SUMMARY

- QA Manual Tester with 4+ years of experience in executing comprehensive test strategies across web and enterprise applications, consistently maintaining high-quality standards and reducing production defects through methodical testing approaches.
- Results-driven professional with proficiency in test planning, defect management, and quality assurance methodologies, demonstrating success in improving product reliability and streamlining testing processes across multiple projects.
- Strategic team collaborator skilled in translating complex requirements into effective test scenarios, while leveraging modern testing tools and techniques to enhance product quality and accelerate development cycles.

SKILLS

Methodologies: SDLC, Software Testing Life Cycle (STLC), Agile (Scrum)

Programming Languages: Python, C, C++

Web Language: HTML, CSS, JavaScript, Bootstrap

Testing Techniques: Functional Testing, Black Box Testing, White Box Testing, Regression Testing, Integration Testing, User Acceptance Testing (UAT), Edge Case Testing, End-to-End Testing, System Testing, Data Validation Testing, Usability and User Experience (UX) testing, Unit Testing, Cross-browser Testing, API Testing

Automation Tools & Frameworks: Selenium WebDriver, TestNG, JUnit, PyTest, Cucumber

Test Management and Documentation: Test Case Writing, Test Design & Planning, Test documentation skills, Bug Life Cycle Management, Test Management Tools (TestRail, qTest, Zephyr)

Testing Tools: Postman, JMeter

Project Management Tool: Jira, Confluence

Soft Skills: Strong communication, Analytical thinking, Problem-solving, Attention to detail, Cross-functional team collaboration

EDUCATION

Master of Science in Computer Science | University of Central Oklahoma

December 2024

Bachelors of Science in Computer Science and Engineering | Institute of Science and Technology

November 2019

PROFESSIONAL EXPERIENCE

QA Manual Tester | Humana, Oklahoma

August 2024 - Current

- Developed and executed comprehensive test cases using **Agile (Scrum)** methodologies and the **Software Testing Life Cycle (STLC)** to validate functionality of patient management systems, ensuring seamless platform operation and enhanced user satisfaction.
- Collaborated with cross-functional teams, leveraging tools like **Jira** and **Confluence** for test planning and defect tracking, to address healthcare regulatory requirements, ensuring compliance and reducing risk of regulatory breaches.
- Conducted extensive **functional testing**, **regression testing**, and **data validation testing** on telehealth solutions, identifying and resolving critical defects, which improved remote consultation reliability and patient-provider interactions.
- Validated billing systems through **end-to-end testing** and **system testing**, using **Postman** and **JMeter** for API performance evaluation, ensuring compliance with healthcare reimbursement standards and improving transaction accuracy.
- Authored detailed test documentation, including **test design**, **test cases**, and **defect logs**, while utilizing analytical thinking and problem-solving skills to streamline the bug lifecycle and ensure efficient defect resolution.

QA Manual Tester | Vivma Software Inc, India

May 2019 - December 2022

- Led end-to-end manual testing activities within **STLC framework**, performing **functional**, **black box**, and **integration testing** across web applications while maintaining 95% test coverage through structured test design and execution.
- Collaborated in an **Agile/Scrum** environment to analyze requirements, create test plans, and conduct UAT and system testing for enterprise solutions, resulting in 40% reduction in post-release defects using **JIRA** for defect tracking.
- Developed and maintained comprehensive test documentation including **test cases**, **bug reports**, and test execution results, while managing complete bug life cycle from identification to verification using test management tools.
- Implemented thorough cross-browser testing strategy, along with extensive data validation and edge case testing, identifying 100+ critical UI/UX issues before production deployment.
- Enhanced test coverage by conducting detailed **usability testing** and **user experience validation**, while collaborating with development team for **API testing** using **Postman**, resulting in faster bug resolution time.

PROJECTS

Manual Testcases for Registration Process (Daraz): Executed comprehensive testing of Daraz's registration system, validating phone numbers, password requirements, and name formats. Identified critical validation gaps and provided recommendations to enhance system security and user experience.

Manual Testcases for Registration Process (Pickaboo): Conducted end-to-end testing of Pickaboo's registration module, focusing on input validations for user credentials. Evaluated edge cases and documented system vulnerabilities to improve platform reliability.

Load Testing with Jmeter: Performed load testing using Apache JMeter to analyze system performance metrics including throughput, response times, and APDEX scores. Identified performance bottlenecks and recommended optimization strategies.
