

SUMMARY

- Over 5 years of experience in software testing with strong expertise in test automation, quality assurance, and functional validation for scalable and reliable software applications.
- Proficient in designing and maintaining test automation frameworks using Tosca, Selenium WebDriver, and Appium, ensuring robust and reusable test architectures.
- Hands-on experience with Java programming, enabling seamless integration of automation scripts with complex application functionalities.
- Skilled in comprehensive web services testing (REST APIs) using tools like Postman and automated API validation with Rest Assured.
- Strong background in creating and managing test plans, writing and executing test cases (white, gray, black box testing), and identifying key areas for optimization in testing processes.
- Adept at using SQL for backend data validation and query optimization to ensure database integrity during testing.
- Proficient in industry-standard tools such as IntelliJ, Eclipse, Android Studio, GitHub, and JIRA, streamlining development, testing, and collaboration workflows.
- Experienced in CI/CD pipelines using Jenkins and Docker, enabling smooth automation of testing processes across diverse environments.
- Demonstrated ability to lead and collaborate with cross-functional teams, providing technical mentorship and ensuring seamless delivery of high-quality software products.
- Thorough knowledge of Agile/Scrum methodologies, with a proven record of aligning testing strategies with project timelines and business objectives.
- Strong experience in collaborating with cross-functional teams to identify bugs, improve code quality, and ensure adherence to project timelines.
- Known for fostering clear communication and building strong relationships with stakeholders to deliver business-focused solutions.

EDUCATION

Master's in Computer Science | University Of Central Missouri, USA

Aug 2024

Bachelors in Computer Science and Engineering | Chalapathi Institute of Technology, India

Apr 2019

SKILL S

Programming Languages: Java, Python, Groovy

Test Automation Tools: Tosca, Selenium WebDriver, Appium, TestNG

Testing Expertise: Functional, Regression, API, Performance Testing, Black/Gray/White Box Testing

Web Services Testing: REST APIs using Postman, API Automation with RestAssured

Database Skills: SQL (MySQL, PostgreSQL) for query validation and backend testing

IDE & Development Tools: IntelliJ, Eclipse, Android Studio

CI/CD Tools: Jenkins, Docker, Git, GitHub

Collaboration & Management: JIRA, Confluence, Swagger

Methodologies: Agile/Scrum, SDLC, STLC, Test-Driven Development (TDD)

EXPERIENCE

Virtusa | Senior Consultant

Dec 2022 – May 2023 |India

- Contributed to project planning and development by attending team meetings, analyzing requirements, and providing valuable feedback on code quality and testability.
- Designed and executed test cases (white, gray, black box) to validate core functionalities, ensuring compliance with project specifications and standards.
- Developed and maintained software quality assurance (SQA) test plans, identifying risks, dependencies, and critical test areas to ensure project deliverables met quality benchmarks.
- Automated UI and backend testing using Tosca, reducing manual effort by 40% and increasing test coverage significantly.
- Integrated automated test suites into Jenkins pipelines, facilitating continuous integration and rapid feedback loops for development teams.
- Performed root cause analysis for failed test cases, addressing issues in code logic, configuration, and environment settings, leading to a 20% improvement in reliability.
- Regularly collaborated with developers and cross-functional teams to ensure early identification of bugs and seamless implementation of fixes.
- Enhanced the overall testing process by introducing reusable test scripts and optimizing test execution times, ensuring efficient resource utilization.
- Streamlined reporting by integrating JIRA workflows with test execution pipelines, providing real-time updates to stakeholders.
- Led retrospective sessions to identify opportunities for process improvements, contributing to a 15% boost in overall team work.

- Led the development of detailed SQA test plans for large-scale projects, ensuring comprehensive testing coverage for functional, regression, and performance requirements.
- Conducted API testing using Postman and automated API validation using RestAssured, resulting in a 35% improvement in early defect identification.
- Implemented parallel execution of test cases, optimizing testing pipelines and reducing overall execution times by 30%.
- Enhanced test data management using Docker containers, streamlining processes and reducing environment setup time by 20%.
- Spearheaded the migration of legacy test scripts to modern automation frameworks, increasing maintainability and reducing execution times.
- Collaborated with cross-functional teams to resolve critical issues, troubleshoot bugs, and implement efficient solutions, ensuring on-time project delivery.
- Facilitated shift-left testing practices, enabling defect identification early in the SDLC and reducing defect leakage by 18%.
- Designed and implemented automated workflows for backend validation, reducing manual intervention and improving accuracy.
- Provided technical mentorship to team members, fostering skill development and ensuring adherence to industry best practices in testing and automation.
- Conducted root cause analysis for failed test cases, recommending fixes and enhancing the reliability of test suites.
- Developed and maintained a knowledge base for test automation, providing comprehensive resources for onboarding new team members and increasing productivity.
- Led initiatives to integrate performance benchmarks into the testing lifecycle, ensuring system scalability and reliability.
- Built customized dashboards in JIRA to track defect trends, improving visibility for project stakeholders.

Chamarthy Data Solutions | Software Engineer**May 2018 – Feb 2021 | India**

- Transitioned from manual testing to automated regression testing using Selenium WebDriver, leading to a 25% reduction in overall testing time.
- Designed and executed reusable test scripts, improving test coverage across multiple modules and reducing redundancies.
- Conducted backend validation using SQL queries, ensuring the accuracy and consistency of critical data during testing processes.
- Created and executed unit tests for multiple application layers, identifying and resolving coding errors early in the development lifecycle.
- Integrated automated test scripts into CI/CD pipelines using Jenkins, enabling continuous testing for every build deployment.
- Conducted browser compatibility testing using Selenium Grid, ensuring seamless performance across various devices and platforms.
- Played a key role in knowledge-sharing sessions, improving team collaboration and ensuring the smooth onboarding of new hires.
- Developed automation frameworks for unit and integration testing, reducing manual workload and ensuring consistent quality across releases.
- Managed test data creation and configuration for diverse testing scenarios, enhancing the robustness and effectiveness of testing efforts.
- Conducted performance testing to identify system bottlenecks and provided actionable recommendations to optimize application performance.
- Collaborated with developers to improve error-handling mechanisms within test scripts, reducing false positives and improving reliability.
- Automated report generation for test results, providing clear and actionable insights for project stakeholders.
- Supported cross-functional teams in creating testing strategies tailored to project requirements, aligning efforts with business objectives.

CERTIFICATIONS

-
- Certified Tricentis Tosca Automation Specialist
 - Certified Selenium Automation Tester
