SUMMARY

Bringing 6 years of expertise in JavaScript (Node.js) and Java (Spring), delivering scalable applications and robust APIs.

Experienced in Test-Driven Development, Agile workflows, and leveraging Git for version control.

Skilled at optimizing code performance, solving complex technical challenges, and excelling in remote, cross-functional teams. Adept at working closely with clients to gather feedback and ensure solutions meet their needs, driving satisfaction and long-term relationships.

Quick to adapt to new technologies and methodologies to meet project goals.

SKILLS

Programming Languages

- Java (Spring)
- JavaScript, Typescript (Node.js)

Web Development

- Frontend: HTML, CSS, React , Angular
- Backend: Node.js, Spring Boot

Software Development Practices

- Test-Driven Development (TDD)
- Agile Methodologies (Scrum, Kanban)
- Continuous Integration/Continuous Deployment (CI/CD)

Database Management

- Relational: PostgreSQL
- NoSQL: MongoDB

Tools & Technologies

- Jenkins
- Jira
- Redis

Languages

- English: Fluent
- Portuguese: Native
- French: Basic

EDUCATION

Universidade Federal de Goiás

Bachelor's Degree in Computer Engineering
2014 – 2020

PROFESSIONAL EXPERIENCE

Capgemini – Systems Development Analyst | 03/2021 – 03/2024

- Played a key role in the full-stack development and maintenance of an intranet portal used by all collaborators at Banco do Brasil, one of the largest financial institutions in Brazil with a significant international presence.
- Remapped the Gitflow, significantly reducing the incidence of lost code and improving the version control process for the team.
- Verified commits and ensured adherence to code quality standards and established coding styles.
- Provided technical insights and actively participated in story refinements and sprint planning sessions to enhance delivery and project clarity.
- Oversaw bi-weekly releases, ensuring smooth deployment of updates and bug fixes.
- Utilized Jira for project management, Jenkins for continuous integration, and Redis for data caching to optimize system performance.
- Technologies used: Typescript, Node.js, MongoDB, Angular, Unit Testing, Agile Methodologies, Micro-services, Redis.

Megasoft – Full Stack Developer | 01/2020 – 02/2021

- Played a crucial role in the development and maintenance of MegaWebAdm, a software solution designed to automate and assist public administration processes.
- Worked as an independent developer in a small team of 4, focusing on a specific segment of the software, and took full ownership of both front-end and back-end development tasks.
- Implemented features in Java 11 using Spring for back-end development and built the front-end with Angular to create a user-friendly interface.
- Created SQL update scripts to support new features and ensure smooth database migrations.
- Utilized Jira for project management, ensuring smooth coordination of tasks and tracking of project progress in an Agile environment.
- Technologies used: Java, Gradle, Spring, Angular, PostgreSQL, Agile Methodologies, Liquibase.

Ecxsus – Full Stack Developer | 06/2019 – 12/2019

Ecxsus – Intern | 09/2017 – 06/2019

- Started as an intern and transitioned into a full-time role as a Programmer upon nearing graduation.
- Worked in a small team of developers on the development and maintenance of Automot ERP, an automation solution for motels and hotels.
- Implemented features and functionality using Java 7/8 and Spring Boot for back-end development.
- Designed and implemented Node.js microservices to enhance system modularity and scalability.
- Built React Native components for mobile applications, improving accessibility and user experience.
- Worked in an Agile environment with a focus on Test-Driven Development (TDD) to maintain high code quality and rapid delivery.
- Technologies used: Java, Spring Boot, React Native, Angular, Node.js, PostgreSQL, Agile Methodologies, Test Driven Development.
