

Edward Dandy

Senior Full-Stack Engineer

Bridgehampton, New York | +1 (585) 432-1697 | edwarddandy81@gmail.com

Summary

Experienced Senior Full Stack Engineer with over 11 years of experience and a demonstrated ability to design, develop, and maintain web applications using **C#, Node.js, Python, Angular, React, AWS** and **Azure Functions**. Strong expertise in both front-end and back-end technologies, including building user-friendly interfaces and managing server-side logic, APIs, and databases (**SQL/NoSQL**). Proficient in **RESTful API** development, cloud platforms like **AWS, Azure**, and version control with **Git**. Adept at solving complex technical problems, optimizing application performance, and following best coding practices. Excellent communication skills and a collaborative mindset, with a focus on delivering high-quality software in dynamic, fast-paced environments.

Education

Bachelor's Degree | Aalto University | 2009 - 2013

- Major: Computer Science
- Researched ML-translation engine with corpus database written by Python

Experience

Senior Full Stack Engineer | BitCot

Remote | Aug 2021 - Current

- Developed and maintained full-stack applications utilizing **Django** and **C#/.NET Core**, creating high-performance back-end services for scalable web applications.
- Built interactive, user-friendly front-end interfaces using **React** and **Angular**, delivering rich, dynamic user experiences across multiple platforms while integrating seamlessly with back-end APIs.
- Designed and implemented secure **RESTful APIs** using **Node.js** and **Django REST Framework** improving system integrations and optimizing data flow between microservices.
- Integrated applications with **AWS** and **Azure** cloud platforms, utilizing **EC2, Lambda**, and **Azure Functions** for serverless architecture and **S3, Blob Storage** for scalable data storage solutions.
- Leveraged **Docker** for containerization and **Kubernetes** for orchestration, streamlining the development, testing, and deployment processes while ensuring high availability and scalability.
- Architected scalable database solutions with **RDBMS systems** like **PostgreSQL, SQL Server**, and **MySQL**, as well as NoSQL databases like **MongoDB** and **Redis**, optimizing queries and improving application performance by 30%.
- Collaborated with cross-functional teams, including product owners and designers, to translate business requirements into technical specifications and deliver solutions on time.
- Conducted comprehensive unit, integration, and performance testing for **Python, C#**, and JavaScript codebases, ensuring a 95% reduction in critical post-release bugs.

Senior Backend Engineer | EcomNets

Remote | Jan 2019- Jul 2021

- Engineered and maintained scalable back-end systems using **C#, Node.js** and **Python**, ensuring

high performance and reliability for complex, high-traffic applications.

- Architected **RESTful APIs** in both **ASP.NET Core** and **Django**, optimizing backend processes and enhancing system integrations, leading to faster response times and improved API efficiency.
- Structured complex data interactions with **SQL Server** and **PostgreSQL**, implementing **ORMs** such as **Entity Framework** for C# and **Django ORM** for Python, resulting in more efficient data handling and query optimization.
- Transitioned legacy systems to modern cloud-based infrastructures on **AWS** and **Azure**, deploying services with **Azure Functions** and **AWS Lambda** while managing load balancing through **Docker** and **Kubernetes**.
- Integrated security protocols like **OAuth 2.0** and **JWT**, ensuring robust and compliant authentication systems across both C# and Python API services.
- Facilitated seamless collaboration with front-end teams using **React** and **Angular**, ensuring smooth API integration and improved data exchange, ultimately enhancing the overall user experience.

Frontend Engineer | Coderlab Technologies

OnSite | Mar 2016 – Nov 2018

- Worked on a new front-end architecture, micro front-end application architecture in **React**.
- Built scalable back-end APIs using **TypeScript** and **GraphQL** and integrated them to front-end and some micro front-end applications.
- Implemented SSR in front-end applications and built an intuitive interface to achieve prominent rankings using **React**.
- Integrated **Mixpanel** into our platform to analyze user's activities.
- Increased users and clients of the application by 20% by improving UI/UX and adding tidy and well-organized pages using **Material UI**.
- Increased test-coverage up to 60% using **Mocha**, **Jest**, **@testing-library/react** and **Cypress**.
- Participated in daily code review and PR review of other peers and mentored junior members.

Web Developer | Vention

OnSite | Mar 2013 – Feb 2016

- Collaborated with stakeholders during development processes to confirm creative proposals in **Agile workflow**.
- Built reusable components using **Angular** and **Material UI** to enhance the development process.
- Converted high-fidelity mockups into usable websites with **HTML**, **CSS**, **Bootstrap**, **JavaScript**, **jQuery**, **AJAX**, and **JSON** ensuring the pixel perfectness of 100%.
- Created a mobile version and made it stable for all platforms and browsers.
- Developed a robust ordering platform with **Angular** and **C#** and solved fault-tolerant and architectural problems in **AWS**.
- Used WebSocket for real-time widgets (chat, video transfer)
- Added new widgets and functionality and interacted with third parties. (Payment services, mail services, ...)
- Maintained back-end codebase built using **Node.js**.

Skills

- | | | | |
|-------------------------|------------------------|---------------|------------------|
| • HTML / CSS | • Node.js | • Material UI | • AWS |
| • JavaScript/TypeScript | • React/Angular | • Bootstrap | • Azure Devops |
| • C#/.NET Core | • Python | • Docker | • Azure |
| • ASP.NET/ASP.NET Core | • Django/FastAPI | • Kubernetes | • GCP |
| • Entity Framework | • RESTful APIs/GraphQL | • Jest | • Agile Workflow |
| • Blazor | • Tailwind CSS | • Cypress | |
