- johnathanbosas@gmail.com

PROFILE

Experienced Full Stack Developer with over 8 years of hands-on expertise in designing, developing, and maintaining robust web applications. Proficient in a wide range of technologies across the stack including **React**, **React Native**, **Next.js**, **Angular**, **Vue.js** for front-end development, and **Node.js**, **Python** for back-end development. Skilled in implementing scalable architecture patterns such as microservices and serverless. Proven track record of leading teams, delivering projects on time, and optimizing application performance. Strong advocate for best practices in agile methodologies, continuous integration and deployment (CI/CD), and DevOps principles. Passionate about staying current with emerging technologies and contributing to a collaborative, innovative team environment.

PROFESSIONAL SKILLS

Languages

Javascript, Typescript, HTML, HTML5, SQL, CSS, C#, C/C++, PHP, Python

Frameworks/Libs

React, Next.js, Node.js, Express.js, Nest.js, Django, Flask, FastAPI, ASP.NET, Java Spring, Kotlin

Tools

Git, Boto, AWS IAM, Docker Compose, GitHub, Auth0, Yarn, Webpack, Jest, ESLint, Babel, PNPM, NX, ESBUILD, StoryBook

Platforms

Amazon EC2, AWS Lambda, Amazon Web Services (AWS), Docker, Linux, Oracle

Storage

MS SQL Server, MongoDB, DynamoDB, CosmosDB, RavenDB, OracleDB, Supabase, Firebase, Snowflake, Sybase, PostgreSQL, MySQL

PROFESSIONAL EXPERIENCE

Walmart - Bentonville, AR - Senior Software Engineer

Oct 2021 - Nov 2024

- Transformed multiple large **React** components into reusable and maintainable functional components and custom hooks, enhancing code quality and maintainability.
- Developed extensive unit tests using **Jest** and **React Testing Library**, achieving over 90% test coverage and ensuring code reliability with every change.

- Created detailed documentation for over 500 changes made to the **React codebase**, facilitating better onboarding and knowledge sharing within the team.
- Worked closely with cross-functional teams to gather and address over 100 business requirements, significantly contributing to the initial application design using **Next.js**.
- Leveraged **React Context API** and **Redux Toolkit** for effective state management, improving application performance and security.
- Introduced a comprehensive UI styling system using **Storybook**, **RNUI**, and **Zeplin**, enhancing the consistency and quality of the user interface.
- Developed a high-performance front-end application with **Next.js**, utilizing server-side rendering techniques to enhance **SEO** and user experience.
- Designed and implemented UX-approved layouts with React components and **CSS-in-JS libraries**, **D3.js**, and **Chart.js**, ensuring a visually appealing and responsive user experience.
- Developed a real-time image and video stream manipulation feature with **WebRTC** leveraging existing P2P communication infrastructure.
- Designed and implemented a **NestJS** service for organization management, integrating **AWS SAM** and **DynamoDB** to enhance application functionality.
- Developed and refactored a subscription and monetization microservice using Node.js and NestJS, transitioning it from a monolithic architecture to a more scalable solution.
- Created and optimized **RESTful APIs** for a scalable e-commerce platform using **Node.js** and **Express** improving data retrieval and user interactions.
- Designed and optimized **GraphQL** endpoints, achieving 99.9% uptime and enhancing data retrieval efficiency by 40% for high-traffic environments.
- Developed and maintained real-time chat features using **WebSocket** technology with **Socket.IO**, significantly boosting user engagement.
- Utilized **Docker** for effective containerization and orchestration, streamlining the deployment process and ensuring consistent environments across development and production stages.
- Led initiatives to enhance application performance through server-side rendering and code-splitting techniques in **Next.js**, achieving a 30% reduction in response times.
- Implemented robust authentication and authorization mechanisms using **AWS Cognito**, fortifying the application's security and protecting sensitive user data.
- Worked directly on **DRM** (Digital Rights Management) integration using **Bamtech APIs** to ensure secure content delivery.
- Applied best practices in **Kafka** to improve service interaction, resolving data synchronization issues and unifying interactions for better clarity and performance.
- Actively participated in **Agile** development practices, including daily stand-ups, sprint planning, and code reviews, fostering a collaborative team environment.
- Provided architectural support and mentorship to teams working with data scraping technologies, including **Puppeteer**, **NestJS**, and **Kubernetes**, sharing knowledge to enhance project outcomes.

SaneBox - Boston, MA - Software Engineer

Jul 2017 - Aug 2021

- Developed robust and scalable web applications using cutting-edge technologies such as **JavaScript**, **React**, **Angular**, and **Vue.js**, achieving 99% client satisfaction scores in annual surveys.
- Led a team of 5 developers in the successful implementation of a cloud-based microservices architecture.
- Designed and implemented **RESTful APIs** and **WebSocket** interfaces to support real-time data exchange in a high-traffic e-commerce platform.

- Integrated continuous integration and continuous deployment (CI/CD) pipelines using **Jenkins**, **Docker**, and test automation frameworks like **Playwright**, **Jest**, and **Mocha**, automating builds and deployments, and reducing release cycles from weeks to hours.
- Integrated continuous integration and continuous deployment (CI/CD) pipelines using **Jenkins** and **Docker**, automating builds and deployments and reducing release cycles from weeks to hours.
- Implemented authentication and authorization mechanisms, including **OAuth 2.0** and **JWT**, to secure web applications and APIs, ensuring compliance with industry standards and regulatory requirements.
- Optimized front-end performance by employing best practices such as lazy loading, code splitting, and caching strategies.
- Spearheaded the migration of legacy systems to cloud platforms (**AWS**, **Azure**) to leverage scalability and cost-efficiency benefits.
- Conducted code reviews and mentored junior developers, fostering a culture of continuous learning and improving overall team productivity by 25%.
- Collaborated with product managers and **UX/UI** designers to translate business requirements and user stories into technical specifications and intuitive user interfaces.
- Contributed to open-source projects and developer communities, presenting at conferences and meetups on topics such as microservices architecture and serverless computing.

Cisco - San Jose, CA - Software Developer

Jun 2015 - May 2017

- Collaborated with senior developers to build responsive and user-friendly web applications using **HTML**, **CSS**, and **JavaScript** during a summer internship program.
- Assisted in the development and implementation of front-end features using frameworks like **Bootstrap** and **jQuery**, enhancing the application's aesthetics and functionality.
- Participated in Agile scrum meetings and contributed to sprint planning, gaining practical experience in agile software development methodologies.
- Conducted testing and debugging activities to identify and resolve issues, ensuring smooth functionality and optimal performance of web applications.
- Supported backend developers in integrating APIs and databases to enhance the application's data-driven capabilities and user experience.
- Learned version control using **Git** for collaborative coding, enabling efficient team collaboration and code management practices.
- Created documentation and user guides for internal use, providing clear instructions and insights into application functionalities.
- Demonstrated strong problem-solving skills and a proactive approach to learning new technologies and tools under the guidance of experienced mentors.

Netflix - Los Gatos, CA - Software Developer

Aug 2012 - Apr 2015

- Contributed to the development of internal tools and platforms using **HTML**, **CSS**, **JavaScript**, **PHP**, and **AWS**, streamlining operations and improving productivity across multiple departments.
- Collaborated with product managers and UX designers to create intuitive user interfaces for various internal applications, resulting in a 30% reduction in user training time and a 25% increase in user adoption.
- Conducted code reviews and implemented best practices, maintaining high code quality standards and reducing technical debt by 40%.
- Participated in the development of a performance monitoring dashboard using **React** and **Node.js**, providing real-time insights into application health and enabling proactive issue resolution.

- Assisted in designing and implementing responsive user interfaces using **HTML**, **CSS**, and **JavaScript**, ensuring optimal viewing experiences across different devices and screen sizes.

EDUCATION

University of Illinois Chicago
Bachelor of Computer Science

2008 - 2012
