EXPERIENCE

Search Engine Optimization Specialist

Expert Locksmith

May 2024 - November 2024, Mississauga, ON

- Conducted thorough **keyword research** to identify relevant search terms, such as "locksmith in Mississauga" and "emergency locksmith," targeting both high-volume and long-tail keywords. This helped the business attract local customers actively searching for locksmith services.
- **Optimized the website's** meta tags, title tags, headers, and content, ensuring they were aligned with target keywords. I also optimized images and internal links, improving site performance and user experience.
- Focused on local SEO, I enhanced the company's **Google My Business profile**, ensuring accurate and consistent business information across directories. This significantly improved the company's visibility in local search results and helped Expert Locksmith become a trusted service in the Mississauga area.

Web Developer

Tacheon Technologies

December 2022 - April 2023

- Developed and maintained company website using **HTML**, **CSS**, and **JavaScript**.
- Implemented responsive design for optimal user experience across all devices.
- Collaborated with marketing and design teams to achieve business objectives.
- Increased website traffic by 10% through **SEO optimization**.

Application Developer

Hamsi Cloud 9 Inc.

May 2022 - December 2022, Brampton

- Developed and implemented automated solutions using **VBA**, **Python** and **Excel**.
- Designed and built efficient algorithms to optimize scheduling and **data analysis** processes.
- Proficient in **object-oriented programming** principles and software development methodologies.
- Successfully managed and delivered projects within budget and on schedule.
- Continuously learning and adapting to new technologies and industry best practices.

Junior Developer

EV Breakers

July 2021 - May 2022, Mississauga

- Developed and maintained company website.
 - Utilized **HTML**, **CSS**, **JavaScript** and Implemented responsive design for optimal user experience across devices.
 - Collaborated with marketing and design teams to achieve business goals.
 - Added Online booking for the e-commerce store.
-

PROJECTS

Public Restroom Management System

York University • September 2020 - April 2021

- Programmed **Arduino UNO** board using **C Programming language** with attached sensors to send data to the database through Wi-Fi. The Arduino board will be placed in the hand sanitizer/soap dispenser and keeps track of the stock levels
- Developed a **Swing-based GUI application** using **Java** to extract information from the database. Using the extracted information, the application then notifies janitorial staff whether or not soap/hand sanitizer is running out of stock in each dispenser which is placed in a restroom
- Janitorial staff will always know when to refill

Express Parking – Java Desktop Application

April 2020 - April 2020

- Developed a **Swing-based GUI** desktop application that converts physical street parking metres into a useful desktop application. Customers may use the app to reserve, pay for, view, and cancel parking places. Similarly, parking officers may look up a lot number and acquire information about it right away
- The back end of the application was written in **Java**, and it reads and writes csv files

Process Scheduling Algorithms - C Programming language

March 2019 - April 2019

- Implemented Shortest-Job-First (SJF), Priority Scheduling and Round-Robin (RR) and First Come, First Serve (FCFS)
-

EDUCATION

Bachelor of Science in Computer Science

York University • Toronto, ON • 2021

- Member of Dean's List of students
-

COURSEWORK

Software Design

York University • 2021 • Java

- Implemented several projects using design patterns in **Java**
- Used **UML diagrams** to visualize projects
- Tested projects using **automation testing**

Data Structures

York University • 2021 • Data Structure

- Time and space complexity analysis of given algorithm
- Some of the topics include **abstract data types (ADT)** like lists, stacks, queues, trees, and graphs
- Data structures were coded and unit tested in Java

Advanced Object-Oriented Programming

York University • 2019 • OOP

- Implemented classes in Java (non-utilities, delegation within the class definition, documentation, and API generation, implementing contracts)
 - Incorporated topics like Aggregations (implemented aggregations versus compositions and collections), inheritance, JUnit testing and recursion
-

SKILLS

Languages: Java, C, C++, Python, HTML, CSS, Javascript, Bash, Assembly (RISC-V), Verilog, Matlab

Operating Systems: Windows, Linux

Software: MS Word, Eclipse, Excel, Visual Studio, ServiceNow, Jira, Brackets

Applied Technical Skills: Object-Oriented Programming (OOP), Data Structures, JUnit framework, Automation testing

Tools: Dynatrace, Splunk, Catchpoint, WinSCP, Postman, ServiceNow, JIRA, Charles Proxy, Putty
