team that led a successful EMR deployment project under budget and ahead of schedule, resulting in increased efficiency and reduced downtime.
