SUMMARY

Senior .NET Full Stack Engineer

- Highly skilled and innovative **.NET Full stack developer** with 10+ years of experience in designing, developing, and deploying scalable web applications and microservices.
- Expertise in the **.NET** ecosystem, cloud technologies (**Azure, AWS**), **GoLang, Node.js**, and modern frontend frameworks like **React** and **Angular**.
- Proven ability to lead development teams, architect robust solutions, and deliver high-quality software products that align with business objectives.
- Adept at creating **RESTful APIs**, enhancing system performance, and implementing CI/CD pipelines to streamline deployments.
- Experienced in integrating cloud-native solutions, designing secure architectures, and leveraging **DevOps** practices for continuous improvement.
- Passionate about **mentoring** junior developers, collaborating across teams, and staying **updated** on emerging technologies to drive innovation.

SKILL SET

- Programming Languages: C#, GoLang, JavaScript (Node.js, TypeScript), SQL
- Frontend: React, Angular, HTML5, CSS3, Sass
- Backend: ASP.NET Core, Web API, GoLang, Node.js
- Databases: SQL Server, Azure Cosmos DB, PostgreSQL, MongoDB, Redis
- Cloud Platforms: Azure (Blob Storage, Functions, App Services), AWS
- DevOps: Azure DevOps, Docker, Kubernetes, Jenkins, CI/CD
- Tools: Git, Postman, Visual Studio, VS Code

EDUCATION

B.S. Bachelor of Computer Science – University of Central Florida, 2011

PROFESSIONAL EXPERIENCE

Senior .NET Full Stack Engineer

Intel Corporation, Pennington, New Jersey

Sep 2018 – Present

- Architected and developed cloud-native applications using **.NET Core**, **GoLang**, and **Node.js**, deployed across **Azure** App Services and Kubernetes (**AKS**).
- Spearheaded the migration of a legacy monolithic system to a **microservices** architecture, reducing downtime by 30% and improving scalability.
- Designed and implemented robust RESTful APIs for secure inter-service communication using **ASP.NET Core** and **GoLang**.
- Utilized **Azure** services like Blob Storage, **Functions**, and **Cosmos DB** to optimize storage and processing of large datasets.
- Built modern, responsive user interfaces using React, Angular, and TypeScript, ensuring cross-browser compatibility and high performance.
- Configured CI/CD pipelines with **Azure** DevOps, Docker, and **Kubernetes** to automate deployments, improving release frequency by 40%.
- Enhanced application performance by integrating **Redis** caching and optimizing SQL queries.
- Led and mentored a team of 6 developers, conducting code reviews, pair programming, and knowledge-sharing sessions.
- Conducted thorough unit testing using **xUnit** and integration testing with Postman, maintaining 95% test coverage across projects.
- Collaborated with cross-functional teams to define technical requirements and ensure on-time delivery of key projects.

Senior Software Engineer

Steelcase, Columbus, SC

Oct 2016 – Aug 2018

- Developed and maintained enterprise-grade web applications using **ASP.NET MVC**, **C#**, and **Azure** services.
- Designed and deployed event-driven microservices with **Node.js** and **RabbitMQ**, enabling seamless communication across distributed systems.
- Implemented OAuth2.0 and Azure AD for secure user authentication and authorization across multiple applications.
- Integrated **GoLang**-based services for high-performance data processing, improving throughput for real-time analytics.
- Improved data access performance by implementing Entity Framework Core with optimized LINQ queries.
- Orchestrated Azure services like Azure Logic Apps, Event Hubs, and Azure Functions for event-driven workflows.
- Developed dynamic dashboards with **React** and **Redux** for data visualization, enhancing user insights.
- Utilized Docker containers for consistent development environments and seamless deployment pipelines.

- Created detailed technical documentation and operational guides for newly developed systems.
- Partnered with QA teams to establish end-to-end test plans, significantly reducing post-deployment defects.

Software Engineer

Intel Corporation, Columbus, SC

Sep 2011 – Sep 2016

- Contributed to the development of full-stack applications using **ASP.NET Web Forms**, C#, and SQL Server.
- Built reusable components and dynamic web pages with **JavaScript**, jQuery, and Bootstrap, ensuring enhanced user experiences.
- Designed and implemented database schemas, stored procedures, and triggers for data-intensive applications.
- Collaborated with senior developers to integrate **SOAP** and **REST APIs** for external system connectivity.
- Participated in **system design** sessions, offering insights to **optimize** performance and maintainability.
- Refactored legacy code to align with modern programming standards, improving maintainability and reducing technical debt.
- Conducted unit testing with **NUnit** and supported QA teams during integration testing phases.
- Provided on-call support to troubleshoot and resolve production issues, ensuring minimal downtime.
- Wrote technical documentation for developed features, aiding future development and maintenance.
- Actively participated in **Agile** ceremonies, including sprint planning and retrospectives, to align team goals.
