SUMMARY

Senior Java Full Stack Engineer

- Highly skilled Java Full Stack Developer with over 10 years of experience in designing, developing, and maintaining complex web applications.
- Proficient in a wide range of technologies including Java, Spring Boot, Angular, Node.js, Python, and C#.
- Adept at implementing DevOps practices to streamline development and deployment processes.
- Known for strong problem-solving skills and the ability to collaborate effectively with cross-functional teams.
- Committed to continuous learning and staying updated with the latest industry trends and best practices.

SKILL SET

- Programming Languages: Java, Python, JavaScript, C#
- Frameworks: Spring Boot, Angular, React, Node.js, Struts, Grails
- DevOps Tools: Jenkins, Docker, Kubernetes
- Databases: MySQL, MongoDB, PostgreSQL, Oracle, SQL, NoSQL, Java DB (Apache Derby)
- Cloud Platforms: AWS, Azure
- Version Control: Git, SVN
- Web Technologies: HTML, CSS, TypeScript
- Java Tools: JDK, JUnit, Hibernate, Spring Data JPA, jOOQ, JDBC
- Methodologies: Agile, Scrum
- Other Tools: RESTful APIs, Microservices Architecture, Maven, Gradle

EDUCATION

B.S. Bachelor of Computer Science – University of Central Florida, 2011

PROFESSIONAL EXPERIENCE

Senior Java Full Stack Engineer

Intel Corporation, Pennington, New Jersey

Sep 2018 – Present

- Led a team of developers to build a scalable e-commerce platform using **Java**, **Spring Boot**, and **React**, resulting in a 20% increase in online sales.
- Implemented CI/CD pipelines using Jenkins and Docker, reducing deployment times by 30%.
- Developed RESTful APIs to integrate with third-party services, enhancing the platform's functionality and user experience.
- Utilized **Python** for data processing and automation tasks, improving operational efficiency by 25%.
- Conducted code reviews and mentored junior developers, fostering a culture of continuous improvement and knowledge sharing.
- Collaborated with UX/UI designers to create intuitive and responsive web interfaces.
- Optimized database queries and improved application performance, reducing load times by 50%.
- Implemented security best practices, ensuring compliance with industry standards and reducing vulnerabilities.
- Managed cloud infrastructure on **AWS**, achieving high availability and scalability.
- Designed and deployed **AWS** solutions including EC2 instances, S3 storage, and RDS databases, ensuring robust and scalable infrastructure.
- Integrated Node.js for real-time features, enhancing user engagement and interactivity.
- Architected and implemented a **microservices**-based architecture, breaking down the monolithic application into independent, deployable services, improving system scalability and fault tolerance, allowing for more efficient resource utilization and easier maintenance.
- Participated in **Agile** ceremonies, contributing to sprint planning, daily stand-ups, and retrospectives.

Senior Software Engineer

Steelcase, Columbus, SC

Oct 2016 – Aug 2018

- Improved system performance by 40% through the implementation of standardized ITIL processes, enhancing service delivery and customer satisfaction.
- Developed a customer relationship management (CRM) system using **Java**, **Spring MVC**, and **Hibernate**, streamlining client interactions and improving customer satisfaction.
- Integrated **DevOps** practices, including automated testing and continuous integration, leading to a 35% reduction in bugs and faster release cycles.
- Created dynamic web applications using JavaScript frameworks like AngularJS and React, enhancing user engagement and interactivity.
- Implemented **microservices** architecture, improving system modularity and scalability.
- Designed services to handle specific business functions, ensuring each service could be developed, deployed, and scaled independently.
- Designed and maintained databases using MySQL and MongoDB, ensuring data integrity and performance.

- Collaborated with cross-functional teams to gather requirements and deliver solutions that met business needs.
- Utilized **Python** for scripting and automation, reducing manual tasks and increasing productivity.
- Conducted performance tuning and optimization, resulting in a 40% improvement in application speed.
- Provided technical support and troubleshooting, resolving issues promptly and maintaining system uptime.
- Integrated **C#** for backend services, enhancing system interoperability and performance.
- Managed cloud infrastructure on **Azure**, deploying and managing services such as Azure App Services, Azure SQL Database, and Azure Functions to ensure high availability and performance.
- Participated in code reviews and knowledge-sharing sessions, promoting best practices and continuous learning.

Software Engineer

Intel Corporation, Columbus, SC

Sep 2011 – Sep 2016

- Assisted in the development of web applications using **Java**, **JSP**, and **Servlets**, contributing to various projects and gaining hands-on experience.
- Implemented **front-end** features using HTML, CSS, and JavaScript, enhancing the user interface and experience.
- Worked with senior developers to integrate backend services and APIs, ensuring seamless functionality.
- Participated in **database design** and development, creating efficient schemas and queries.
- Conducted unit testing and debugging, ensuring code quality and reliability.
- Collaborated with team members to **troubleshoot** and resolve technical issues.
- Gained experience with version control systems like **Git**, managing code changes and collaborating on projects.
- Assisted in the deployment and maintenance of applications, ensuring smooth operation and minimal downtime.
- Attended training sessions and workshops to stay updated with the latest technologies and best practices.
- Contributed to documentation and knowledge base, supporting team members and improving project transparency.
- Integrated **Node.js** for server-side scripting, enhancing application performance and scalability.
