ABOUT

I am a full-stack engineer focuses on JavaScript and its frameworks like React, Angular, Vue.js, and Node.js. I am also excels at working with other dynamic programming languages such as C#, Python, and PHP and building mobile apps with React Native. I'm skilled in several DBs, UI/UX design systems, architecture, and Cloud environments. I am passionate about learning cutting-edge technologies and solving challenges.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

[Guidepoint](#) | [May 2023 - Present](#)

- Senior Software Engineer responsible for developing and maintaining Guidepoint's CRM platform.
- Enhanced legacy CRM features using PHP, HTML, CSS, and JavaScript.
- Led technical evaluations to architect a micro-frontend solution and built proof-of-concept and skeleton applications.
- Modernized legacy features (e.g., Notes, Search, Advisor Portal, ID Verification) by developing new micro-frontend applications with React, Vite.js, Rollup.js, MUI, Storybook, and TypeScript.
- Developed microservice-based API services and databases using Node.js, AWS (CDK, Lambda), and MS SQL Server.
- Practiced Test-Driven Development (TDD) with Jest, React Testing Library, and Cypress.
- Built a GenAI-powered payment bot using Python, LangChain, and AWS Bedrock, with Transcribe and Polly integration for voice interaction and payment processing.
- Conducted user research and feedback sessions to improve the application experience.
- Reviewed code and mentored junior developers to elevate team performance.
- Designed and implemented a Docker-based local development environment.
- Supported Devops team to implement and manage the CI/CD pipeline using CircleCI.

Skills: JavaScript, TypeScript, React, Node.js, Python, AWS, Micro-frontend, Microservices, MUI, PHP, Redux, Gen AI, Express.js, Jest, Cypress, React Testing Library, Docker, MS SQL Server, Storybook

SENIOR SOFTWARE ENGINEER

The College Board | Jul 2019 - Mar 2023

- Worked as a Senior Software Engineer to develop and maintain the BigFuture platform at The College Board.
- Developed and maintained accessible UI component libraries built using React, TypeScript, Styled-components, Storybook, and SCSS and managed a collection of npm package libraries for components and services.
- Developed the static sites to show the company's main services, events, and educational resources using Gatsby and optimized the performance to improve page load times and load assets.
- Implemented server-side business logic using AWS Lambdas, DynamoDB, S3, CloudWatch, CloudFormation, Serverless Framework.
- Participated in College Board event mobile app development using React Native.
- Wrote unit tests(Jest, Mocha, Enzyme, React Testing library) and automated tests(Cypress) to test UI and business functionality and increased E2E test coverage.
- Maintained documentations on configs, onboarding, use-cases, etc, for engineers, product owners, and clients.
- Helped and mentored junior engineers and new members for the onboarding exercises

Skills: JavaScript, TypeScript, React, Node.js, React Native, Gatsby, Microservices, Serverless Framework, styled-components, AWS, Redux, Express.js, Jest, Cypress, React Testing Library, Storybook

SENIOR FRONTEND ENGINEER

CSAA Insurance Group, a AAA Insurer | Jul 2016 - Jul 2019

- Developed and maintained a consumer-facing platform and a payment platform using React, Redux, and Material-UI.
- Developed an Auto/Property policy platform using Vue.js, Vuex, Vuetify.
- Worked in a distributed/cloud-based environment including AWS and Kubernetes.
- Performed technical code reviews and pair programming.
- Partnered with other teams to ensure the service ecosystem was loosely coupled and scalable.

Skills: JavaScript, TypeScript, React, Node.js, Vue.js, Material-UI, AWS, Redux, REST APIs, Jest, Vuex, Vuetify

SOFTWARE DEVELOPER

BSA Health System | Aug 2015 - Jul 2016

- Developed the patient portal platform using Angular, Material Design, Node.js/Express, and MySQL
- Created and architected the frontend codebase and implemented the main frontend technical stacks, formatting, and linting tools
- Developed the main features(Auth, Dashboard, Resources, Blog) and some scheduling features.
- Integrated the Google Calendar API and Zoom API to manage the scheduled events and Zoom sessions between patients and doctors.
- Integrated WordPress API, Vimeo, and Acuity APIs to develop the resources and blog pages.
- Deployed the platform to AWS ECS

Skills: JavaScript, Angular, Material Design, Node.js/Express.js, AWS, REST APIs, MySQL, 3rd party APIs

EDUCATION

BACHELOR OF ENGINEERING, MAJOR IN COMPUTER SCIENCE

Texas State University | 2011 - 2015
